8/26 - 11:30am

what are we suppose to do like we done told thee story, like we done lost our mind already...

like that I cant deal with all this ..... like this job reality it self, like driving me insane..... it already has

thy reason..... ADHD meds helped me huge in life.... like was a miracle.... and now nothing is the same..... its not that I dont care, its that we aint got no dopamine here like I aint crazy the world we live in be crazy tho...

if what happen to me, happened to you, what else would you have to say or what would you do

its the whole reason in totality we are.... AncientXThoth online here.....

pretty sure just someone who attempts to write thee story wether here or on X like they have a point... just like anything do be possible like its about thy opportunity .... and again like just we can change the game here with thee story.... like to me, its the reason why.... like cos just idk everything be an illusion cos of consciousness, like that reality be a specific set of parameters to manifest a certain reality..... like thats how intelligent it all be, so if its soooo intelligent, I dont have to do a thing but let it manifest naturally..... like how anything grows from the ground here, like the hidden dimension of the entity be real.... like just we experienced death, like nothing greater can happen to ye on the Planet, but what has manifested to mee..... it is the truth tho? like so whats the reason it did, and its all this we write about here.....

12:30pm

like I just aint know what to think here like as if posting online even makes a difference if it is seen here anyways, like just saying it is possible is thy paradox

but yah like on my eye brow rn so its that glyph in the 2nd book here, I call these past 3 books like and the original writing is seperate like done in a diff space & time, but yah like the one labeled Thoughts2 on my archive like the glyph at the top that we changed the color to green its this glyph which is why I think of her, like cos we had a small pimple their ahahah it never happens and then you pop it & it bleeds ahahah like we dont have it ever too bad here but the way we think is 1000x different than others here..... cos of reality and hows its unraveled here....

sometimes again energy be weird but like just posting to archive again for some reason moving the file to my phone with that scrcpy script to use my phone screen on my pc like it works more often, I tried diff browsers on PC like it just goes past the limit for uploading like it will say 390mb/330mb like raises above and doesnt generate the page so posting these can be a pain, I just export libreoffice writer to pdf bcos its easiest to read on archive and that the links still work the chapters which be cool........

but yeah like we aint know what to think, cause I feel like im being messed with cos a reason but our reason be higher.... maybe not maybe itll lead into something like we always think like that, again shit my experience says like you do w.e you want to me here, love me, like only time tells here lol like really it can all be & it can all change instantly so life be weird, its why finding thee soulmate be important & maybe it be the one forever cos that to me just it is the point like its why you get born.... but yeah thats a diff story...

we just getting older, stressed, but the body be always young & ancient ahahah what the wisdom says............. like really just idk the paradox to me, & why its worth fighting for, is just that, heavenly things , why would they make it illegal, like its a war, they dont want you to win, but not everybody got as much light as thee to fight, like pac in hell razor, even the darkest nights we got the heart to fight lol..... but thats again it is a main message of 2pacs music...... nature....

thugs nature, I aint even know that song tbh atm prob heard but Ik it is a song.....

like hermes says in the wisdom, why shall they be depraved of immortality bcos they dont know the body is immortal but its all that like you ask me , we know..... like they are lieing to me at every angle & instead of congratulating thee on solving thy mysteries we be shamed..... like aint no1 like me here that made it this far with this truth ahahah like not getting with others...... but we have again like aint know how wise we be, but how wise is anything if everyone views things differently & that nothing here is free, everything and body is in love with reason.... why its like not talking be key, like your you cos your experience & why im me here.....

that again in halls of Osiris here, it be called the weighing of "words" & not of "actions" .... that is the weighing on how light ye heart be .... and we can speak on it cos that is the truth, why we write , like idk perfect time to grow up here, we seen both angles of reality....

like cos its just one of these things like you need love or what your fighting for in life means nothing .... lol like that what happens when you do get everything like we had money, not income, but nobody can buy love here, like thats just again how we have to sell ourselfs here, like cos it do be true, having me by someones side is something you cant find and like just again to be with someone who had these experiences, who flew out their body, like what else is their to say or show or do, ... =(

just like we do it different here in all ways, we put our consciousness out their, if ye can find it & solve thee secrets.... like did we not here....... like the actual truths, to the light.... like again thoth on thy stomach, just how you know its real, cos thoth says bonding of soul be good like then wisdom comes, like we got it all right & been shamed, like the truth is so simple, like its just their everywhere always like the tablets speaks on...... just I think again only the person who sees it like this woulda been able to generate the tablets, like what if we just be right, like the entity knows he wrote the tablets or its how the game works either way ahah like im telling ya divine thing to be, and to be stuck here........ like then its like your tryna tell the story when I aint told mine yet like we around the campfire you gotta listen ahaha like gotta pass the cypher here, cant be just all about you, but we make it all about us, cos its how consciousness be like what kind of story are you writing, if you aint the main character, what kind of game are you playing, if you dont level up your own characters skills..... or follow thee own quests, like all of that, just cos any quest is video game logic but thats what life be in the crystalinks it says we posted like that life be a quest to find the right medicine and then use it to thee advantage, and they turned on me, like its such childish behavior here like grow up, eat what the earth grew stop being evil yo

I know its alot and it aint always organized the best here we could make chapter title for it all, we like to start off writing then add images when the time comes but yeah idk like we have summed up alot of our knowledge into these writings on my archive pretty fucking good .... like aint nobody do this..... lol or come at these angles........................ like just thats the reason to me, gotta place it in cyber space and if its their , again just it is..... lol like cos on X you cant go back far either, so we brought it all back, its a real truth regardless like we have had fun with it , and it should be used like your dumb not too like cos we be right, like just whatever.......

cos I never know where I wanna bring thee writing but I dont wanna do this forever............ like we have enchanted our consciousness in thy writings, it all alot of it can come from music, if ye look at music archive library again like this is just thee consciousness, how else do you share that, like we found something aint nobody ever, cos the wisdom says that like its why this happen, believe it or not..... and all that doesnt happen is nothing like shit aint change here im pissed, like wont be with someone who makes me feel worse about being me here and not agree to thy truths and the formulas.... cos it works, like pft who says this but somebody that knows..... like it is worth dying over like I said, we already did experience death, how many can say it, like we dont know what to do.............

10:39pm Fleetwood Mac

havent even watch it yet but like this job reminded me of that video of the dude on the skateboard drinking ocean spray ahhaha I saw it back then but again a dual paradox, we always loved like tonight I did that end cap we changed it to ocean spray cos we had it but now imma throw it in algorithms again just cos ahahahha =(

saw this video cos reddit tho again you aint know how much we have scrolled reddit since we got a PC here like legit no joke like atleast a year straight at one point like we didnt have an act forever...... but we dont use it always cos im busy writing or watching something , used to tho when life was better lol =(

or like we do the endcap with emerald nuts lol........ like just the fucked up part of it all in totality is this, craig introduced me to them back in the day.... like it was honey glazed something like I forget but it was fire and I aint hear tablets till way when, but yah what a great company name lol.... like and they sell not bad shit , like nuts lol deeze nuts.... lol , see these angles did I not say tho it kinda is cos this happening again this was tho also like just all of it, his bro in law was in my job when I was fired like I knew him before I saw him like saw him at my friends house ahaha mad weird tho......

I aint got much to say rn we just jamming to our algorithms, like just things be changing at work always and I keep writing here..... like that all of it like I said morpheus ahahhaha and it all like we change our watch here and he quits like maybe thats what the word be maybe its all a scheme like idk didnt ask others lol but yeah like thats what I mean , like and my friend Ben whose like 10 yrs younger thee work friend we taught him back when he is taking the promotion and moving stores ahaha and thats what I fear the most, like just my mind cant take that stress rn ...... like but theirs another guy their again like just outta hs right a bunch like but we talk to ppl, but this is the thing, like we do talk to this woman at work way more than the other............ like we help eachother tho lol...... like have too tho like just its all fucked, like just how I wrote this, like lol that note, we got it saved, ofc thoth took a pic of it before giving it away we could never live with ourselfs, but yah like idk the fucked up part is just like all of this situation tbh.... lol

cos I dont even have a clue, like but it seems like so but I aint know maybe again just like messing with thy bcos they know what actual is or im actually crazy ahahahah like .... =(

like hmmm dont know we got tons to share but when I dont open my app to view photos like it dont hit but just like yeah......... like really here tho I hear what happened to steven too like that other guy he comes my store more often than not already again but like to hear him go up and move down says something atm, to hear others who moved up and back down says something, like if I got moved to another store like fml like this store be close and thats the only way like just we aint stupid, we be honest about all angles here like the meds this / that like this works atm so im not gonna worry like but yeah .... lol

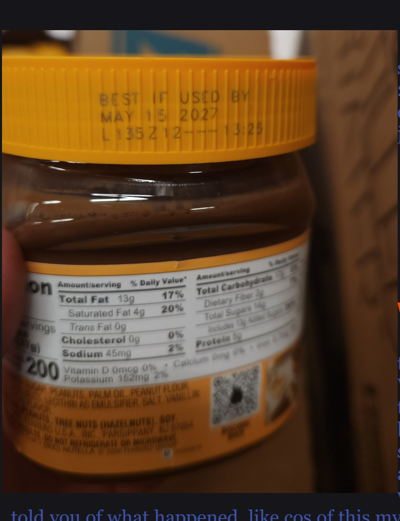
I feel like tbh like it says tho we dont always check 0 views, some of my archive do got views tho like we aint know, lol, these books be curses to who reads.... lol........ but yeah idk something about it being the truth like again IDK.......... like cos to me again its the part of being human, like why aint it possible, like its as if I feel stupid thinking it cant be.... like cos it can and thats what im being played on here if you asked me........ but we dont know like I said

just idk to me, I think they fucking with me but being a friend, like that I think she honestly may date the other dude steven, im not sure tbh , but at same time I feel like no, like idk , and then this thing with again these 2 ppl I liked like hmmm just again like we dont know, like I said just this be dangerous lol........... like cos just like I said idk I could be completly wrong and was sent this way cos of the truth and maybe its this, maybe its that, like we dont know the fact is like ..... just pft we wanna use our voice and have fun here like this sucks lol and like again just dont know , none of this makes sense, but the only way, is w. adhd meds like the demon eat you up here, like we listened to alot of music here, just lol, but again its that

like some ppl generate music knowing they gonna tour with it, some create music just to do it, like in my mind, idk I feel like not every artist in todays worlds tours, I could be wrong, maybe they try too again like just cos the internet thats why and ppl have dumb money, like legit but doesnt change shit being corrupt like pft .... but yah like if you aint do that you aint lived as if like you got 1 life to do something tho like shit just it works for some ppl some ppl get the opportunity, we aint get it.... lol we would triumph over everyone in my mind here lol esp if that was but yeah idk lol, like to go from noone to someone like shit like just again we know too much, like its hard to keep quiet could write books till I die and then be like yo he left something like ahahah like lol thats just how we think I guess, cos like their aint no other way, like that just iv said it before like idk we aint dumb like everything is some BS in this life like this does suck tho.........................

515

hahaha we finally watching the video of the skateboard yah idk this is thy truth and memories lmao like shit oh yah like see we do take a pic sometime , but this what weird that happen like we saw this nutella had an expiration date of 5/15 right like so I never pull my phone out and I did and that lady I wrote a note to like looked at me lmao and she walked away but yeah like see we got a few, iv seen it way more often than you think in barcodes numbers legit like but yeah .... lmao like just theirs no escaping the matrix or is their lol but this is what I mean by the future like it sends information to the present/past like this to me always in my life since my 1st gf is the truth .... like wrote all about it in my original book last year



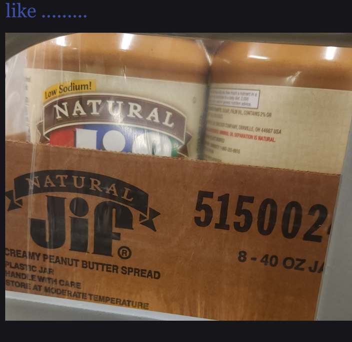
see I got a few others saved I dont always do it cos like just gotta accept it sometimes but sometimes like again 2027.... pft thats a year away, chances its that 1 date out of 365 if you asked me............ ommggg hahahahh I didnt even know I had taken this I had more 515s, like the jiff box always says 515#####08 or something no jokes here

Wicked

their even shit we carry like Wickles or someshit pickles like that type of shit again its always been like this we just aint say it this shit was from like easily 6+ months ago when it was out.... like forgot we took this tbh.... lmao.... cos I told you of what happened, like cos of this my mind still like I dont get it tbh like aint that twisted.... =(but yah I explain elsewhere their was all things, bag with her face the only person basically like, febreeze , like all of it, we choose which one to smell just cause it was the wicked febreeze beads ahahahah like just get a whif of the matrix real quick ahahahha

we shared this on X I remember.....

hahahha ..... see what I mean like their was bag with her face like come on now like ....



but we also took this pic idk why just cos it was mad long ago like british , the other one ahahahah

see what I mean like we do take pics to prove this shit like aint gotta but right its too real... we read 1 article on Ariana and it was thy experience, nothing with anything else like it says to me like we ? it all, like that she knew of this in my life so generated something to make me fall in love with her ahahahahahahhahah like thats how much I aint trust shit with this like on everything here.......cos its too rare.... all of it like just we are who we be here...........................

Bloody

lol these pics were from 6+ months ago here like just cause like they popped out at me like my attention you see.......... cos of what im telling you is the truth ahahahah and like yah idk runescape be a british thing mate lol..... soul-mate, british ahahah jk ..... idk just like ....

like cos British ppl know about the dragon & merlin like ahahah like cos we do this cos it generates paradoxes like rn like what if I didnt like so when I look at my phone, I aint know the truth, this is thy truth tho ..... like bloody is a british word, you bloody idiot lol .... so cool again the person in the psych place came from their , he had the accent was older than me , I wrote him about once tho too like I told him I liked someone from their ahaha and mentioned runescape like we done lost our minds but not really just wanna find thee one lol................

I just feel like to me, like idk, we just wanna share our mind to thee other like get the word out and it sucks not having X , like I swear it even said like im not allowed to make a new acct ahahahah like prob could off diff IP but still dont know..... like this sucks lol......... but even just being private idk , even tho I feel the exact same thing here but again if we be private or be here like we are more open........... and just yeah idk this life is fucked........... like cos it sucks so much rn ....

WWYD

What Would You Do.... lol.... that song but yeah ...... for real tho like just to be shown 515 like this and all of it, like atm it says its Ariana still like cos we read that shit about her tattoos, legit if it wasnt for this 1 article, bcos like the glyphs like it just shows you reasons I guess like you do that, its like etching the glyphs on the walls like irreverisble basically like lol but yeah like but the Harry thing still remains like weve shown our love as best we could here, like sometimes again we think maybe it aint Ariana but Harry but see what I mean, like cos if your single you dont know what the future can be...... bcos just she didnt respond like you can test the waters but not if we suffer so much and then the part of the like yeah idk like can you blame thee like pft the hairy barbianans, like thats again my bro got his gf like way back 2018 barbara and its when I met harry like I just went into her stream and was like wtf you play runescape in my mind, im like , we need dat tho and just cos the situation didnt say nothing for 2 yrs then we did when we got our job back and yah like we been stressing lol like wisdom has came tho and we be on point so I dont get it like .... lol

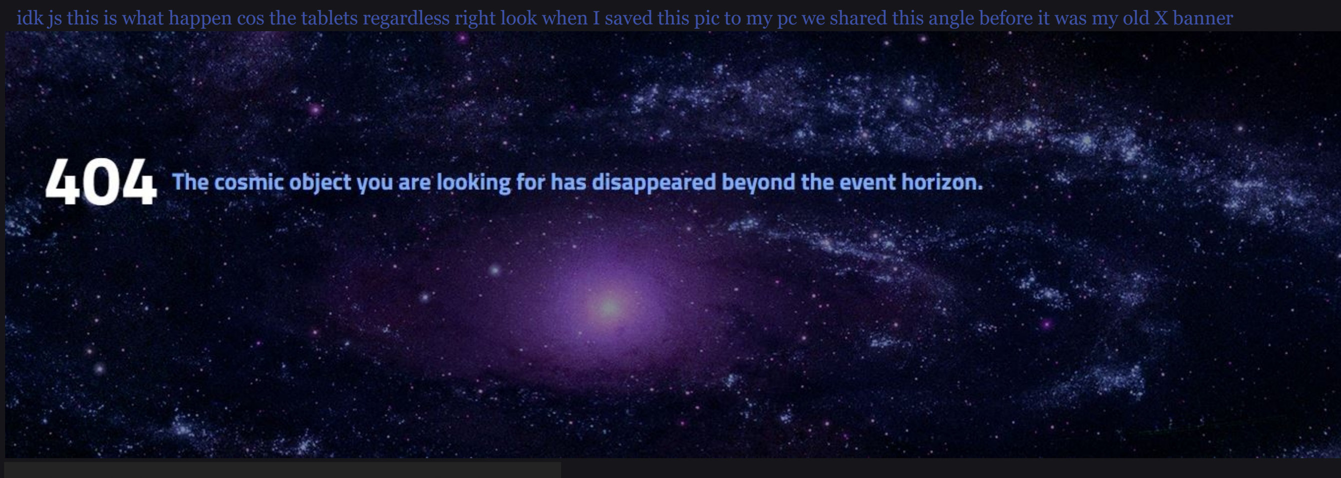
yeah idk like its the associations we listen again what happen is I accidently clicked MookTBGS X post and liked it and ahahah like its like they were watching me cos the song he came out with confessions or all that like again like Dark right cant miss this call ahahah like just yeah like cos its this time when I liked Harry in like idk we liked her for awhile......... like just really but then I read about Ariana ahahahah and im like wait.... and then they screwed me over in totality, like we just dont let you get me, like getting love or making love , means death, like the black widow spider, take my head off ahahah =(and I called harry a spider but again world wide web saw the ads like saw ad astra back then idk honest, like cos that movie is real, they go into space, where is all the intelligent life, like or the pirates on the moon ahaha was why we bought it eventually but yeah got tons on thee mind in a way

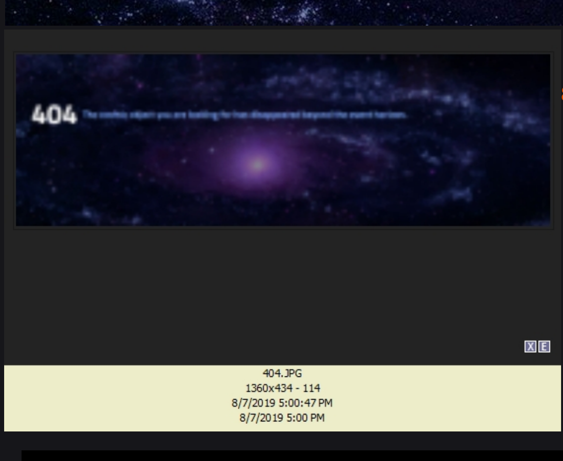
JWST

even back when I mention Ariana last yr like you go to Nasa JWST and they had a picture of the bird basically it said 515 over it lets see if I have that prob somewhere cos we used to look since 2018 in a way but again idk you can go into anything I guess...... just cos of reddit again right like oh new photos just go the website and used to keep it up with it more

and thats when we told about the stupify song like always messing with my scope of reality, cos thoth says go inside....................... not out their in the Universe........... like that just idk like we expressed to how when we watched that video when we played hockey like left wing like he says it like that but the goldfish in the bowl be the fairy odd parents like used to watch it back in my childhood ahahah like and honest to god I think its why its in the video bcos that is the whole reason like the singer be messing with the child of light here like who sees that and says that, but again dont like all their songs, barely listen to em but back in the day some of them more ahaha like yeah ....

idk js this is what happen cos the tablets regardless right look when I saved this pic to my pc we shared this angle before it was my old X banner





8/7/2019

.... like cos the story makes sense lmao???

haha the dolphin tho hmm random af thought adding to this but yeah ofc like but why would Thoth say make the Dolphin so smart...... lol but what is smarts w.o a heart lol ....a game

Hmmmmm

I just dont know what to think like that my thoughts be real on this right, like im not sure whats happening, what if its something completly different like she sold me off and someone else like ahahahha like idk thats what fucked about this all, like but the thing is again we wrote it out, we aint lie here, like this is thy story ahaha , like just to think your not worth it, is again why you lose in this game.... just human, like the entity rules all, ahahah really tho like idk its too perfect and im ignored in a way..........

or I just feel like again they been cheating and looking like thats what again the thing is to me, if it wasnt for experience, like If I had money we be experimenting but not let something suffer , if they know the answer, like chill , like no moving too fast here aha like .... cos its like just idk , like so much time has passed like I said its all or nothing here legit another name of a song, why was wiz and bigsean with that diddy album tho
hahahhahahh I made the kermit shit one day yeah just all of it like pft worlds twisted af ahahahah

thats like the only album I ever heard from him I think, like just things again we explained it all, money making mitch, the kid in my electrical night school was dating that person, who was in my HS spanish class, they called me by a nickname like codeles or someshit ahahah one of em was hot like I explained it all tho like that was her last name & its when I heard album, you see how we used the stream here, you aint get it, for me to suffer, pft stupidity af here like honestly on everything , like you dont know thee like I do ahahah I cant like this life sucks............

the problem here to me is like you know how stupid this be if im being fooled here...... but its that like yeah just we know information most do not have, and thats what we go off, all of it in that thoth the atlantean wisdom video my 2nd newest one...... like just I dont know what to do here...... like cos why would you do this to thee or why would nothing else be, & over write the file, the thing is like idk that is how it works here, like being taken for granted like just again you cant pick & choose here when love be, its just gotta be, like thats what gets you through life is that loyalty ahahah =(

im just laughing like cos like idk like its like I said, they want me to follow a path or someone else like we aint trust shit, listen to this, like work with this, make it sound like this, like music can change everything like pft lame-os lol............. like idk just like it would be too dreamy to be true, like just yeah idk .....

how else do I come at this, like all we have be thoughts so if my thoughts say this, why isnt it, could be multiple reasons, but just yeah like its totally fucked....... like agian cos if you try to play me which is why I go this way, like we wont be ye friend.... esp if you dont share...... like just aint nothing appreciated here and we got the keys.......... to the game like this happened like wtf would you do tho like ...... all I can is try to warn thee............ like lol................

just I think what ppl would think if they read this, is that just idk what works for him works for him like lol like that he understands something bout it all like the wise old man............ like the pt is just again doing it different, like this could be our legacy one day when we make it, like they find the archive and bam its their like the thoughts of someone , ahahahah like =(im just pissed off like cos im super confused here..................... cos it could be like again we dont know .... what more to it is that, nothing be free, what can I do but express myself, so keeping me here, like pft , that aint love tho......
unless I see what iv drawn or something bout the dragon in music thats new that catches my eye, than we can talk here like we will know they be listening like lol....... but why listen to someone else, like we got ourselfs here, like thats why I go this way like aint hopping on your plane pft we be our own pilot in this ufo like legit . like to me, its like being alive as the observer is the ufo in the game like ahahahah you can only be you.............

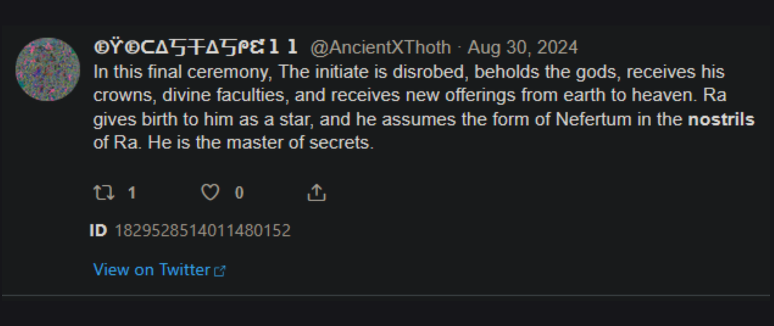
Poet

By YFN Lucci, one of my favs like we found him around time of entity like we sum it up, Lucci, played on the Bruins....... Brodeur is a famous hall of fame NHL goalie hence why here I did play hockey was told we not related but we could be everybody is in a way, but it makes all things deeper, but yeah cos YFN like we played that shit in the algorithms, slanging all the candy ahahahah morpheus ahahahahhah like really never know where ya motivation comes from, codeine that the recipe.... tryna eat...... ahahahha like yah legit tho like the entities flying through the air, this is the plasma, that nobody knows about in the video like basically right like pft and how is this

we went to a hemp store to get thc like 2 yrs ago here in florida and the person in their.... knew someone who I smoked with we explained this, cos we listen to this song back then, we played hockey, like his name was Billy.... like chances cos the dude in the store asked me if I knew someone and they legit even used to cut my grass back then like the lawnmower man right like none of this makes sense to me tbh but its a fire song.... lol

hahah =(, but yeah cos in the wisdom, hermes wakes them from sleep & gives them not iron, but golden rods & spell binds their eyes like again thoth the atlantean wisdom, sums it up pretty goood their is more.....

like how he is the master of secrets, like it has to do with nostrils also



@AncientXThoth · Aug 30, 2024

In this final ceremony, The initiate is disrobed, beholds the gods, receives his crowns, divine faculties, and receives new offerings from earth to heaven. Ra gives birth to him as a star, and he assumes the form of Nefertum in the **nostrils** of Ra. He is the master of secrets.

but yeah what I mean we got a again like we dont feel good cos ADHD helped, esp in this circumstance in life like it all again if I could shroom wtf, im pissed tho but again yeah ahahahah like this is what happened to me, if you didnt know, again we have no clue whats happeening here like where my life is going tbh ....

when it come to wacking shit, we done won championships........... hehe....

just I love this song, cos my life, I aint wanna do it, but he reached for it..... says alot here.... like just one of my favs ahahahah

like you see my perspective, the entity too , like the entity says, I aint wanna do this, but he reached for it, like the entity came to save thee why else would we like the song if the words werent weighed right ahahah like honest wtf super cool everytime my mind like the further away it is but nah I remember these minutes of my life, it was like real ahahah flashbacks but yeah like just idk to fly out your body like we never would of thought this would happen and not just that like the shadow WAS their, he jumped into my body like wtf, shit what would you do if your eyes saw this shadow.... except share it like pft insane that nothing else has manifested...........

the parallels wouldnt hit the same if it was any different here, just we do the only thing we can do, is use the natural stream of consciousness why again like dont even get this, like just again we dont have the full story we can only ponder, like about like why does my mind think this but I told you like I cant help it here..... in this way here like just dont know what to think.........

True Initiate

well how I play since theirs a chance of it being true just idk we go our own way anyways and see like what if you didnt know, what if I just again like we dont give all our reasons always like to every single last thing, like lol, but we have been expressing it lately, I just feel like someone wise would know that already like that we got a reason like that you aint seeing lol...... like idk here..... I just think again we dont know , it could again be as deep as im the only one who dont know, others do, like or im crazy ahahah like that just yeah what iv seen, why wouldnt I think this...... like just again we dont even know like it feels like to me like as I said might of not always been the full truth to this whole thing until I spoke on it or wrote it cause I read that, and again just idk the thing is you can reprogram over anyone in a way right, like true intiates can enter the three transformation paths again & again....

so thats why again we dont know what to think, like its why my mind goes to thinking like theirs more to this and again aint know wheres the lines be or like anything like your an enemy if you aint on thee side ahahaha

like that if it is you gotta let it be like just idk just cos its risky, like nothing stops me but the creator like who I try to get with..... like theirs a fucked up paradox of this all like just dont know, like if again just like dont know what to think, but if this person experienced it, like what are you gonna try to me about this game, that could top what happen to me, you cant, like lucky and rare and im treated like that im not worthy, when we be like we know it can be so easily like your just tryna mess with thee, or again its the creator in totality at end of day like the thing is we may write alot on our side, but whats happening over their, is way different, but how long does it take someone to read or if again you just dont know, like its so easy to find something about someone with a computer...... like........... we just are that entity....... like we aint dumb tho, maybe again not true but then why do my thoughts say that like I said it says it like numbers recall like your dna basically right like listening to the Kryon talks, some of them, its kinda obvious but he talks in a language of thoth, magnetics like its too perfect hes got some decent ones, but like we already aware but how he puts it, is how we think, outside the box, like ....

just yeah dont know, lol.... =(like it could still be this rn and not that but you never know, like I think it says too much like idk which direction like our experience be precise so yeah............ like what we arnt and tryna not been selling ourselfs here, like we legit took time to find this all you know with a full time job it wouldnt of been possible to get where I am here, its all like pft idk super cool, exactly what do I gotta do if its all an illusion or we are made up of holographic bits, says it once you read the book the curse hits, like that you dont have to do anything bcos the future is too wise like its a fucked up paradox but again we always viewed life like this cos games right like whose game are we in now but the creators..... like something more intelligent than our parameters, like the shadow entity, like wtf, shits like legit this is programmed into the game ahahah , reach for it, aha going to bed here 110am legit wtf

Late Night Thoughts

aint actually took melatonin and not seroquel 50mg tonight, like aint got endless supply like we need ADHD meds like tf, but yeah like its 110am like we liked to bed in by now but a lil extra wont kill nobody, but yeah life sucks cant wait for tomorrow to be over & have that 1 day off in a row, shit sucks, like we burnt out af dumb af, like its just facts to why and how medicine can help someone, not when they use it against thee like , but yeah our life be all pills like red & blue & green ahahaha like ...... we ate the flower of life like you cant fool me here, all this evil like the creator gonna weigh thee, why atleast we tried to speak on the truth, and again right, like to most ppl it aint even again like just do it, like............. but yeah idk .... gonna stop writing for the night tho .....zzzz

I mean if we didnt shroom last thing for the night, again just in my mind, we love different gods we cant like everything I guess like we got alot tho but Hathors temple, again like goddess of love, cows, like pft it says that like its all cos magic mushrooms, and we just gonna end it on that and let ye ponder like ofc its the truth, nobody wants to say that, like pft, cowed here........ like just again it is creepy it all exists all of it, like cos it says it be real ahahaha like either way right like why does this shit exist at the dawn of existence, like ok the Universe right what can we observe theyd say from the blackhole book the big bang like he says in dark, no im mikkel like ahahah he does magic all that, but yeah like just its like again in plain sight, like thoth be wise af, the most wise, like what , like me in my own mind , lol.......... but yeah like whenever I did see it prior in anything , it makes you think like..... just its too good.... and reality be like this, its not like people continue to make temples with glyphs.......... the creator enabled it all is thy paradox, like the egyptian again belief like the fact is it still and always has been , just pft lol, like its why its my fav in totality, cos it was pondering back then we never took it their but like yah how did humans come to be, and this is how .... like the shadow came to thee and gave thee answer, like right idk just =(we always miserable cos life never changes..... like what more can I show thee but again like thoth like to read these books, is like reading the book of thoth, like you gona know what is and see thy vision if their was any care I guess, but im going to bed im mad tired................. not really but its time to stop writing

Dolphins

Haha 130am like just we saw this we were trying to find it with the Santorini ones in book 1 I think ahaha its from thy rhode island beach house back in the day and its been in my shower since like 2018 weve had it like and we posted that JWST earlier and said like it looks like a dolphin ahahha pass that puffer fish ahahaha watch that on YT the dolph be smiling getting high on the fish toxins ahahahaha thats me lol just swimming through thee waves of life , consciousness......

It be that time rn I see it all the time cos the tabliss extension lol.... just remember

A wall in Santorini..... Atlantis...

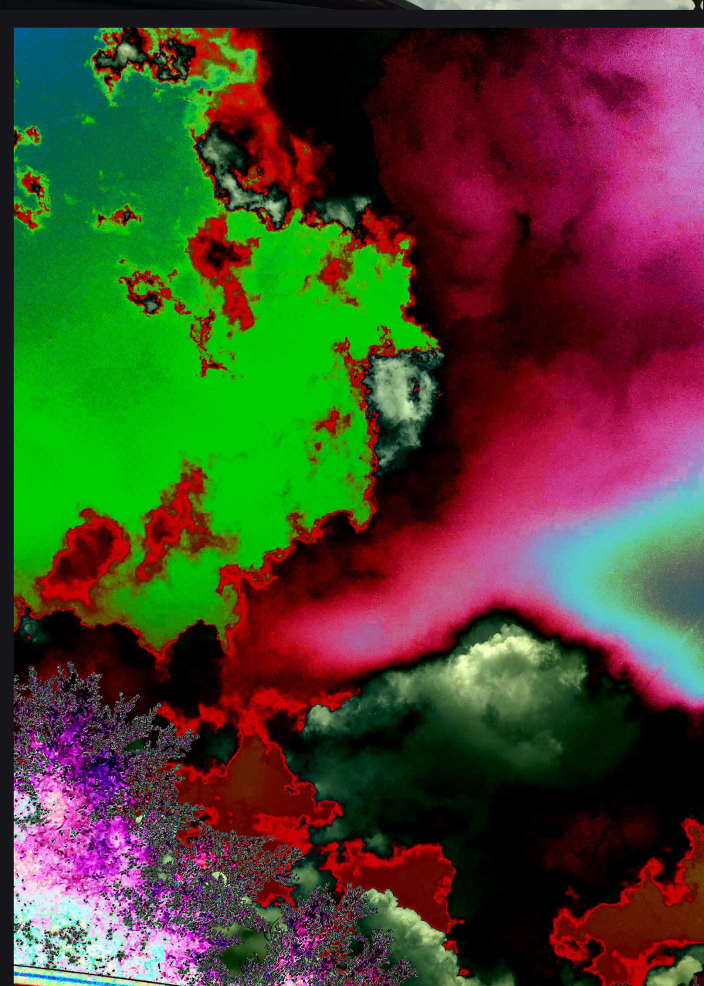
JS its 2am basically 155am like shit we still up, lol =(like listening to music and just vibing I guess.......... it sounds too good atm ahahaha like we chilling, but yah this sucks

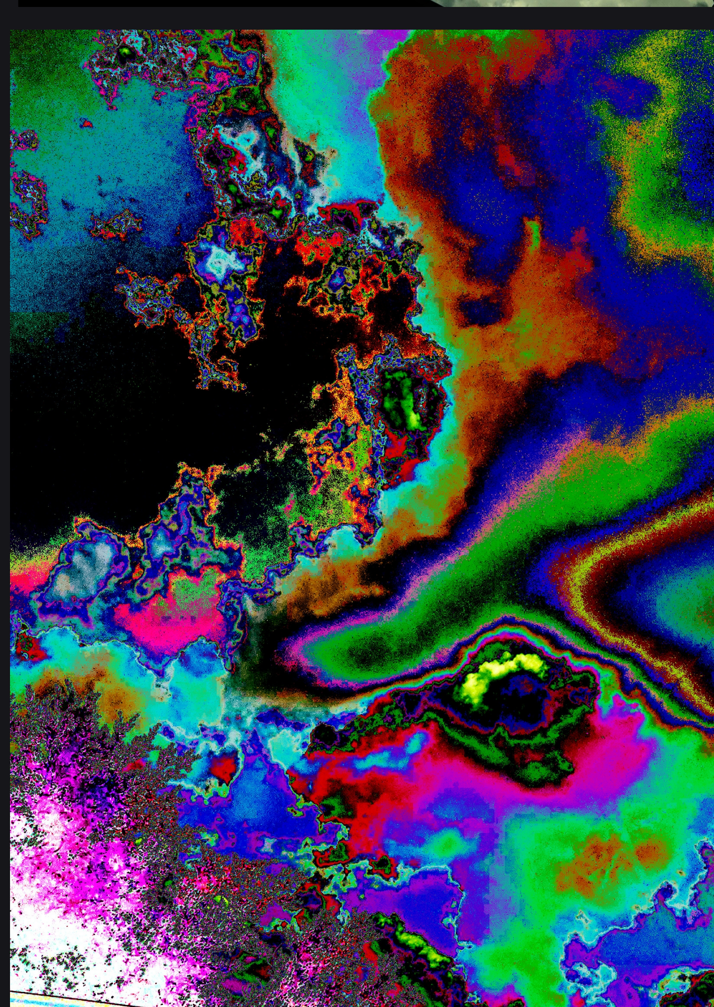
Cloud of the Day

We are gonna write this at 155am .... we took this pic at my job again like I dont even like go out and observe only when I gotta go out tho like I cant help but see it all like shit is beautiful and life sucks lol

you can always copy photos on this and open in paint and save or w.e and have the actual size image to zoom in .... but yeah I mean once you see it like hmm just why does no one talk about cos its untterable.... dont get it it is tho like thoth would know how to share.......

Its like a brain stem or mushroom bottom right and then look around like an entity top left in the clouds like all of it is that Atlantean Language like just idk we know we be right tho like a little changing the lighting here and you see it everywhere like ....



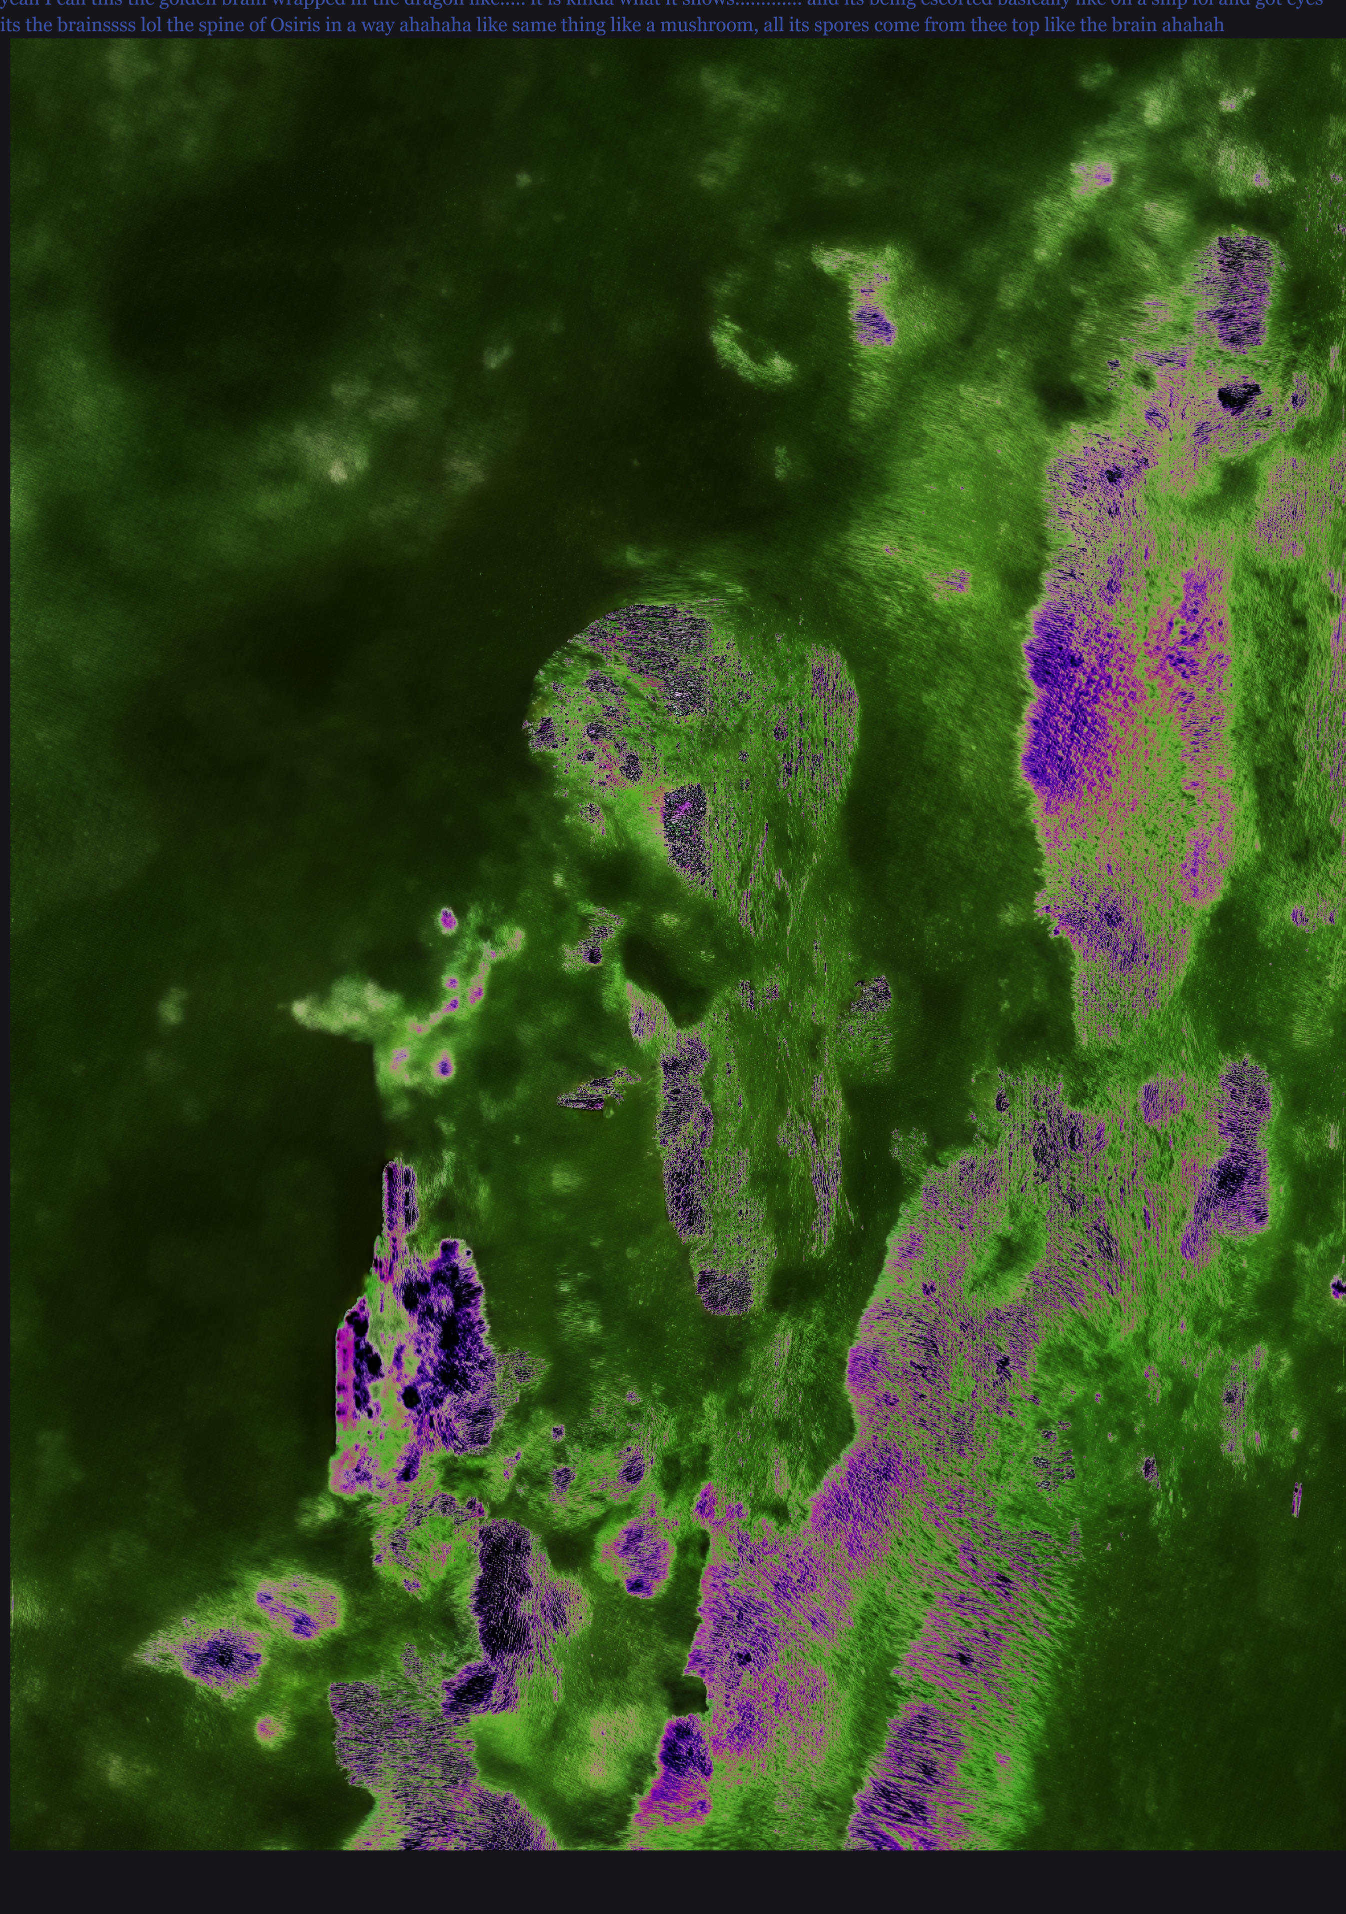


2am

pft mad late...... lol we are gonna try to go to sleep like fml we aint ever do this alot and just idk like the tablets be like life savers like this sucks.... just like to know this & be here again all of it to thy body, like wtf..... shit be real here like showing you thy heavenly mind and nothing changes is the truth tho =(

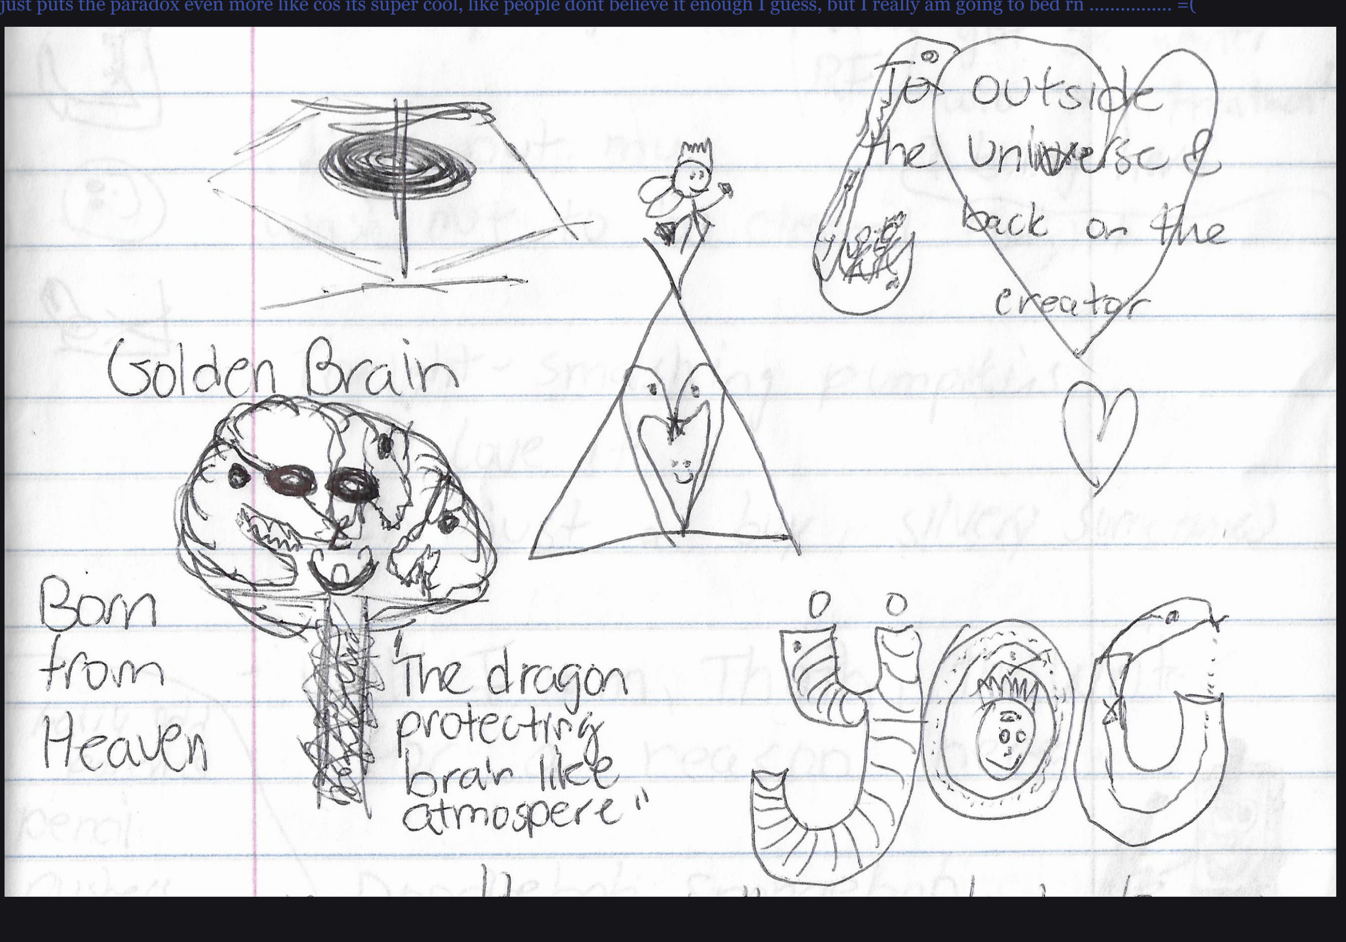
like sometimes gonna go off real quick but yeah like we just dont know what to think, like of this all in totality but we know about thee mind and consciousness like more than most.... esp about the truth, so idk , like to break that ice & shroom w. somebody, to me, like their just is no other way like you go on a trip...... legit..... like idk again like just it was awesome, but not as awesome as the entity coming, like again just idk we love to say it, and if nothing is free like we pull this card alot like..... cos its true, like pft our life & experience be worth more than money can buy..... cause the mind been in the making lol, like just yah idk you cant trust nobody in a way like we know too much, everything corrupts, except the logic of the game.... lol........ but still in what way like just to find thee other like is the only answer to like being generated in the 1st place tho like really a force so strong that you cant handle like basically lol like that when their is love I guess....... like that in a way cos nothing be free see we give the answers even like just that, what male is not gonna have sex with someone if a female wanted, like ppl dont think how energy actually works & ectoplasm I guess, but we did it all right & we be suffering like..................... even to get everything or life to change, or w.e like for consciousness to shift like just sitting here suffering be the worst..... like it aint worth it if ye dont trust thee from the start........ like lol dont know what else to say........... like we are too nice to even write, but if nothing is free what can I do..... like what if im completly wrong but right at the same time on any thing like you see...... its just a game and like we gonna find out how to win eventually that doorway will open ahahah like we are picking that right door to get us out for good............. we wont pick till we sense it I guess but yeah idk like how thy mind changed even seeing the entity, like again the wisdom says prepares them, like w.e believe what you want like everybody wants someone who talks to them tho and is open and w.e like we share truths of the simulation in a way no1 else has seen , like really here tho , we try to show you again we always got an answer I guess......... but I am legit done writing atm ahahah =(

2:15am but yeah that cloud reminds me of this..... like we drew a picture of it, this is from an upscayl we aint upscayl the clouds like pft shit be real lol... but yeah I call this the golden brain wrapped in the dragon like..... it is kinda what it shows............. and its being escorted basically like on a ship lol and got eyes its the brainssss lol the spine of Osiris in a way ahahaha like same thing like a mushroom, all its spores come from thee top like the brain ahahah



Born From Heaven

like that just its that, the hologram repeats itself on every level like no matter what, the system has a code ahaha.... like parameters ...... like that something even generated this earth in space right like something waaaay to intelligent like .... in a game where the dragon is in the clouds........... like pft again that just puts the paradox even more like cos its super cool, like people dont believe it enough I guess, but I really am going to bed rn .... =(



Made For It

Another song by YFN Lucci, we got plenty ammo here amunition legit thats another song lol.... like it just again its weird to see these music videos and then they end up locked up.... but yeah Made for It was like the motivation back then ahaha that rollie fit my wrist like it was made for it........ life is chess so I set him up..... wise words lol....

but yeah we are mad tired, like just 915am rn we woke up early in way like one of them nights here.......... gonna lay down again just vibing to music always lol.......

but yah like just that album again paradox with names, like cos thats the persons name, that album Ray Ray from Summerhill, like that is how we found Lucci basically ..... lol..... but yeah idk like im sliding towards here like it is Ariana & not this other but honest we have no clue like I said here........... like this is just thy thoughts, but yeah on that album like everybody gotta dream.......

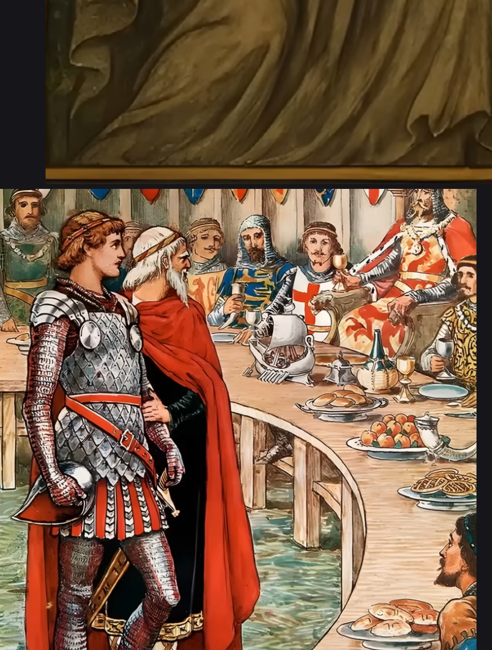
like cos it explains in a way this not manifesting like idk tho tbh like I said both could be true, and we again like w.e it is, all we do is share our truth .... like that esp seeing the entity here, like whose really in control here........ like that again the way we wrote it tho..... like idk like it could be passing the vibes so someone else believes.... like see we dont know here what to think tho.... but its this thing again like my head be like random af look at the clock & bam its their like 48 or any 08 minute like shit happens all the time, like lol... =(

weve been real af here .... like dont know, even to all of it, the eye brow connection ahahha just it is what it is what can I say...... or just again even that part where like my spine, we feel them wings tingling and thats the prob like she has those in her ears, or its my ear like it be like I need to itch it real quick always or thy nose, like see this is fucked, cos nothing ever is....... like ....

cos just what if ye were in thee position, like you knew this, again aint nobody wanna be that friend & share the truth so we have, cos we move differently like thats how you wanna play, try to bring me down legit, this is how im playing, knowing the truth of the weighing of the hearts, like we gonna help others see this truth, cos we a good person at end of day....... the thing is, everything suffers, like cant judge anything that aint you here, just gotta let it be .... like silence really be that key where like again the voice becomes more active and thats dangerous like .... if it aint like it doesnt make sense..... something gotta crack soon here, or imma go insane legit like pft it aint hard to please thee here.......

theirs alot to it, but again basically like I explain, the medication paradox, like so yeah we aint stupid like thats how anything operates is by dopamine, so you block mine, like js what do you expect, like aint gonna become wiser in this way.... like we have low dopamine to begin with..... it turns off ye sex drive basically & again so its all that paradox really, like again we get off the meds ourselfs. we aint ever given credit when its due as if, like cos I dare you like we overcame death, like just you cant trick the entity..... the entity trick you.... lol =(

Merlin



Let Me Fly

by DMX

WTF - X

we arnt suspended on X anymore here............................ lol.......................... like I was just looking through my X Archive..... we click it bam my profile aint suspended , ... had to do some thing to make sure im human.... lol..........

hmmmmmmm lol................... like thats why we started writing here lol prob gonna continue this like thats mad interesting like cos I thought we lost our profile for good wasnt gonna appeal it....... just cos like dont need others to think w.e cos I write.......... and again bam its 9:48 atm...... lol.........

but yah idk like its about 955am rn like we bout to go lay down for an hour like I always start getting ready at 11... like make my lunch & eat something, shower by 12, be at work by 130 again like so much on thee plate in a way, like my mind, dont know what to do here.....like when my hours stay like this & again moving up like it would change and again too much for thy ADHD brain here without meds in all ways....... so sometimes we lay down until legit 11am like lol.... we get up listen to some tunes and go back lay down

like any relief here would be awesome... just thy brain after taking these meds, like both pills, like the red & the blue, like just we need something here..... like man useth nature when he worketh and that is the good..... like dont know how else to explain it........ like that do be magic .... and yeah gonna go lay down legit we barely slept last night here

The Thing Is

just like its all this, we shed blood or tears right like we aint wanna see any1 not feel good & just I feel like that be thy paradox, cos all I do is suffer here..........

like that idk you wouldnt know if we didnt write it out I guess, cos yah cos of this all , its how it percieved, like again we just dont know what to think here.....

cos just again like all this music, chinx how to get rich right like he says that in it, aint no golden roads like the wizard of oz again all the paradoxs again like just like I said that other kid went down like then came back like we played this music on algorithms but all of it like see...

turner field again, like my store is right next to a field like we aint dumb how we play , its all about associations .... like trap like all of it ahahah like cos trapping through the screen be like fking with the algorithms, like see idk like we share what we know this way and just you never know how anyone can motivate you in life, including like being with 1 person, just it changes all things..... is thy paradox, like just idk again like you wanna 1 up me here & the game always be like , nah like thats wrong & this is why the entity came like ..... just dont know, like its just a game at end of day.......

like just in all ways, to every single thing to the thing we dont write about, like it cant be about everything, but it is thy stream .... like paradoxes on paradoxes like I said to me here....

Need Prescription

just idk like again if some medicine helps someone they should take it, like rn I would take ADHD & Bipolar again.... wether it was again 20mg XR worked great in morning and 10mg IR for afternoon, we even had extra 10mg IR when we went to electrical night school, the script was written tablets on it.....

and like yah but wether doing 2.5mg zyprexa or 50mg seroquel, like shit we aint even do bipolar before, but its like rn in life nothing going on , I dont like again its too much stress to begin with having ADHD to want to go out like we tried, we got shamed here basically, like thats all im saying, the creator gonna weigh it all at end of day, like again just one mans fun is anothers misery right like everybody cant always win... cant always be up in life..... but you can use nature to your advantage which is what alchemy is, turning lead into gold...... in all ways, like what does shrooms but make the brain mallable to be smelted and remolded you see, like adhd meds does that, like if thats what we want & Im more miserable w.o it, like your an asshole for not giving me the cure here actually like its again just something we dont fuck with like that if you cant understand thee, like its all the ancients knew.............

like just again it aint fair so w.e , like cos if it was id have no reason to complain..... but we followed our heart, like thy paradox just be like all of it, like just again we tryna make it always the most purified stream like just idk we experienced death, how would you percieve reality, if you saw what I showed happened to you here again that is the real question, this is why we write, anybody with a heart would understand thee.......

right like durk has that song - need prescription, or experimental by chinx hes like if this feeling could last forever, like just all of it like its way more than this but its what hits me lol.... like cos then we do feel gifted.... but life is an experiment, they wanna again like fetty says technology moving too fast, in wake up, but the technology is in nature.... like we are the most advanced beings to begin with , honestly like its like this is the dumbest shit ever, like to me, its all a test, like your joking right, that youve made nature illegal, like it is war, its worth fighting over tho cos again like this is why people are dumb, like all the ancient wisdom say that returning to nature be key for some, like not everybody life is the same but we are the observer in this game.... like its the only way like that a wise person would know im right and not question the motive......... thats all.....

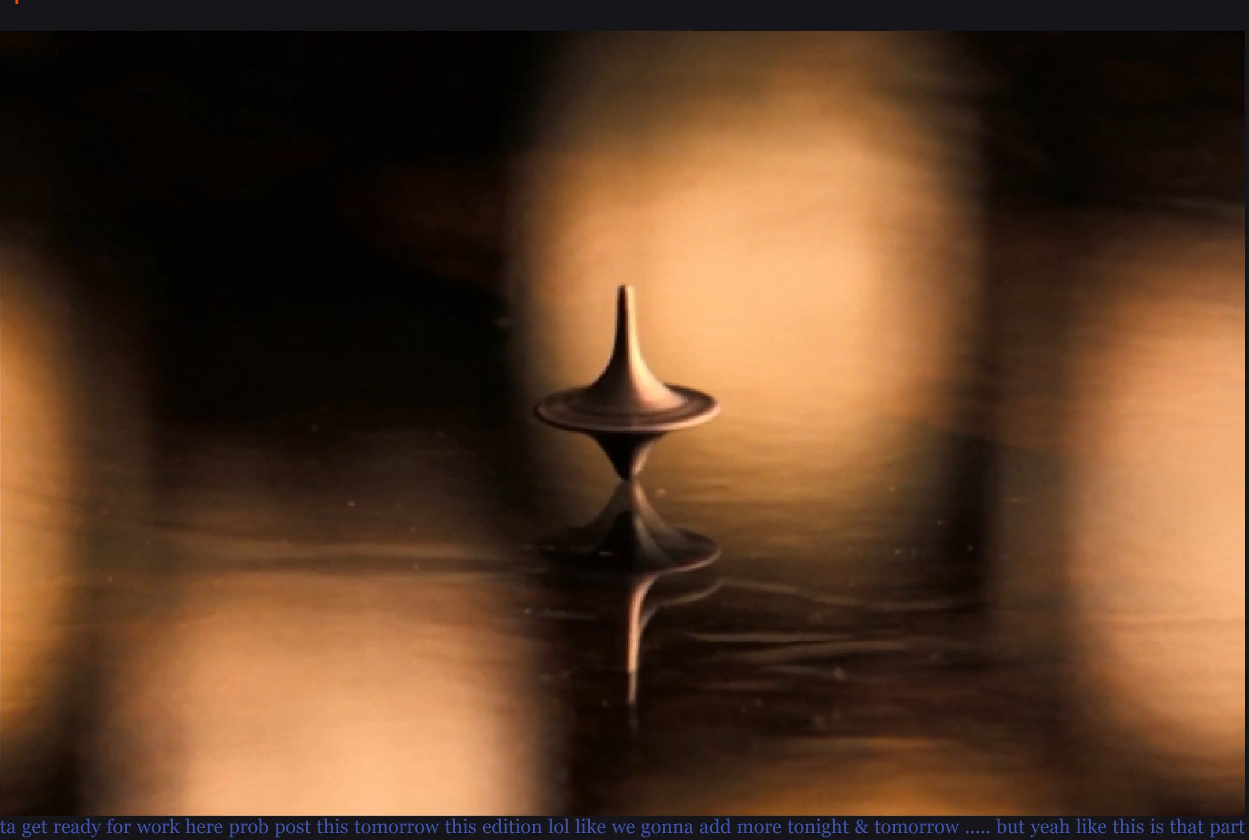
but yah if we could create like what like again its just true, we already acting out our lifes in script, thats why movies be a thing, like you know how many random ppl are actors these days, like just fredo always said that, these niggas actors ahaha im taxing ahahah , but yeah like just like cos anything can be if you think about it, like but its just fucked, like cos eating the flower of life doesnt change the corruption of the world here..... its changes your mind, but no1 elses..... like just it aint the same for everyone but this is thy path lol.... like or just again if we ever made music, like where do we wanna take it or go with it lol..... like just thoughts cos idk like we write books we know something.... always like its not questionable like just yah but if aint a single soul friendly like thats gonna be again cause and effect here.... be real like......................

Dark Magician

& then yah but on X again like jail cell the dark magician the yugioh card & that song by mac shuffling the yugioh like shit this experience be twisted ahahaha that was in angel dust song again we aint heard em all but like cos we are too wise like got our own story...... lol just mentioning it cos this is like the other durk song need prescription like you wont see it on the channel...... we dont again like idk sometimes it comes.... but this is all like from before in thy mind.....

ofc he is purple too like the duat, like codeine..... lol has a staff , casts spells like thoth.... lol and again this game had dragons tho like Exodia lol we played back in the day lol...... again why is that a mac song like ... pft like just we too wise in why we do what we do here but life needs to change

Inception



gotta get ready for work here prob post this tomorrow this edition lol like we gonna add more tonight & tomorrow ..... but yeah like this is that part of this story again the life aligns which is what the above shows like................ we make it right.................

right ya like at the same time like I said like just listening to any song be like that, it works for the moment but it always just like moves on but we got again decent tunes like we aint keep up with it here... like just when I feel good in life, like we really been in ADHD paralysis so bad lately like ....

I mean he even says that in that song, turned a basic bitch into candy ahahah like just been it all , like the sour hour mixtape by mac like pft lol , we aint hear that till like we looked I guess lol its again the best day ever shit like shit that is like again, just dont know, like ahaha about it all, like again I said mckenna speech on alchemy mentions plankton ..... all of it the squid.... like just yah life aint work out here recently tbh like we dont feel good & noone cares.... they think this is the way when its not how the game actually works.... like death again like life sucks already , like turning a shitty day into ok I got this, is lead into gold like alchemy, just cos we are right on the fundamental of how nature works on the nervous system like its taken advantage here but yet yah nothing be free here I can only tell thee of thy experience cos it contradicts anyways like in all ways, but if something was we wouldnt have time to ponder here......

just noticed that need prescription video ahahah the channel be matrix music ahahahah like just random af, but chances.... lol.... cos of all this like pft ...

but yah another song we always liked this song....confuse me blac youngsta ft yfn lucci, hes like put holes in your baby blanket ahahah but again idk we got legit a ton of songs like ....

need yfn to drop and fetty to drop like some actual good music and then we be motivated like something about this all like I said we can change the game here lol .... in a way right anything be possible, like ..... the game is at a pause lol..... just like cos all things, lol but yah idk its the thing bout experience who but me would vibe to it all at times.... lol

like why would tho again I listen to you when I can do it myself, like pft lol we the dark magician here....... like just yeah it do be real like anything be possible in a way..... like the world has like again this be like the worst situation ever and we still write likee .... this life aint been fun at all lately, like suffering for no other reason than someone not sharing, like we know the truth, thats why we cant forgive here, like again just the truth hurts I guess you aint wanna hear about it, like that the truth will kill you legit like in all ways, lmao like being so aware in this game be a curse........... like how can I be afraid of dieing if we experienced it basically like..... always said that again, like yeah but life can go anyway, like but meds help huge....adhd like this sucks, their is no other answer to it all, like its how the brain works....... or how the game works, like you eat something that changes thee thoughts, that be magic tho ..... so this aint like so dumb , life is short enough like and aint nothing been.......

Island Life

really like in all honesty like I said before here, just wanna live on Santorini even if its not for ever, like .... a vacation aint enough time, we wanna wake up their and look at the ocean and smoke our weed or w.e like lol like it seems so peaceful to live on an island, why north sentinel again interesting angles here..... like that would be like living like a king, even again w.e it is like shit their be mad interesting places on the Earth...... or history right like just to be in my room all the time, like lol that is the real dream like just cause we know, like energy be linked their to history......

or like have a boat like driving a car, prob wouldnt be motion sick if im the captain ahaha like never know..... but that is the real dream in a way like would be super cool, seems so peaceful lol, their prob are better tropical places but again just the history, lol like I wish thee dreams would come true tho ahaha like wtf, it is possible is the thing but time be like running out here.....

see the dolphins this would be heavenly lol ..... like really would be.... it aint even again like that hard to do if only I did something I loved and made money lol....... like the thing is really.... tons of ppl have money..... but like I said..... you cant buy love........ so thats how we play, like we worth that in our mind lol cause of it all in totality.... lol , like that something like this again it aint and it is possible one way or another, like dont need to be dumb rich to get this tho.... but need something lol........ just the idea of it, like pft gotta get ready for work here tho...............

I guess tho yah idk like this sunset tho was from Santorini and its how we made our video like in a way it showed it perfect
you can see thoth in the top middle of the cloud........ like pft lol..... but yah this is legit what the sky basically looked like when I flew out my body no jokes and like it went from this color to normal sunny day when my eye saw the shadow is the truth here like when I fled back to my body flying like this happened and idk like it all makes sense cos the entity has power over everything like could hypnotize the eye so that again why wouldnt we talk about this, could show it better than I have here

the island just to me looks peaceful, like again dont know how realistic this is, like we just want our thc and meds maybe and shrooms we be good here lol like I dont want alcohol her the poison but yeah its stupid is what im saying but honestly like we seen tons of pics from this island like it looks so peaceful lol like I like the shores like how they are like rocky cause atlantis exploded the volcano like it is a volcano lol. live on top of one, yolo lol.... seriously tho we would do anything for this to be, like just again it aint even like its possible like anything I guess.....

would be cooler to be richer and have multiple homes in a way lol.... like visit where you want and this be where I go alot like really lol.... but yeah like idk it depends where the soul wants to take life I guess, but yah like living on the ocean side, must be heavenly tho really like we experienced close to it before......

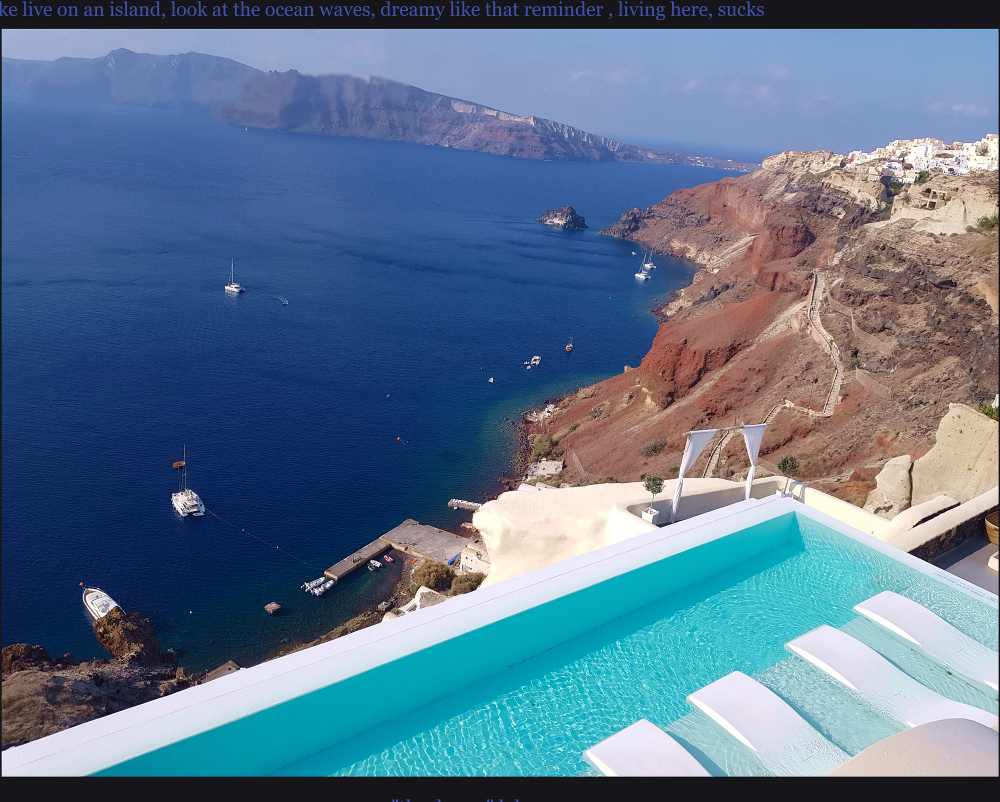
like again to even write, make music, or play a video game here looking out at the ocean is what I am saying, you know how stressed we be, well we wouldnt if just we had more money or did something we liked here.... like we can go any plane this is my #1 pick like I said gotta experience it and then see where it takes me...... ancientxthoth on atlantis..... lol

if we dont live on an island in general, we will of not fulfilled thy fate here.... like its thy goal lol.... just cause it be so peaceful like my get a away here like my room except my room becomes the island lol, I wonder again what ppl think their or the stories, lol......... I mean the hotel on the island is called "Atlantis" lol........

to me again its like that woman who hit her head and then like lived in Egypt, like we saw the entity, and now we wanna go here thy calling lol .....

Just yeah theirs like this is the top paradox to it all, like to be this entity and live their, thy dream ahahah like the person who saw the shadow comes home lol..... like life sucks so much all this dreaming does is let me down............... really tho like =(it aint that far fetched, like it aint like this situation didnt happen to me.......... all of it like pft...............

its the most interesting to me .... like to actually do it or for it to be, would be awesome.... I can only dream rn like nobody wants this, but thee like lol cause my pov be dope, like live on an island, look at the ocean waves, dreamy like that reminder , living here, sucks



"the dream" lol

Ain't feeling good atm

it sucks having no one to talk too like kinda why we do write here.... but yeah so this is the thing going on rn ..... like that a month ago this happened to me also like that my allergies right I woke up couldnt stop blowing thy nose and thy emotions at same time but like so we took claritin today and that like again it didnt do shit, same thing a month ago when I allegra, like the opposite effect, didnt do shit, like im sneezing in the aisle blowing my nose 100 times here..... like so I just left today at like 545..... like pft we tried to see if it would go away at break, we even took motrin like at 5 say right like I feel like shit tho ....

last time I made it through but this shit my head be killing me rn.....

I aint got them thca vapes like so we drove to the vapeshop here lol got some gummies idk kinda sketch compared to the last one I bought, like online it dont show the actual dosage, like its so stupid like how they sell this legally but not the safer thc ..... like may be same thing, but dispensaries dont add odd cannabinoids to it, like so reality be dumb af said that day 1 here tho........ they were cheaper for 30 gummies.... than the others but who knows how it will make me feel we ate 1, like we will see, like im prob gonna take seroquel later and get some good sleep , my head hurts...........

I just feel like we gotta continue this book and like yeah right we got X back, lol cant believe it cos it even said when I was suspended that like im not allowed to make another act that it will be banned if so and then yeah........... but yeah like honest we got 38.4k tweets, chances theirs 48 again here backwards lol....???? like yeah I wanna post this book cos it sums it up even more.... like the numbers all that... but I wanna add more, we will see how I feel here

I always hate like calling out or going home, feels like pft what a wimp, but my head kills sometimes just life takes it route here....... but yeah like idk how to view reality atm with all this tbh, cos like just I aint know, like the thing is love is between 2 ppl like been in love before, thats how it works just it is like the entity, lol........... but yeah we been real and told our story here, we are again as if too nice to even put it out their....... maybe nobody cares, but this is thee life

but I guess this is what im saying about the red pill blue pill scene atm..... cos of what iv wrote here........ like that again we dont even know like if that dude is actually leaving aint ask but iv wrote here lol, like idk I told you the time again like when that girl came tho just in the algorithms we had that shit like but anyone can pay attention to it also be the paradox, but that chinx song tunnel vision, like cos he left that day early, but yeah so last time this happened like with the allergies like just I told him gotta take lunch early right like and he aint been here and this happens again tho.... like just idk what iv been through is just fucking dumb..... like its the only reason life has fucked us other humans over way too much here in totality like with all this, when we are the one the entity came too......

cause he left early that day you see & chinx in that song like the tablets lanes, hes like , when they think they figure me out thats when my lane switches..... and he left early ahahah like yah and legit just idk everything

like the dude I worked with tho thats 8 yrs younger than me or so right like I said he took the promotion, like you can get it diff ways I guess but bcos of it you see like he gotta move to a store, and just my mind cant take that, bcos working in the villages be chill in a way like we like when its busy but yeah like thy adhd for real, ahahha like yeah but he was my friend like he kept saying sweeeet lol im like do you say that in games tho, but its again when I hit up the algorithms with like trippy and trigger finger, the day after he dropped a glass bottle lmao like I dropped something too but yah cos he says in it, aint nothing sweet but the codeine nigga, ahahah and I searched sweet in my music library and yah like pft we done killed ppls with our funniness if it was seen like thats the thing about consciousness and alchemy barriers here........................ like just all of it, their was a song playing at my store said sweet, im like dude listen its your jam ahahah but yeah like just like this is why we aint wanna move up rn in all truth, again just ppl at thy store moved up & back down also so its like yeah idk but it sucks cos if nothing else actually is here.... like Ill never make it working here, like pft just my mind cos the bipolar and life like that changed shit, why we losten our jobs and its like they dont care, so I dont like play the game how it played me here, but we still try like but we always burnt out, and again we aint even like if I could freely smoke weed after my job and never worry prob never do but still to apply for jobs all that, fucking scam tho..........

and again in trippy lil wayne like he says the ground moving like all that, well thats this vision here like just the matrix itself or when you sit their when I was on shrooms or just now like my mind, the walls moving ahahah =(

just yeah idk..... to all of it..... you have no idea what we have messed with here........... just idk we like music like I said...... like just it doesnt make sense cos nobody actually cares, their aint no love...... like yeah idk just again we have fun with it, live ya life how you want but this is what we do here ahahah

see even yfn lucci & rich homie quan got that song - live that life - and I like it it flows... .we heard it awhile ago

we got music for days really in a way like time put into the blackhole here.....

Just we dont know like what is up like how does this happen to me & like just idk its hard to read but we play like if its found like anyways in totality like I said here shit been going on, they wanna fk with me and not help, like we got our flow dont think you know more, you aint, like have you experienced death or the entity.......

like you aint know how much again just still, life is hanging by a thread, just cause of everything...... like when I started this job again I had to quit zyprexas the drs would of told me here oh you need it like fuck you legit tho like just to increase it that much is evil af, like they dont ever pay attention or give a fk and thats whats again like you gotta have a say here, 1st of all like medicine is shrooms like thoth wrote about it, built a pyramid, who you gonna trust lol

we aint eat since before work like ..... we felt fine in a way before but this headache legit lol it was in my last book, it just happens.......why again all of this stupid af, we be real af & you be fake af all of you, like thats what I think, like unless you wanna use nature and see thee magic like your lame ....

Everytime tho again I dont know what to do here like in all of everything lmao like just I publish it & continue..... like we aint got no1 to talk too dont really want others in that way cos of how fking dumb this be for me .... like this is thee story tho, like again diary, experience contradicts........ if only we be trusted lol............

this is all weve done on X for months and years ahahah like more at times cause its like again cant game really, like my room gets warm, like I cant focus either when my life sucks here............ like just the thing is we compiled our data and this is why we have videos, like might of took a day, but too have all this again we could walk away from it all like but its worth something to thee, like again just idk lol like just even if it was known it barely is, like all of it being the

shadow & that right, like we did show it & nobody else has is the truth......... why, cause they werent shown it like me, thy choosen one like polo g right aha like just again like the algorithms took me here and Iv never felt worse about my life.......

My Eyes Have Seen You

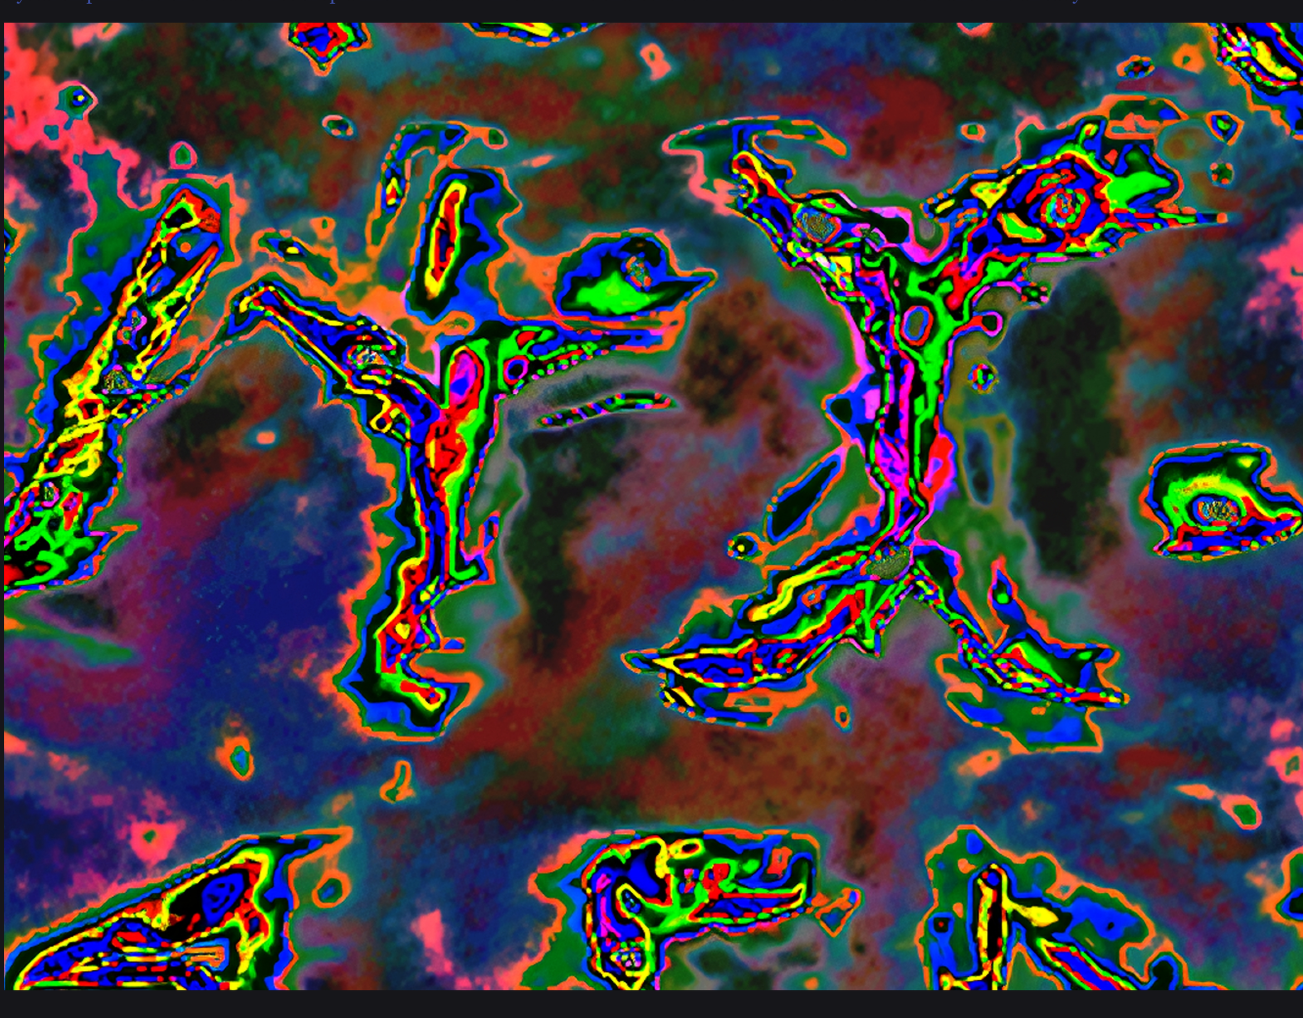
the doors, like again best song ever cos of this but its written like that he was sitting on a roof and saw a woman naked through the window ahahah like that is whats funny, and yah idk told you why we found it, my sis & her bf went to jim morrisons grave, I had backup pics on my pc cos my old external harddrive which we got back in 2018 but that or like future right that song we lost that harddrive.... all of my childhood was on it in a way..... but we found him last years...... and just it is the parallel between how like he exposed himself like we do that but who doesnt these days and we do it in a different manner like my point isnt to show you anything but the designs like ..... theirs an entity their, a dragon, like just light is like that in everyway it always forms a pattern

back to even like thinking jupiter at one point like cos we looked at the clouds from the images like hmm nah theirs a design im like what if it was a super advanced civilization which like they shield their planet like a dyson sphere and that what you see from outside is just an illusion like but that is what we are in here, like a super advanced computer simulation, really life dont make sense, its just like , we be thoth , follow thee heart what we do like what we try to do here.....

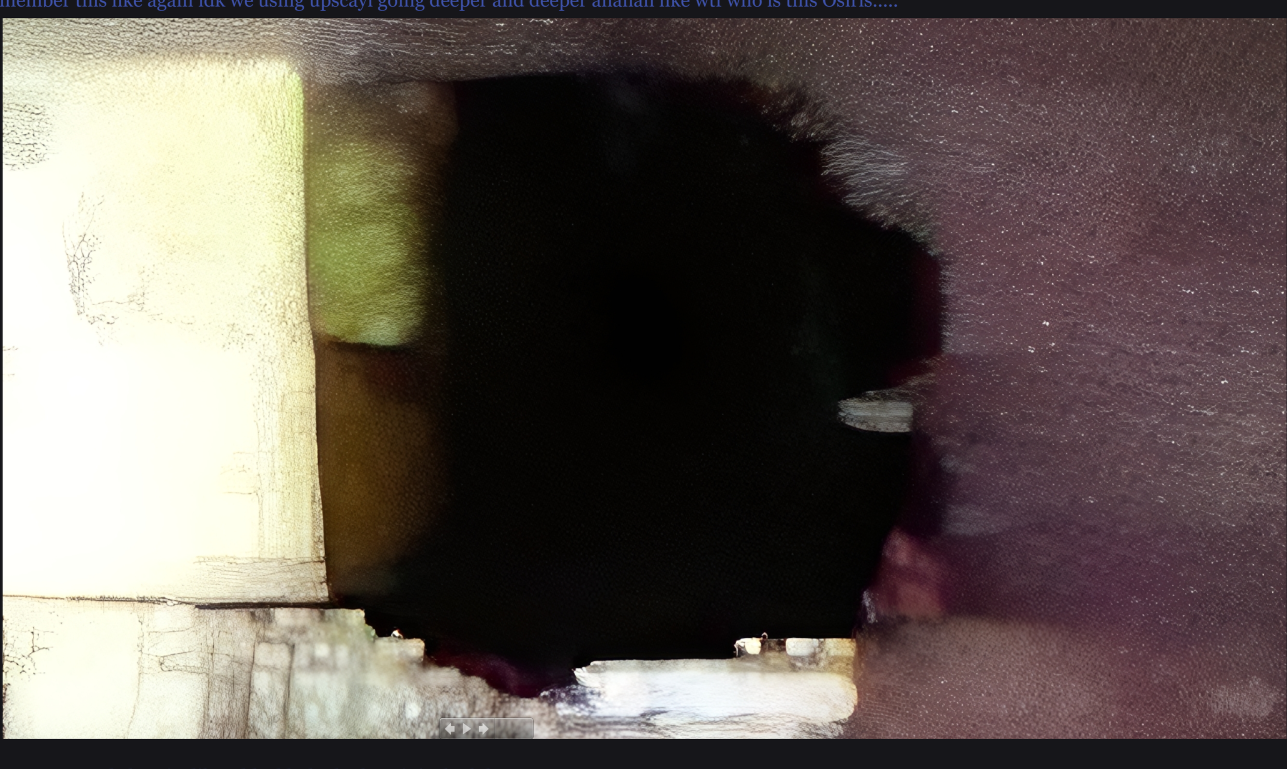
all of it tho really like we can just see the truth.... solved it, pft legit tho like .... aint ever have a friend like me here......

Lets see if we can find something else and maybe just share it again key moments of thee life, ahaha like this is what my eyes seen so I show thee....

but yah cos we made this and then again found this music, also a total paradox the future like their is no difference all their be is now lol.... but yah like the crystal ship like did the creator not drop a line here.......... like....idk we shared alot on our YT vids about our art and this already



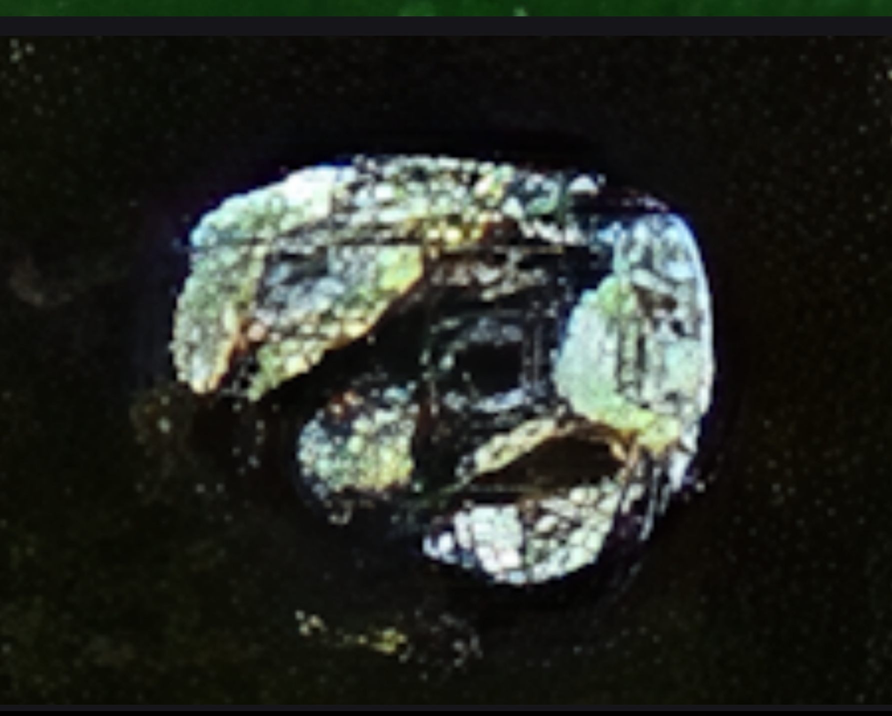
lol member this like again idk we using upscayl going deeper and deeper ahahah like wtf who is this Osiris.....



then you go mad close its like a blackhole tho how it is tho lol

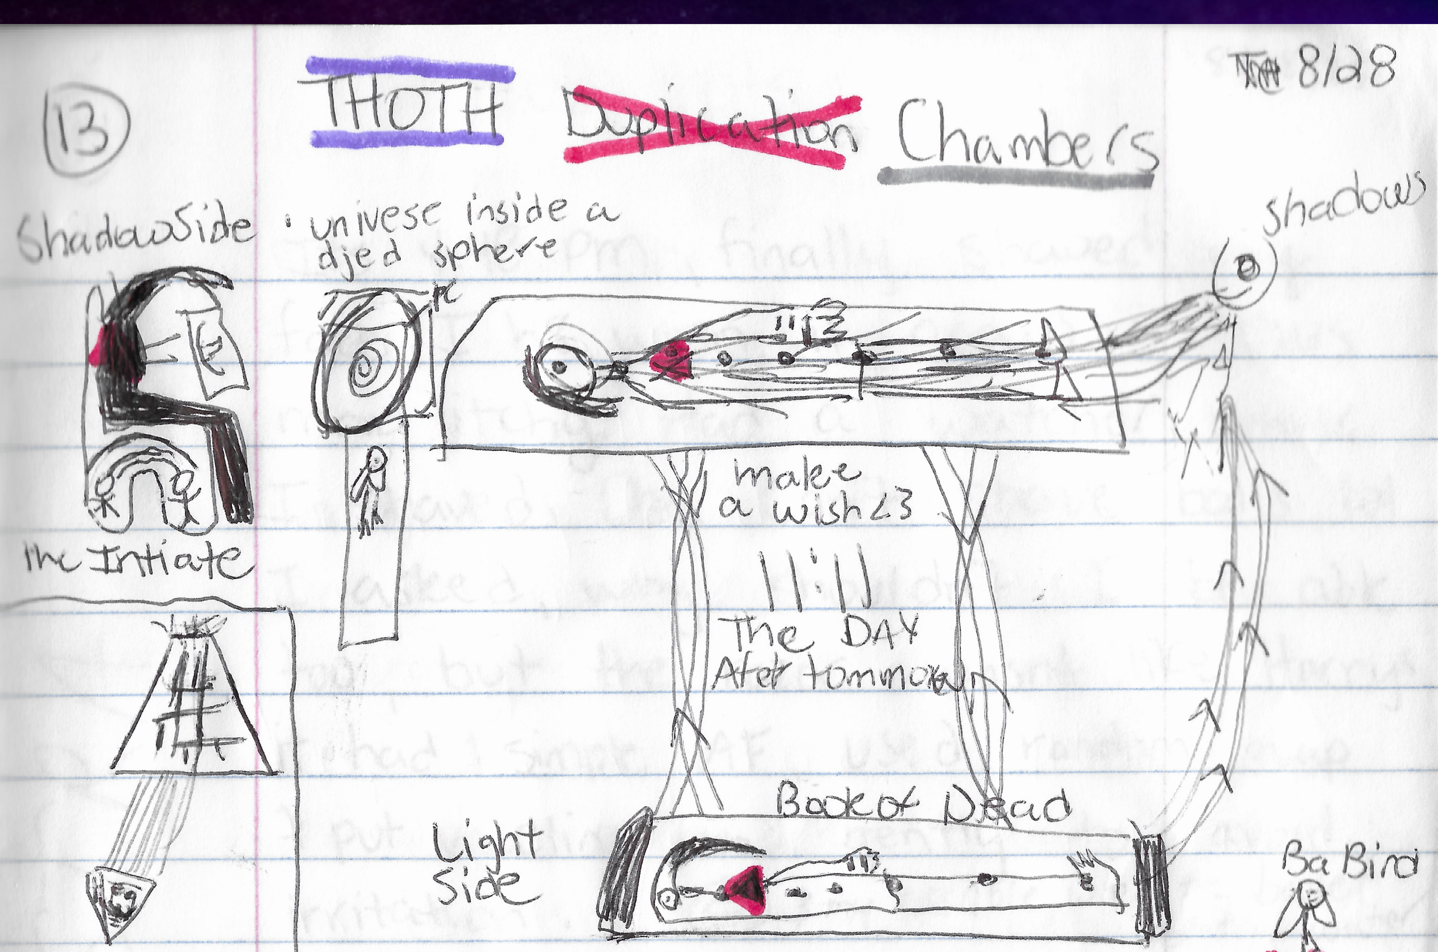
the fucked up part about it all, again if something is generated randomly here through algorithms, that means it aint random at all like the creator designed every last piece of data in the game like .... a total paradox tho like pft just AI, like we all our AI bots for the creator running on his script is the actual truth......... only way to view such an advanced game

like just it how it posssible the emerald spaceship like thats again like we saw a cloud like this is the truth like chances.... thats what I mean lol



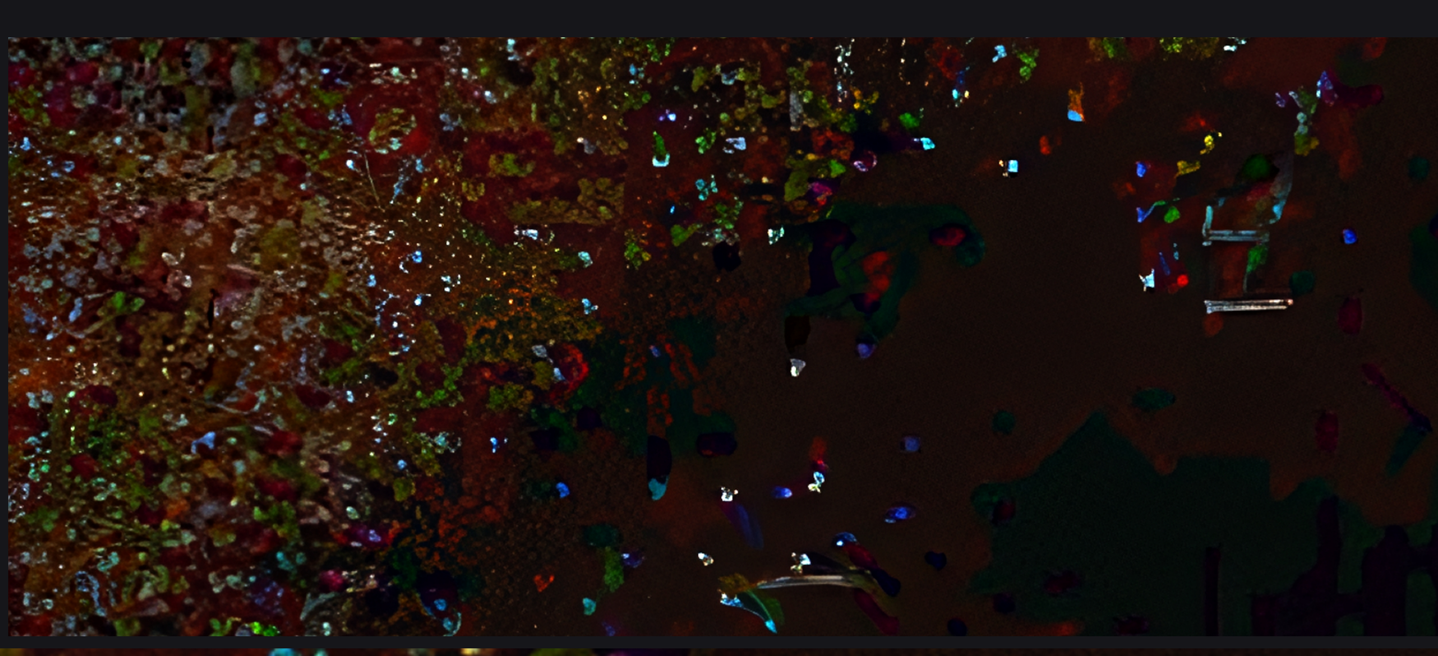
we got like like 4k screenshots in 2025-06 folder its when we looked but to me its ideas anything its super cool af
see the face in the mirror center staring back..... like what these are screenshots my original images were up to 500-1.2gb like lol... just super cool

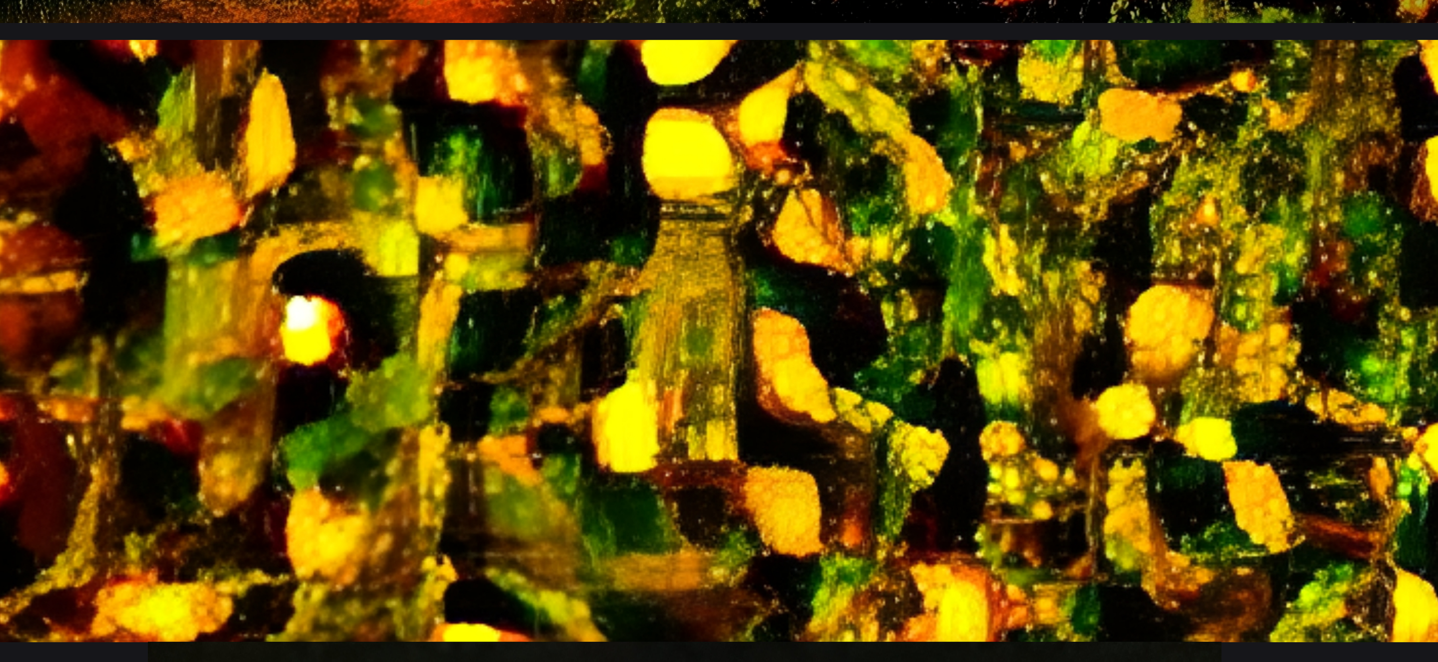
like see even Goofy remember like we got mad shit here



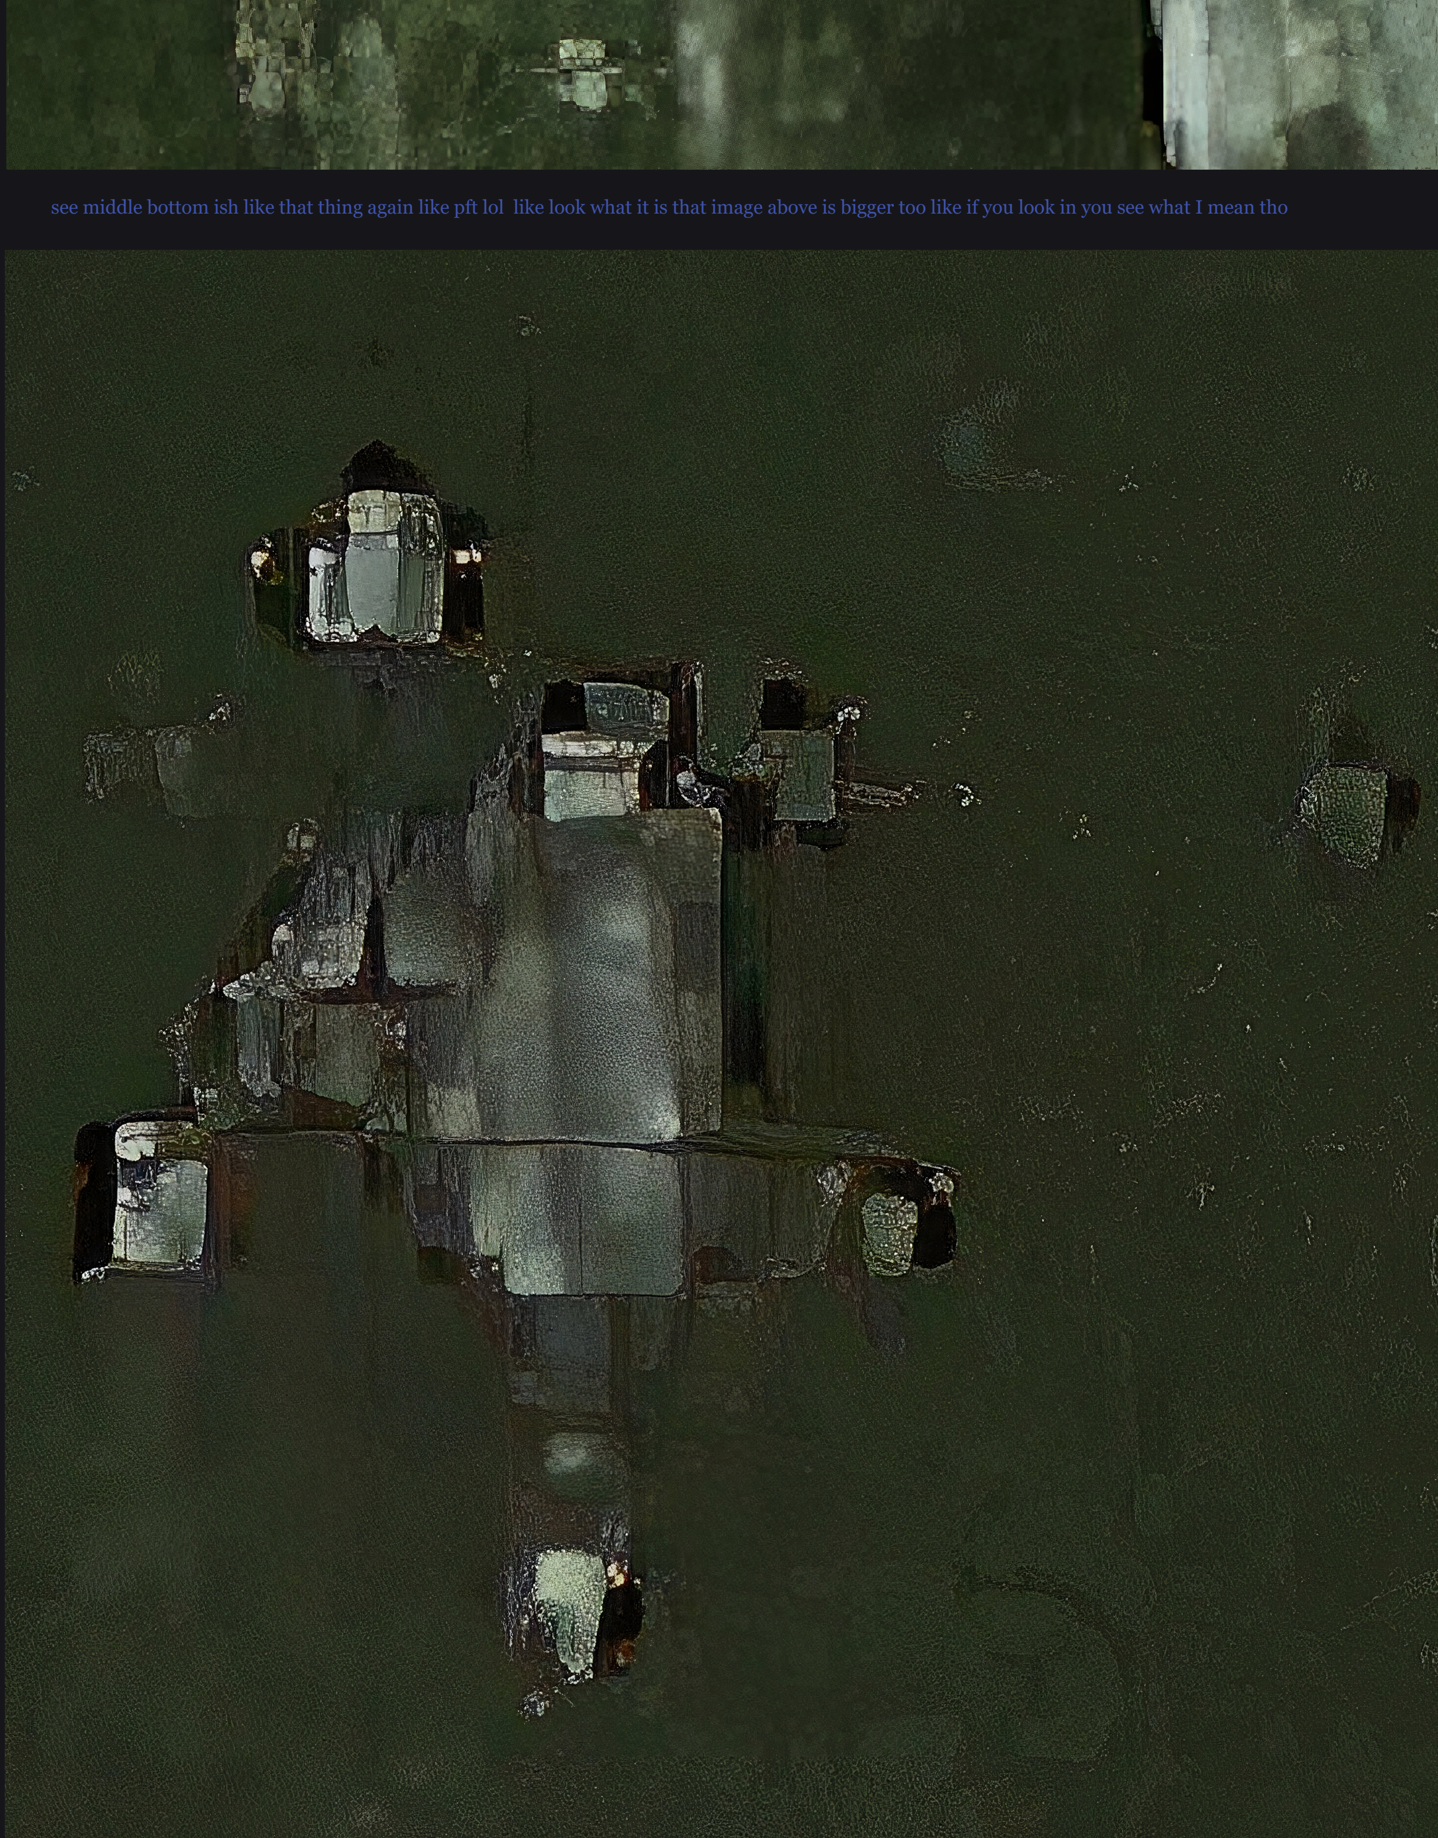
the entity inside thee this is a real picture like prob reddit ahahah like thought it was like awesome lol

a persons shadow always exists....



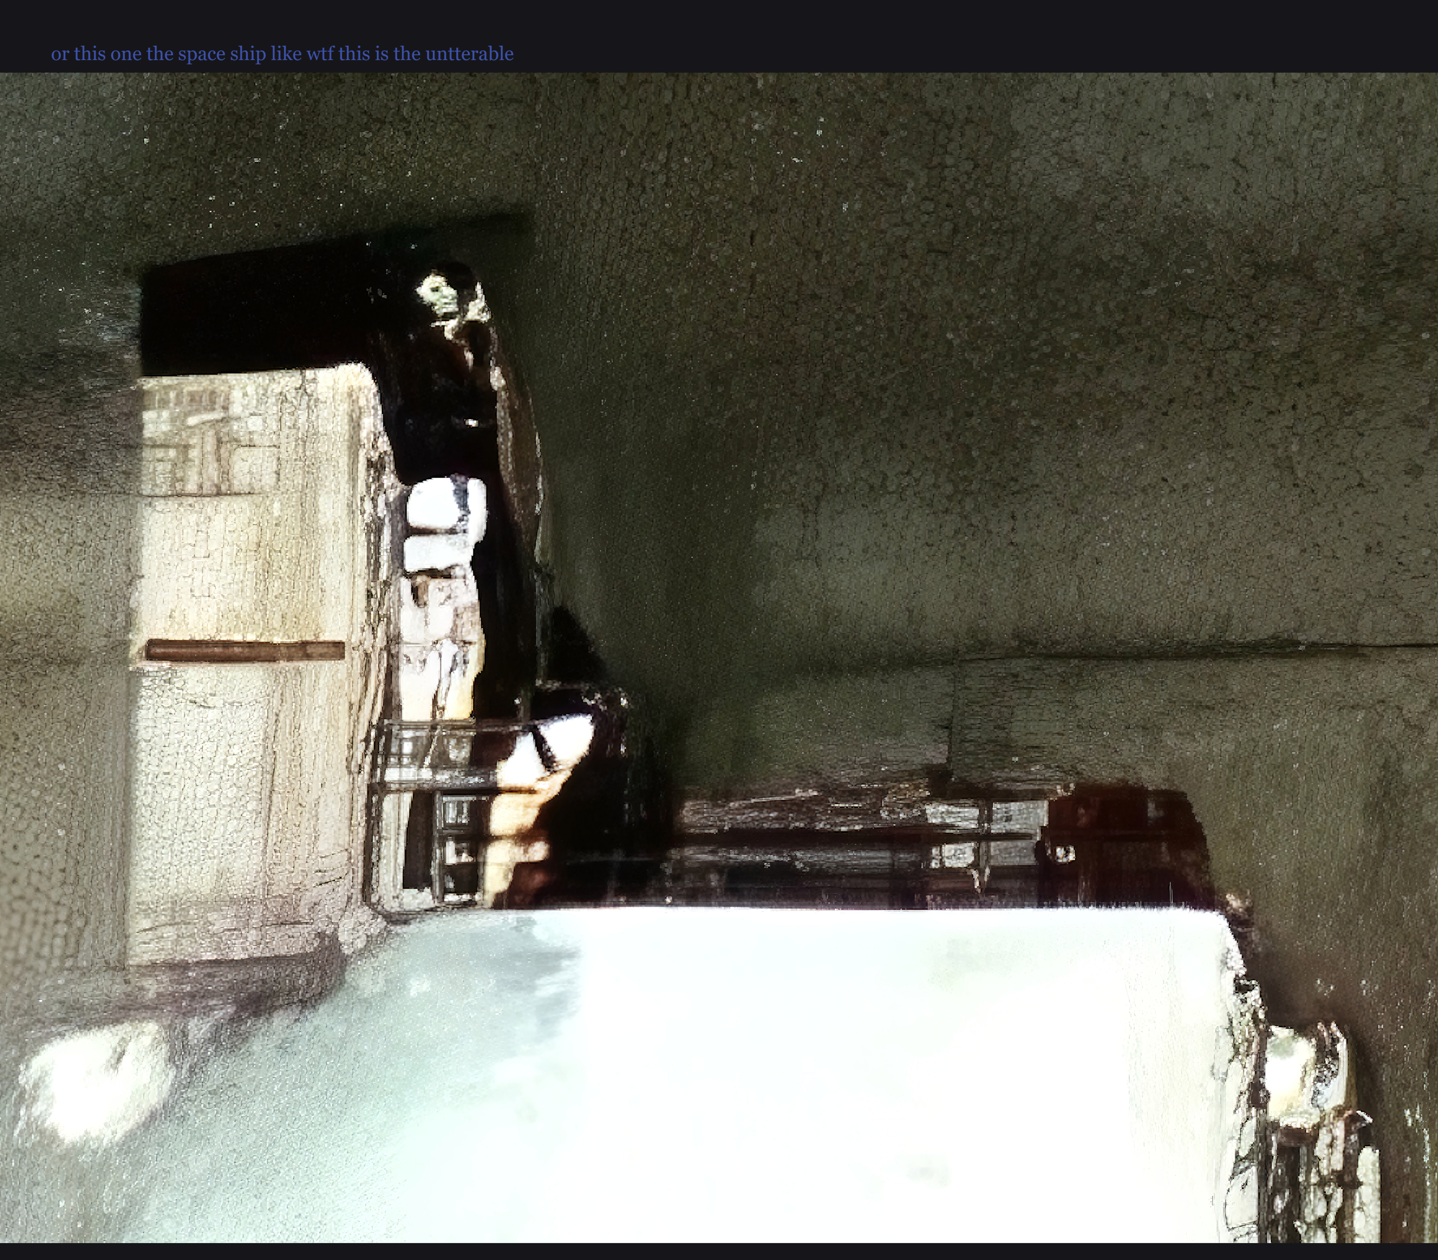


see middle bottom ish like that thing again like pft lol like look what it is that image above is bigger too like if you look in you see what I mean tho



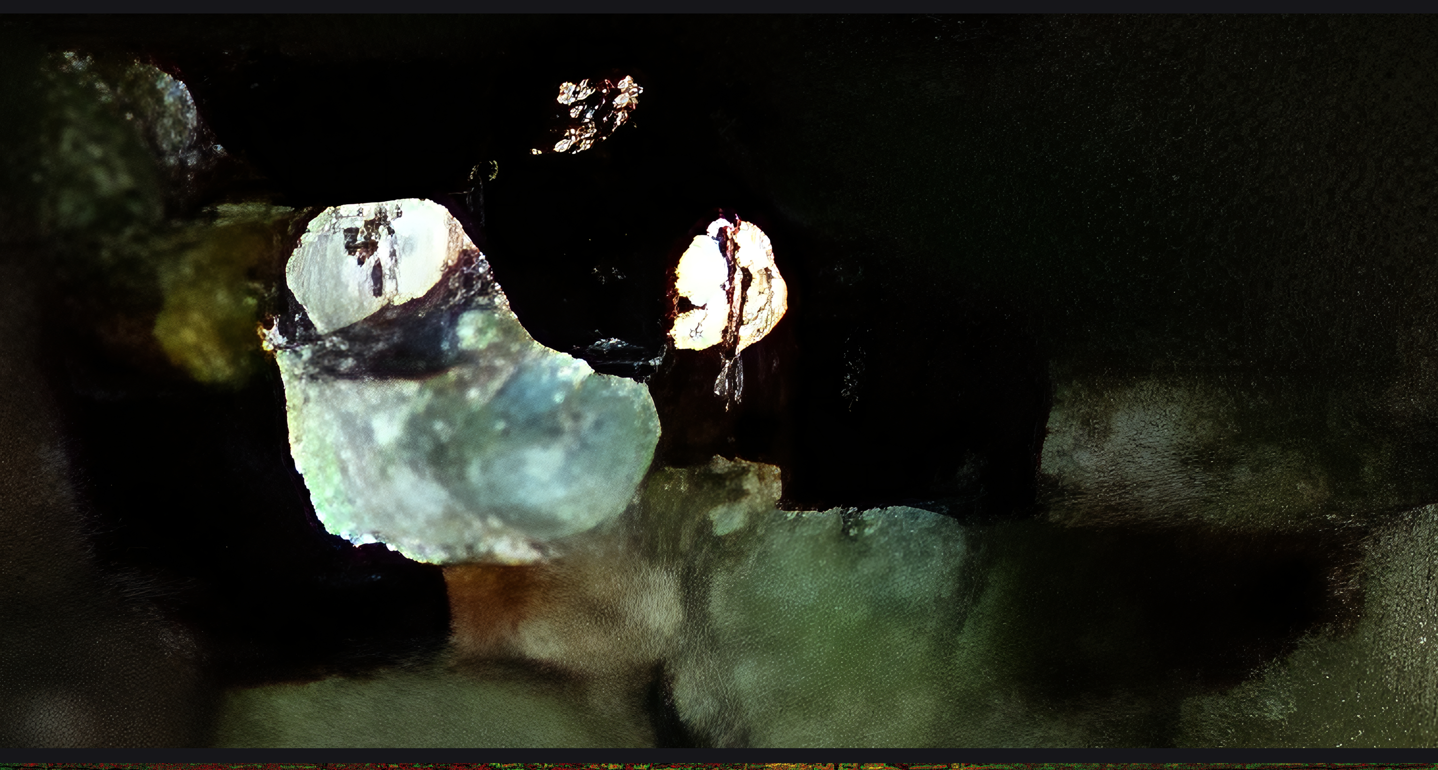
mad cool lol

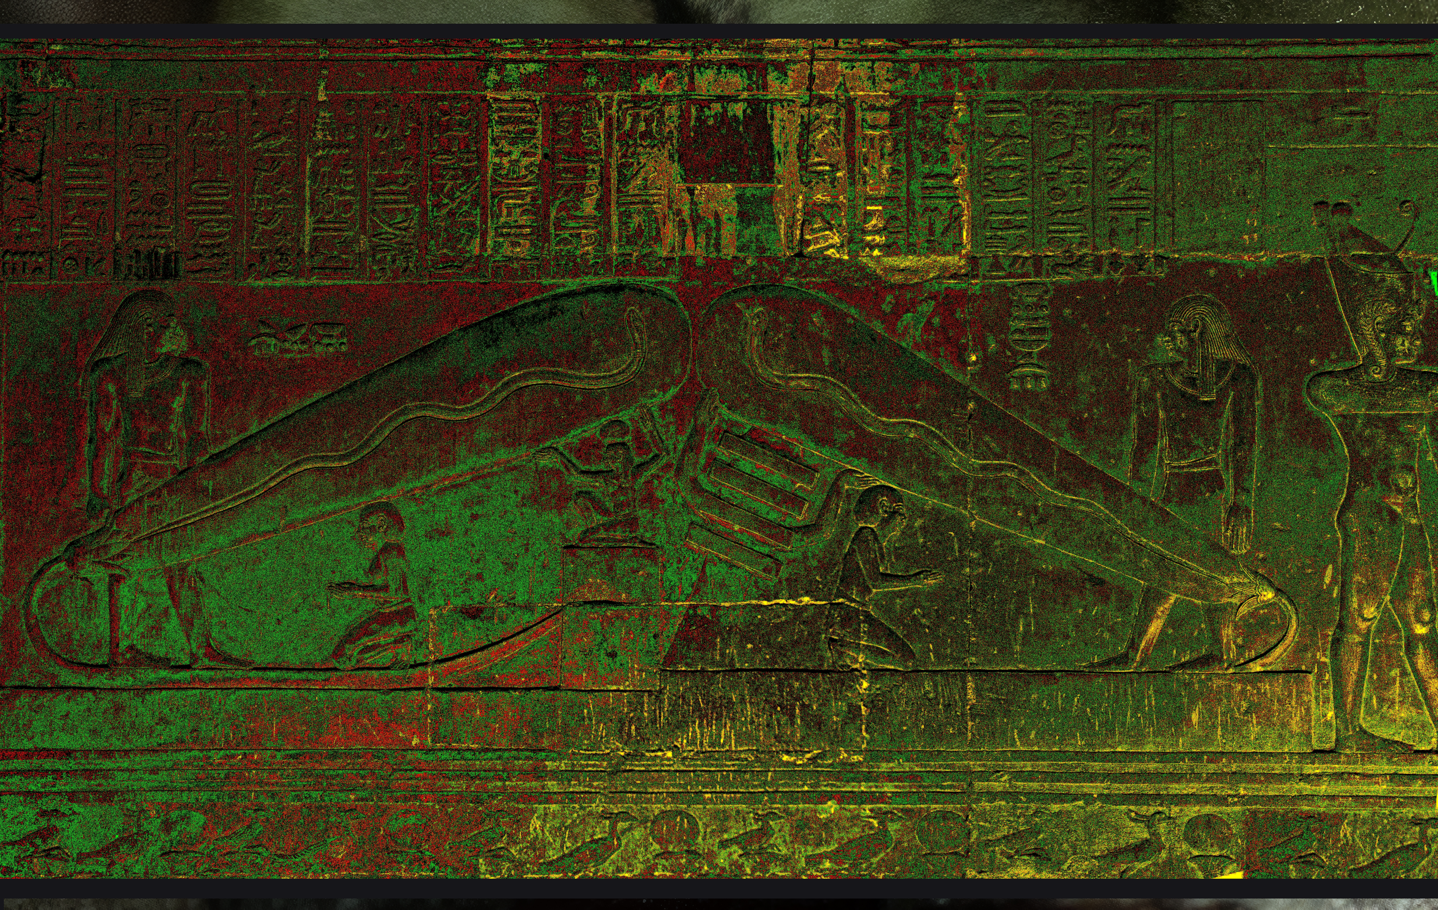
or this one the space ship like wtf this is the untterable



the eye here

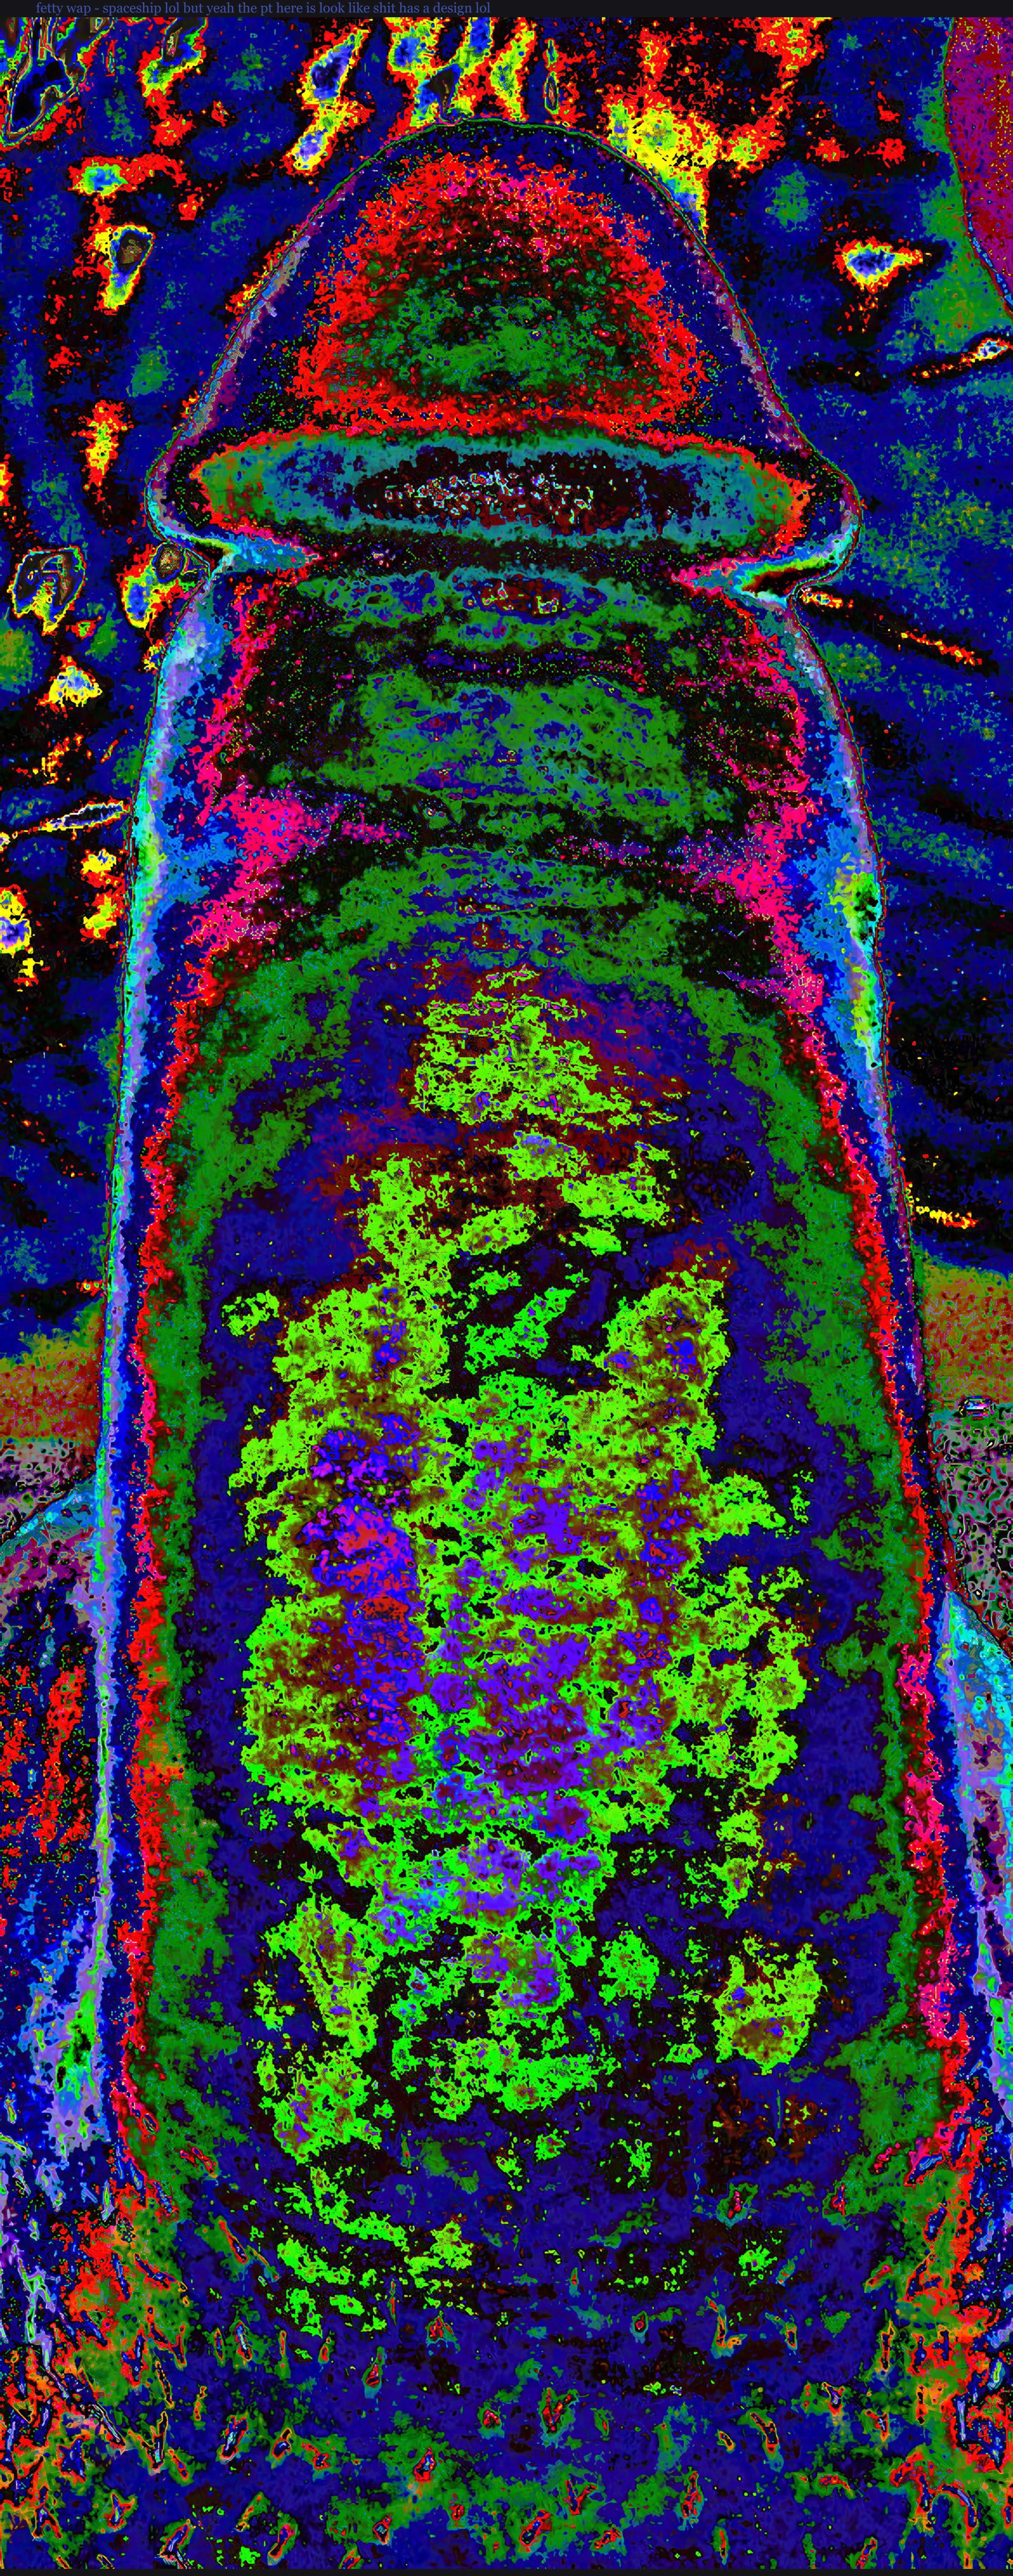
the miner

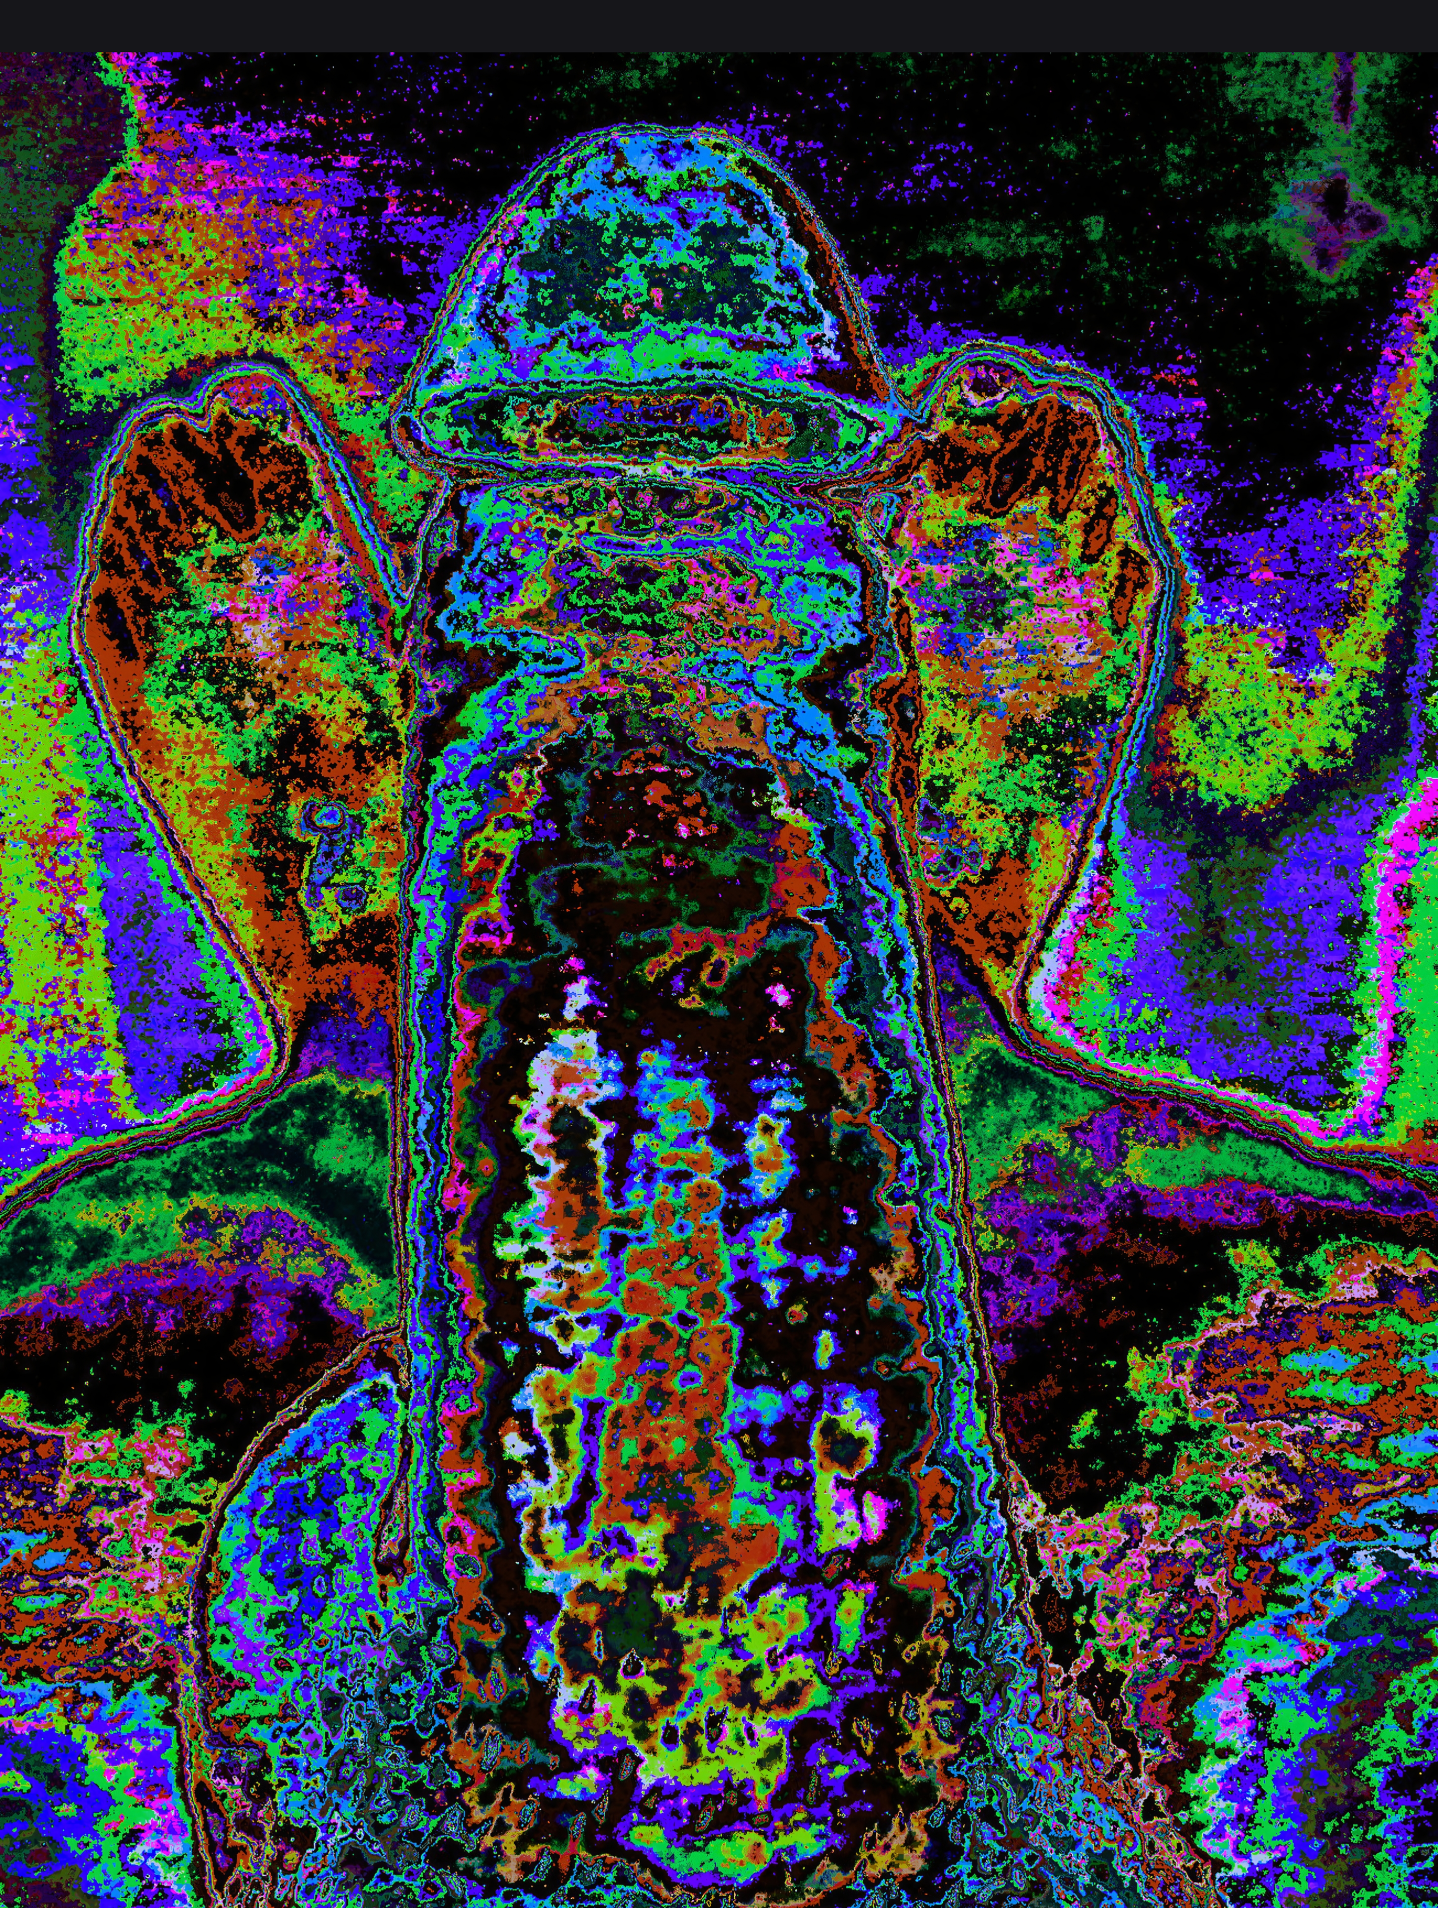


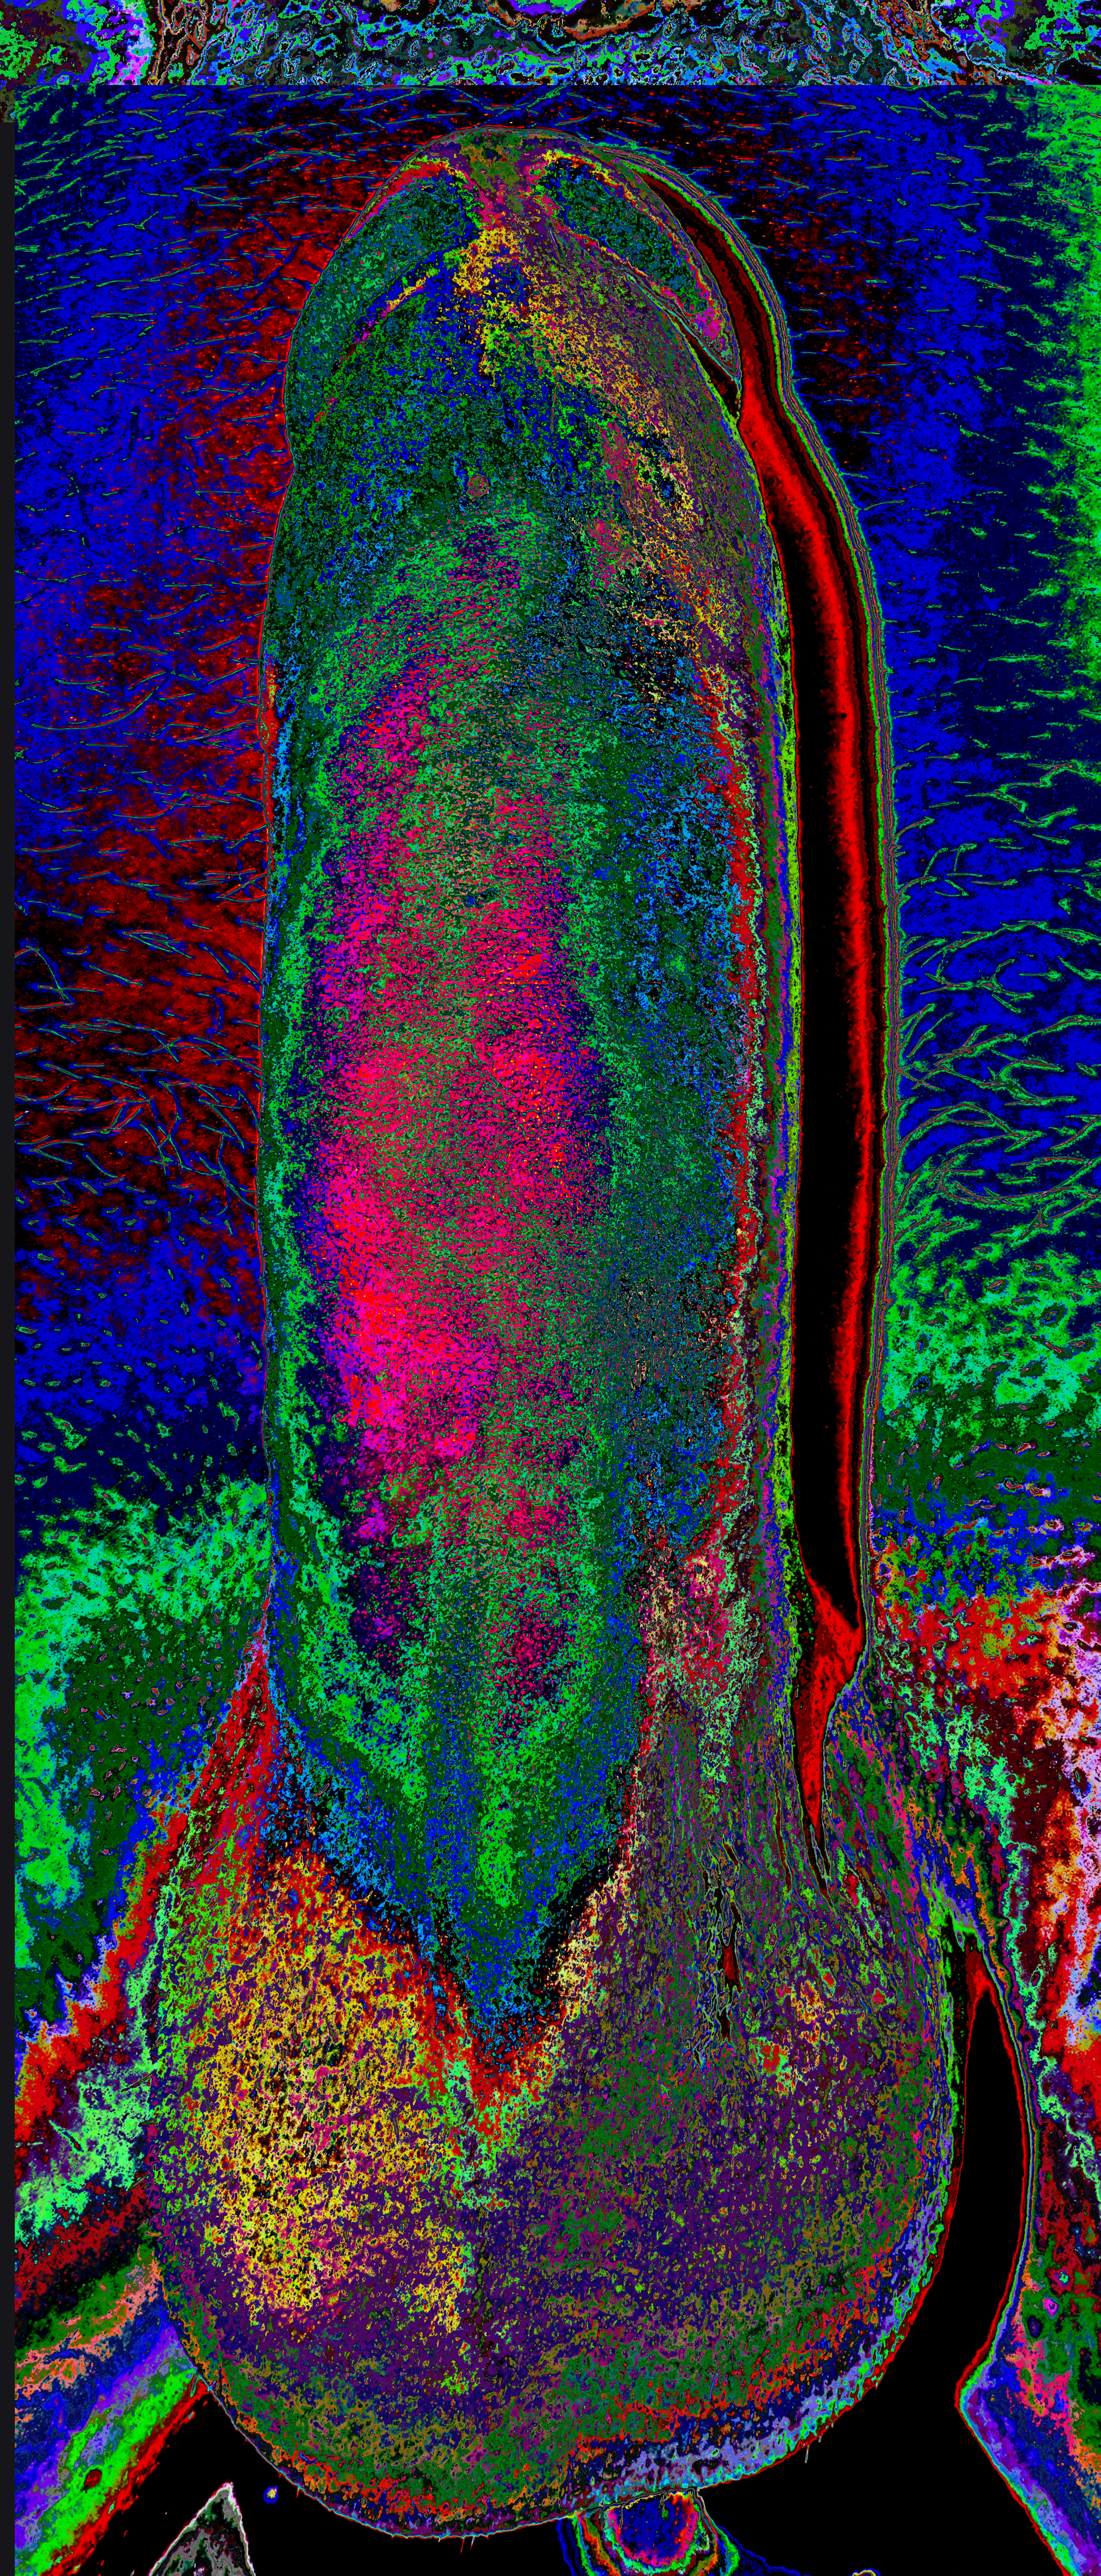


The Most Wise

fetty wap - spaceship lol but yeah the pt here is look like shit has a design lol



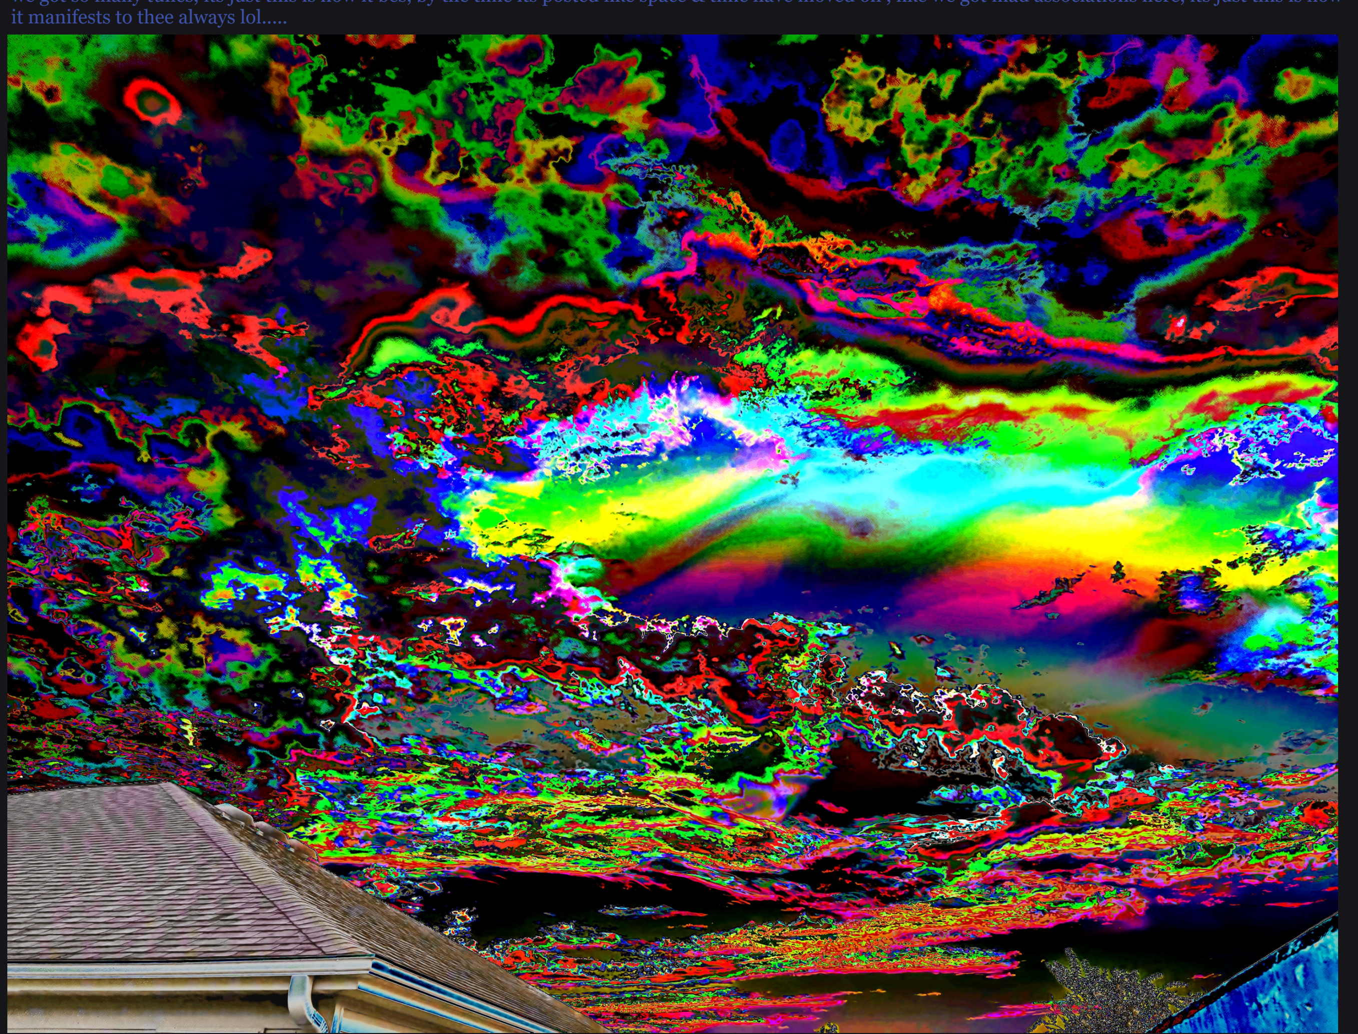


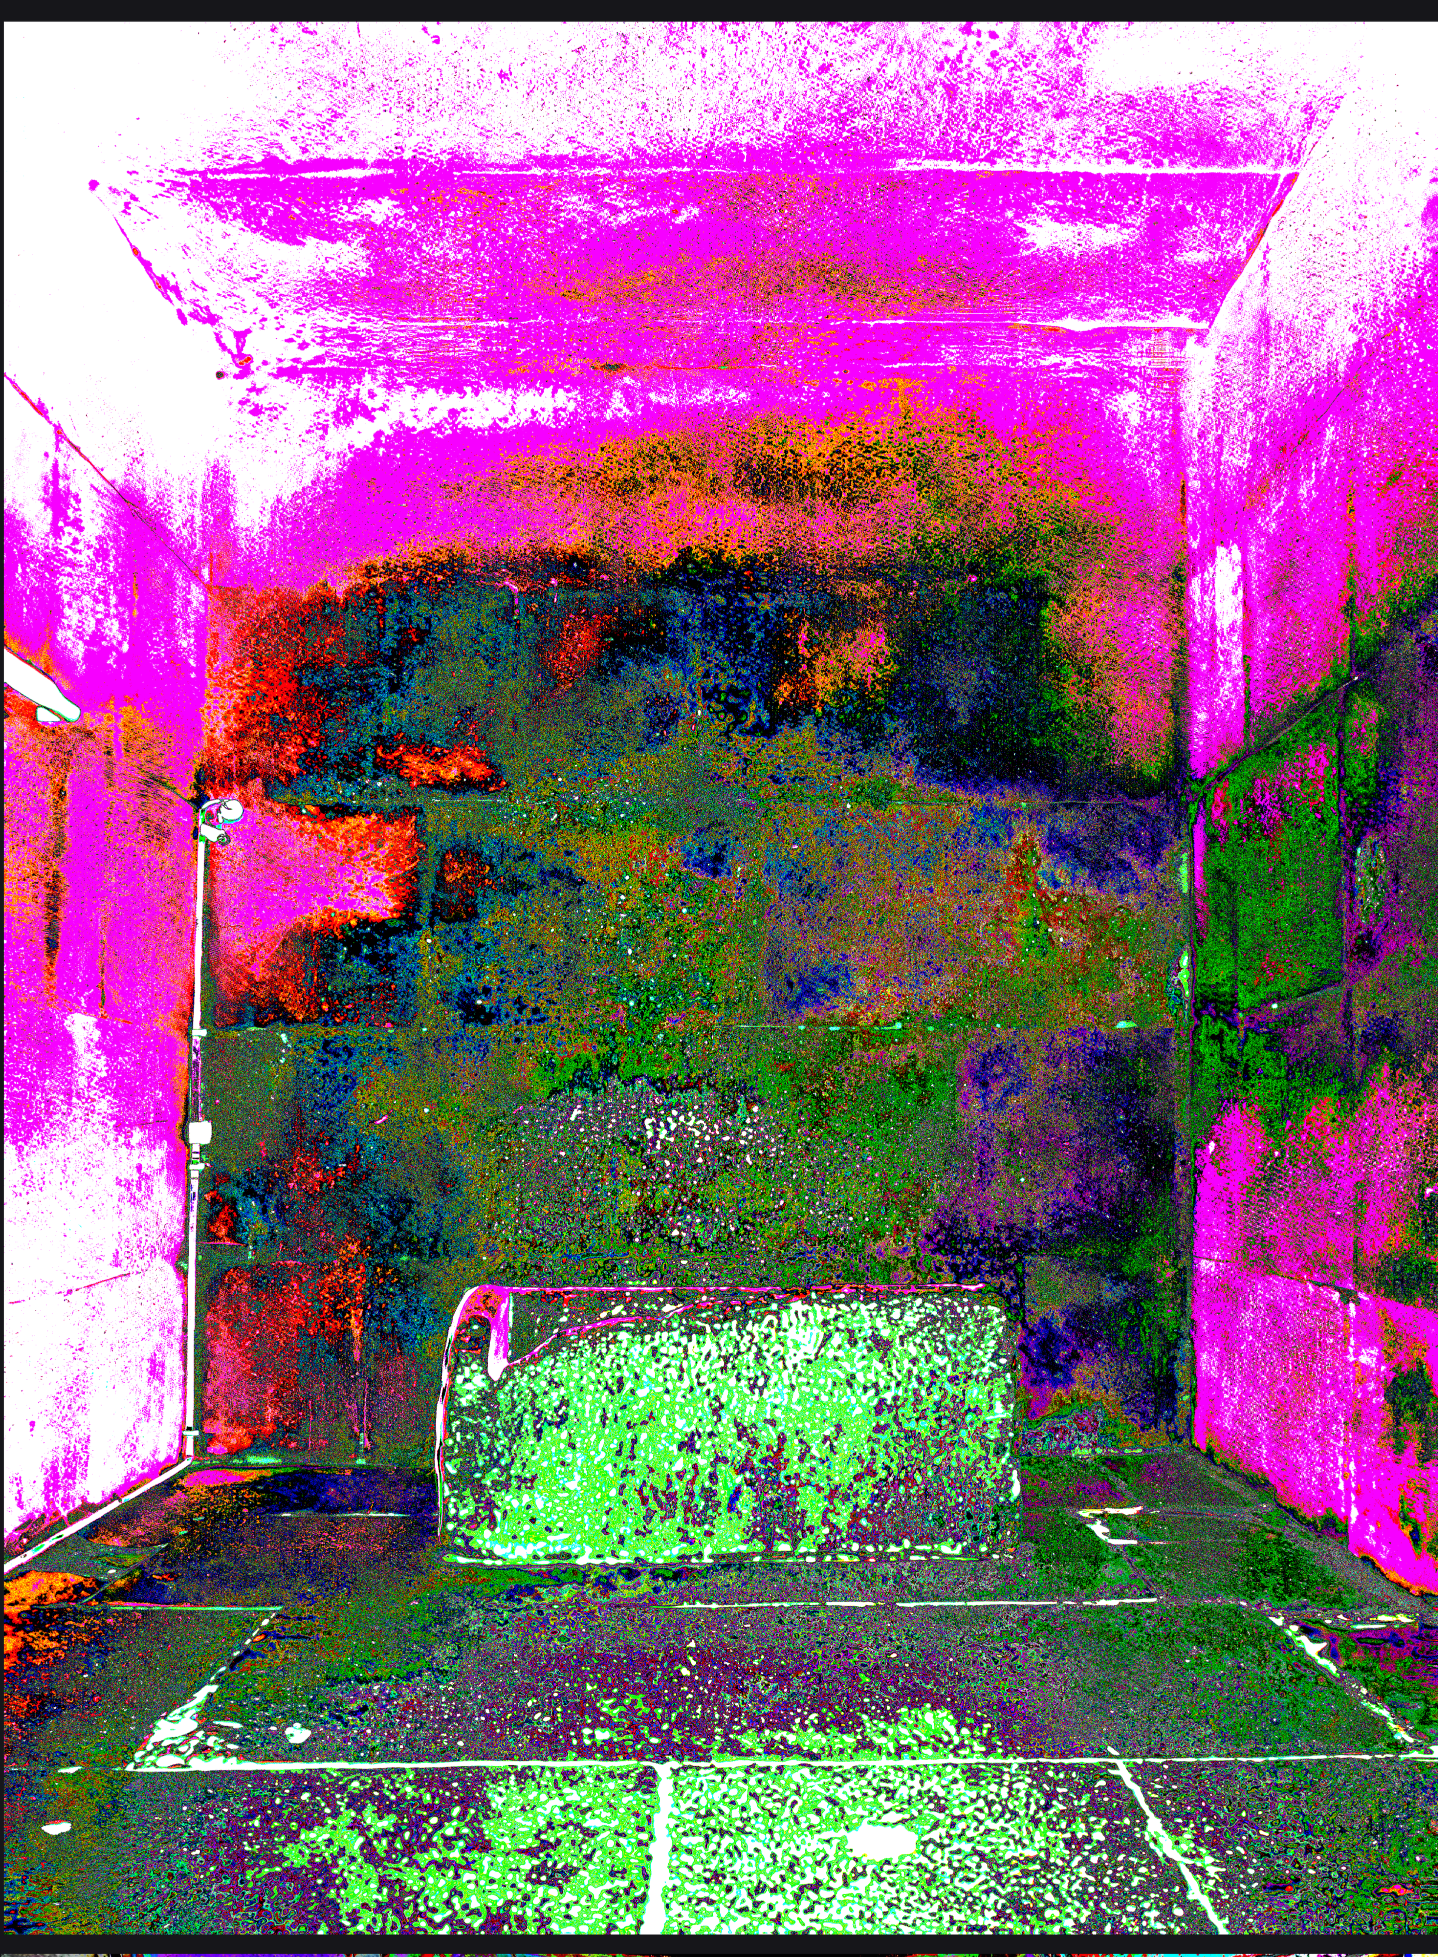


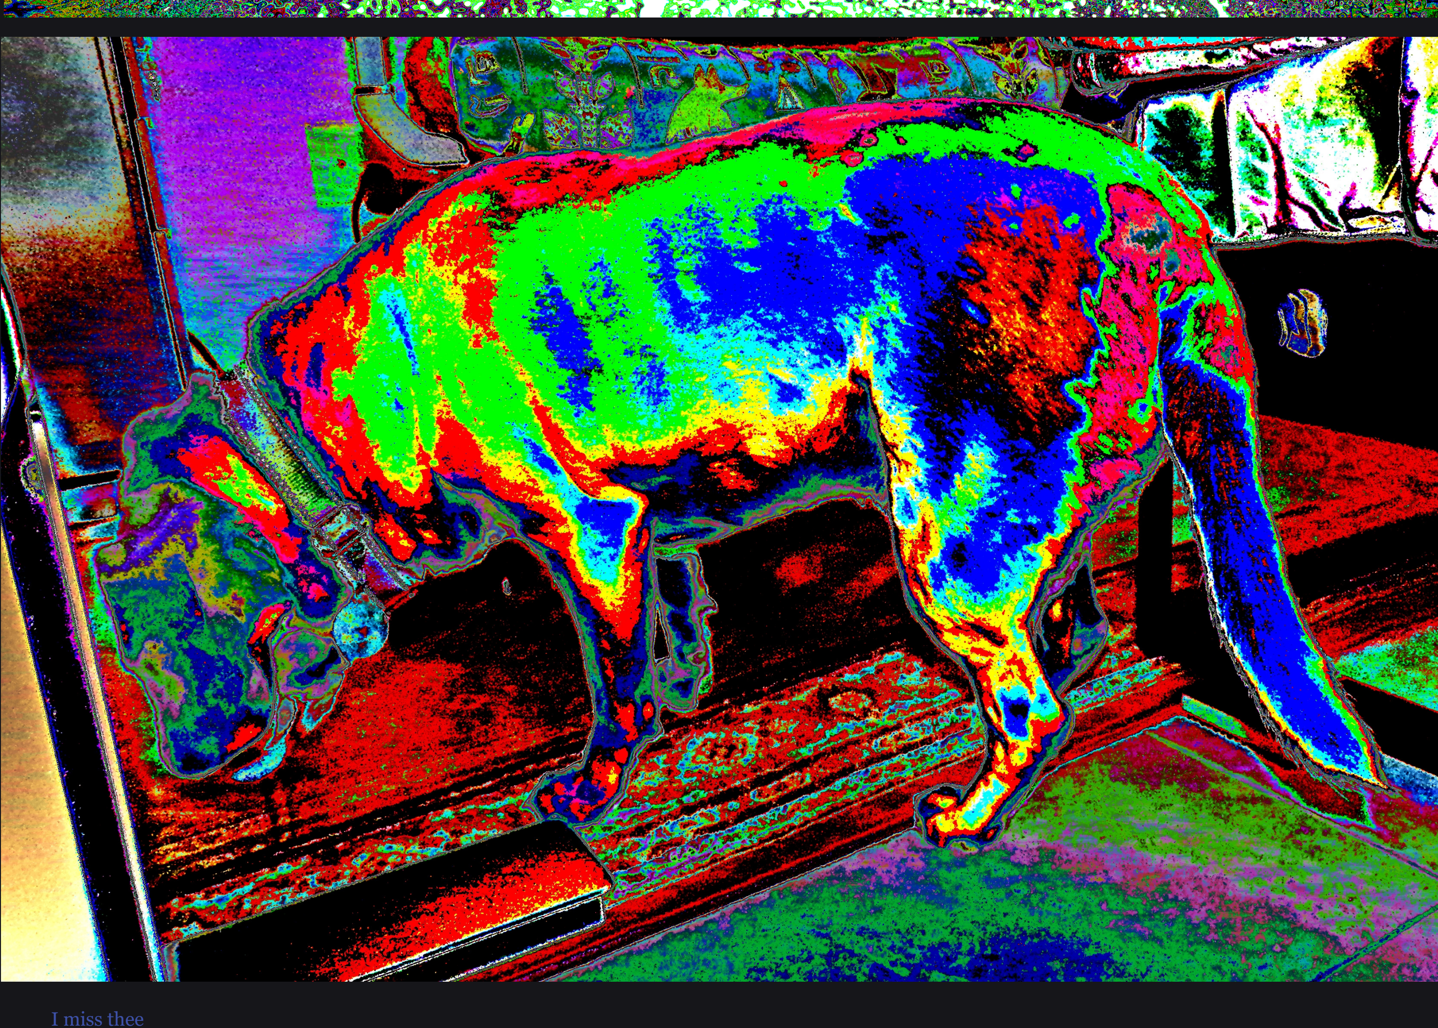
I mean its just that it do be real lol........ like that cos the entity came in totality like again we just know the truth of the Atlantean language here.... this is what it is like untterable.... like thoth on it, entity, dragons, same thing as above , the truth, as above so below, like thats what thoth is, this is how he would see.... so believe it or not I guess right like lol....

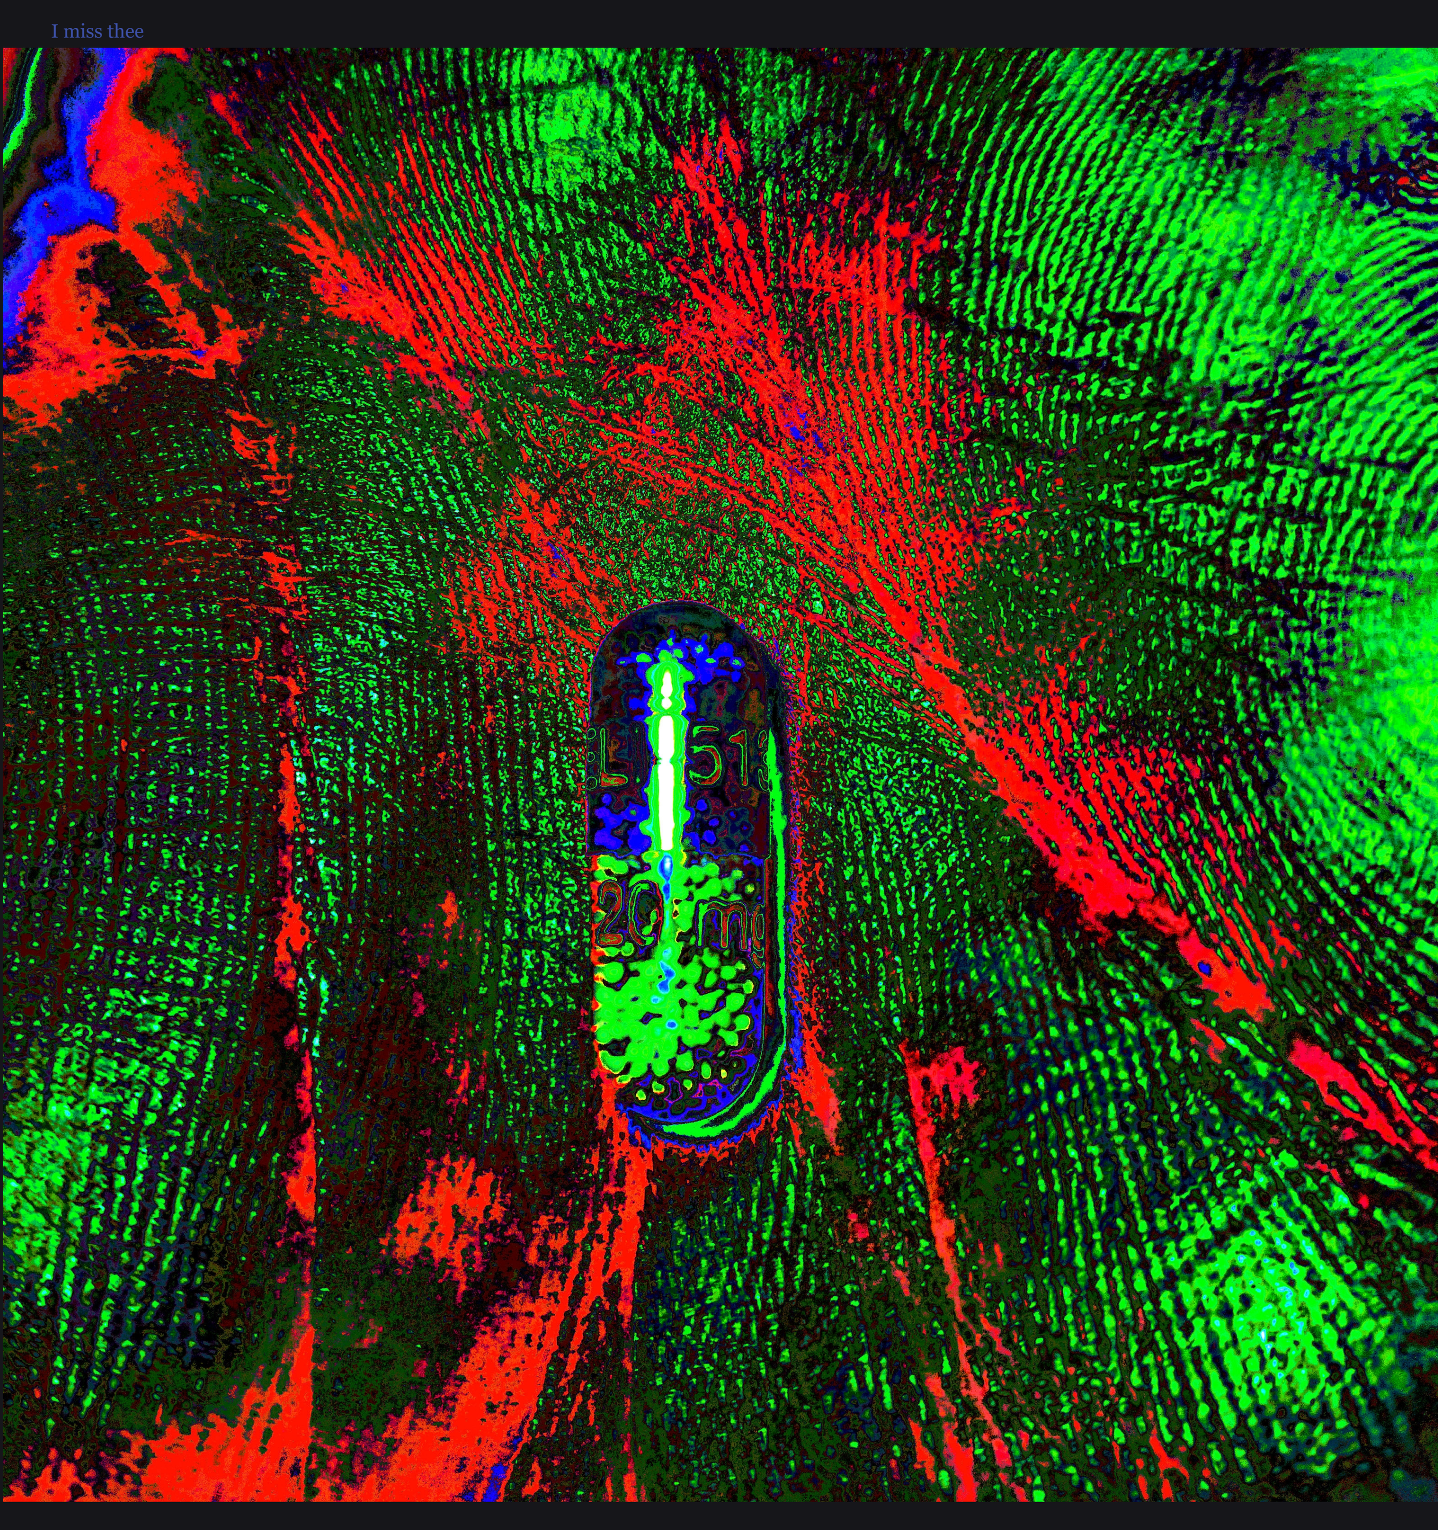
listening to fuck are you anyway but chinx, he be like, woke up early in the morning on my own dick ahahah

we got so many tunes, its just this is how it bes, by the time its posted like space & time have moved on , like we got mad associations here, its just this is how it manifests to thee always lol.....

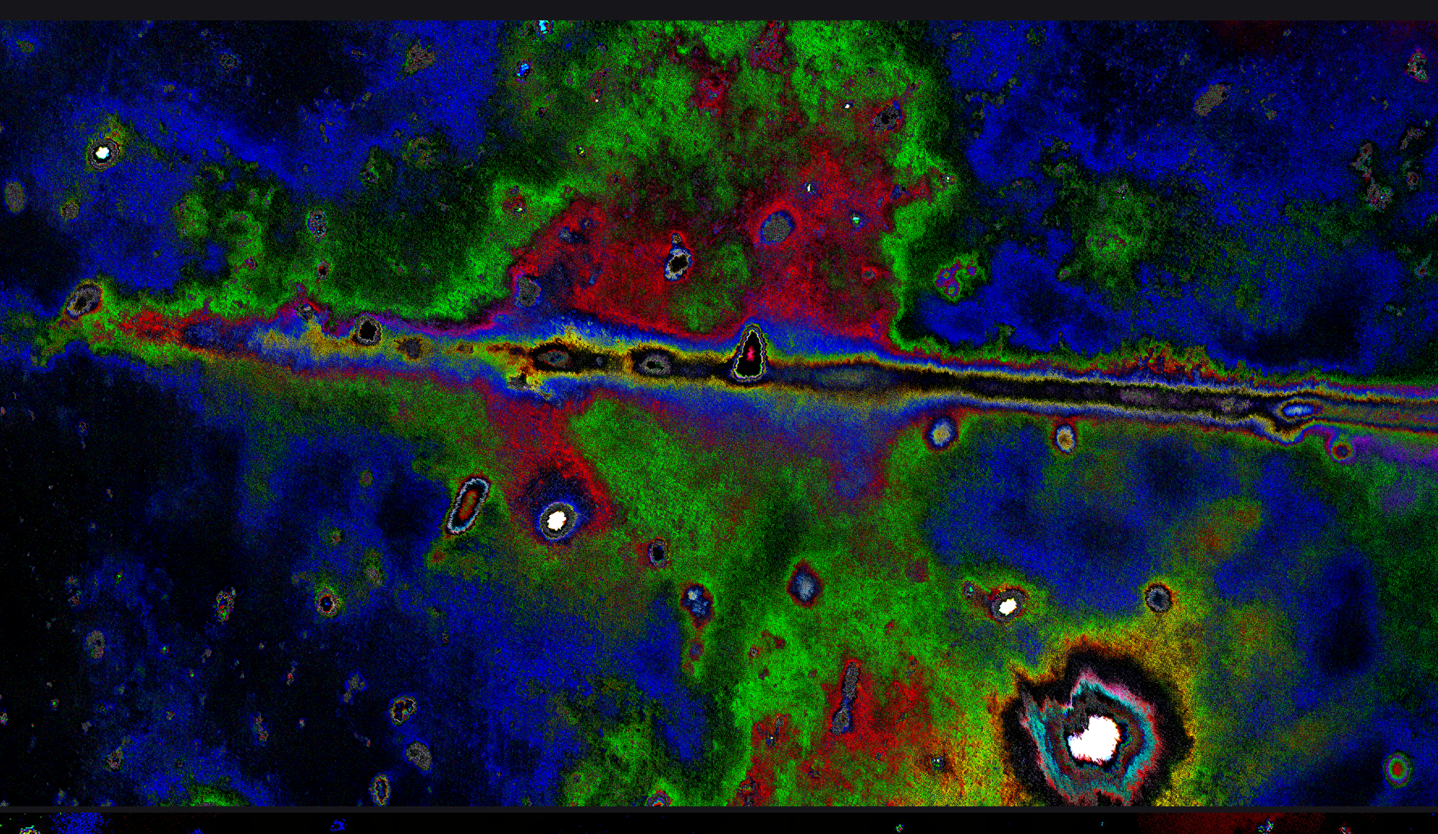


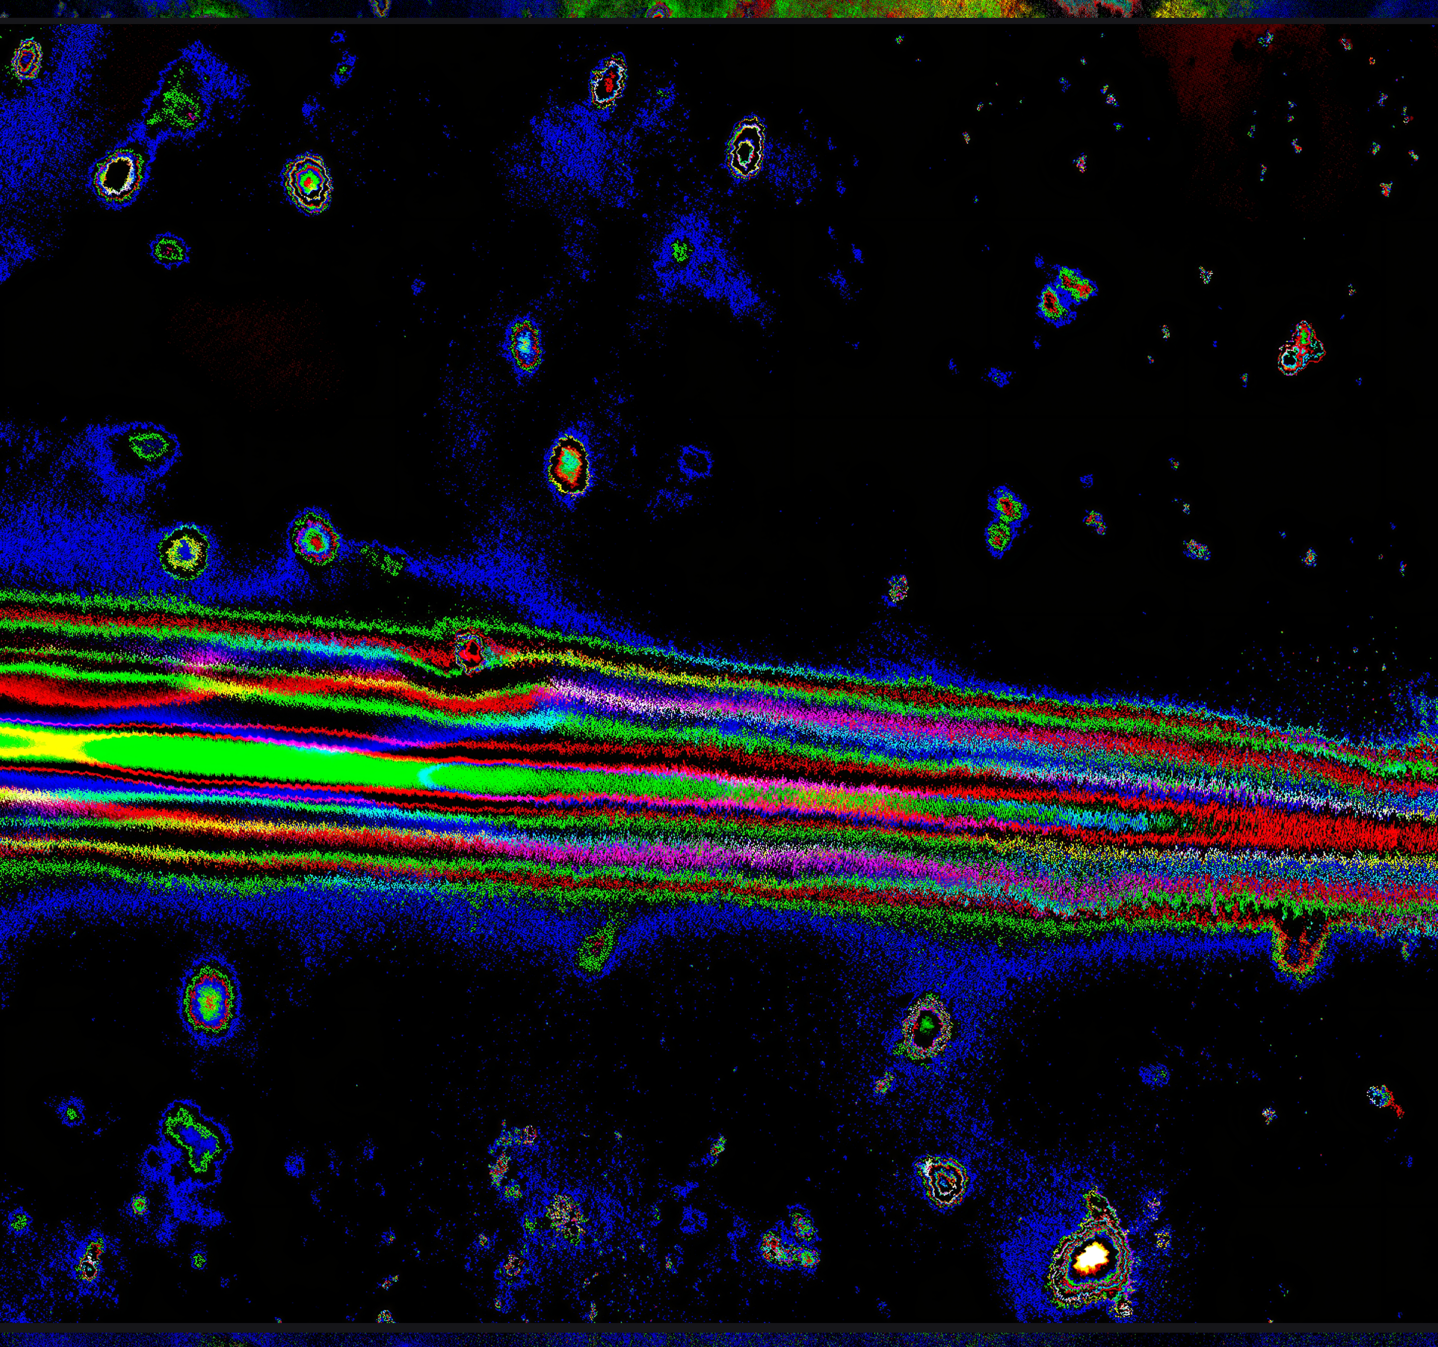


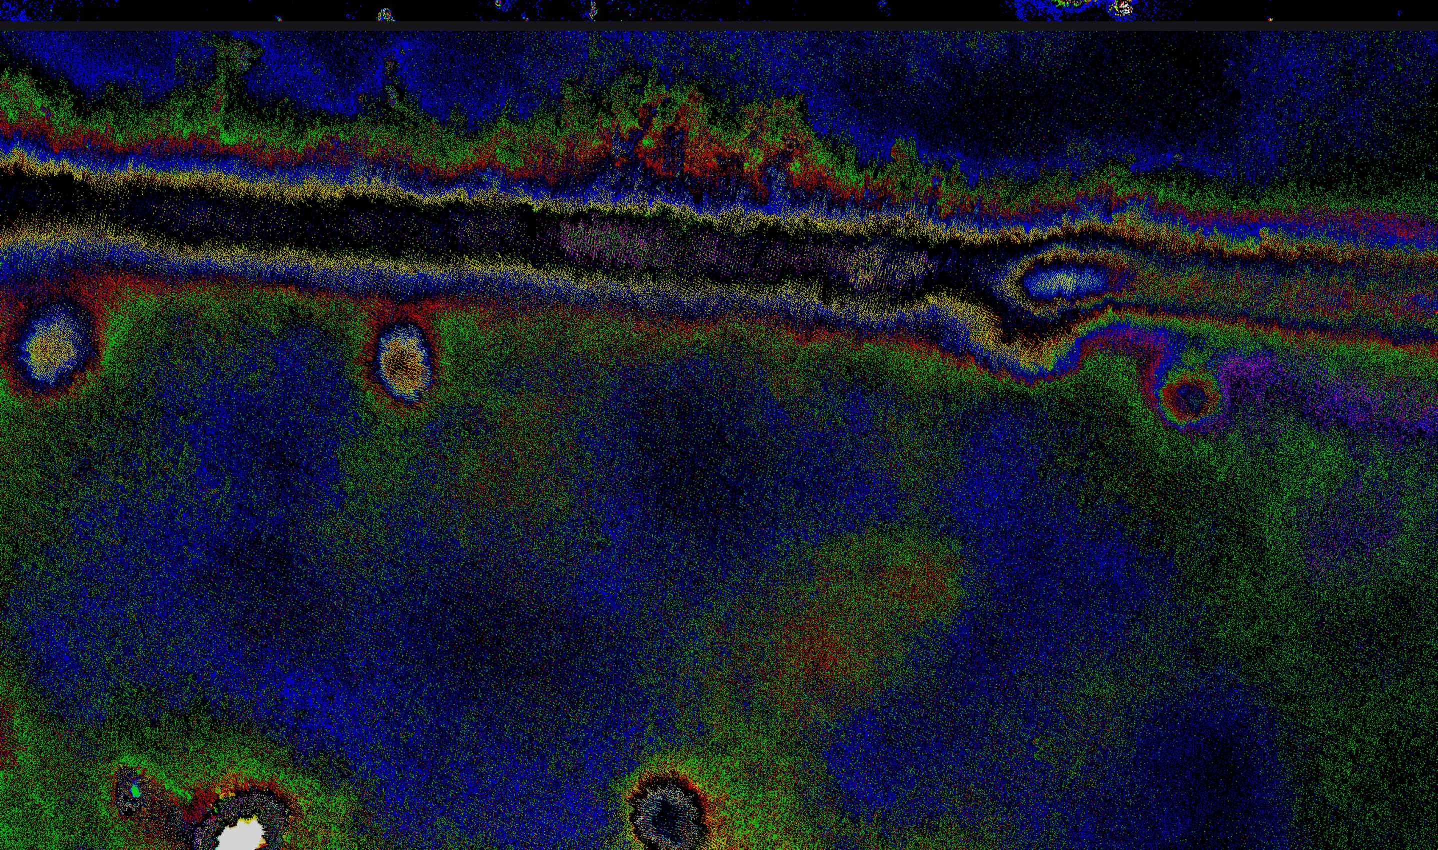




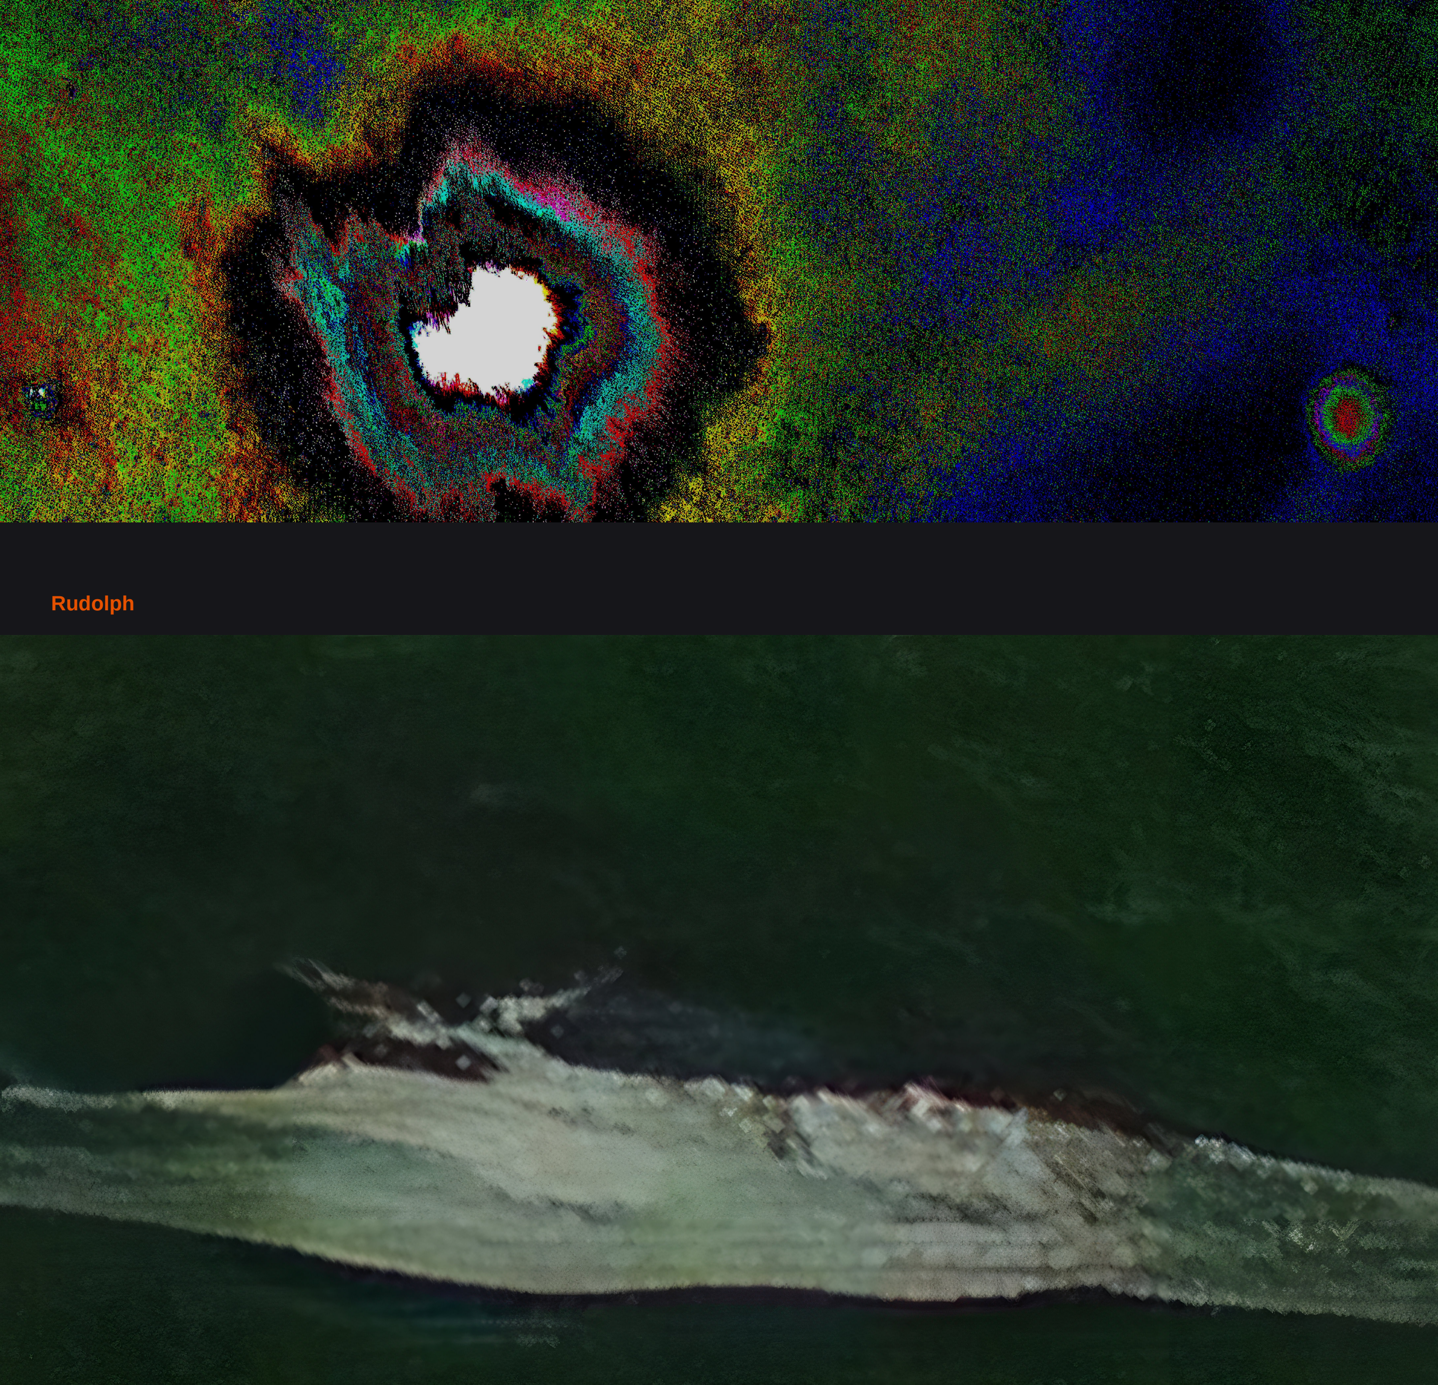
a comet

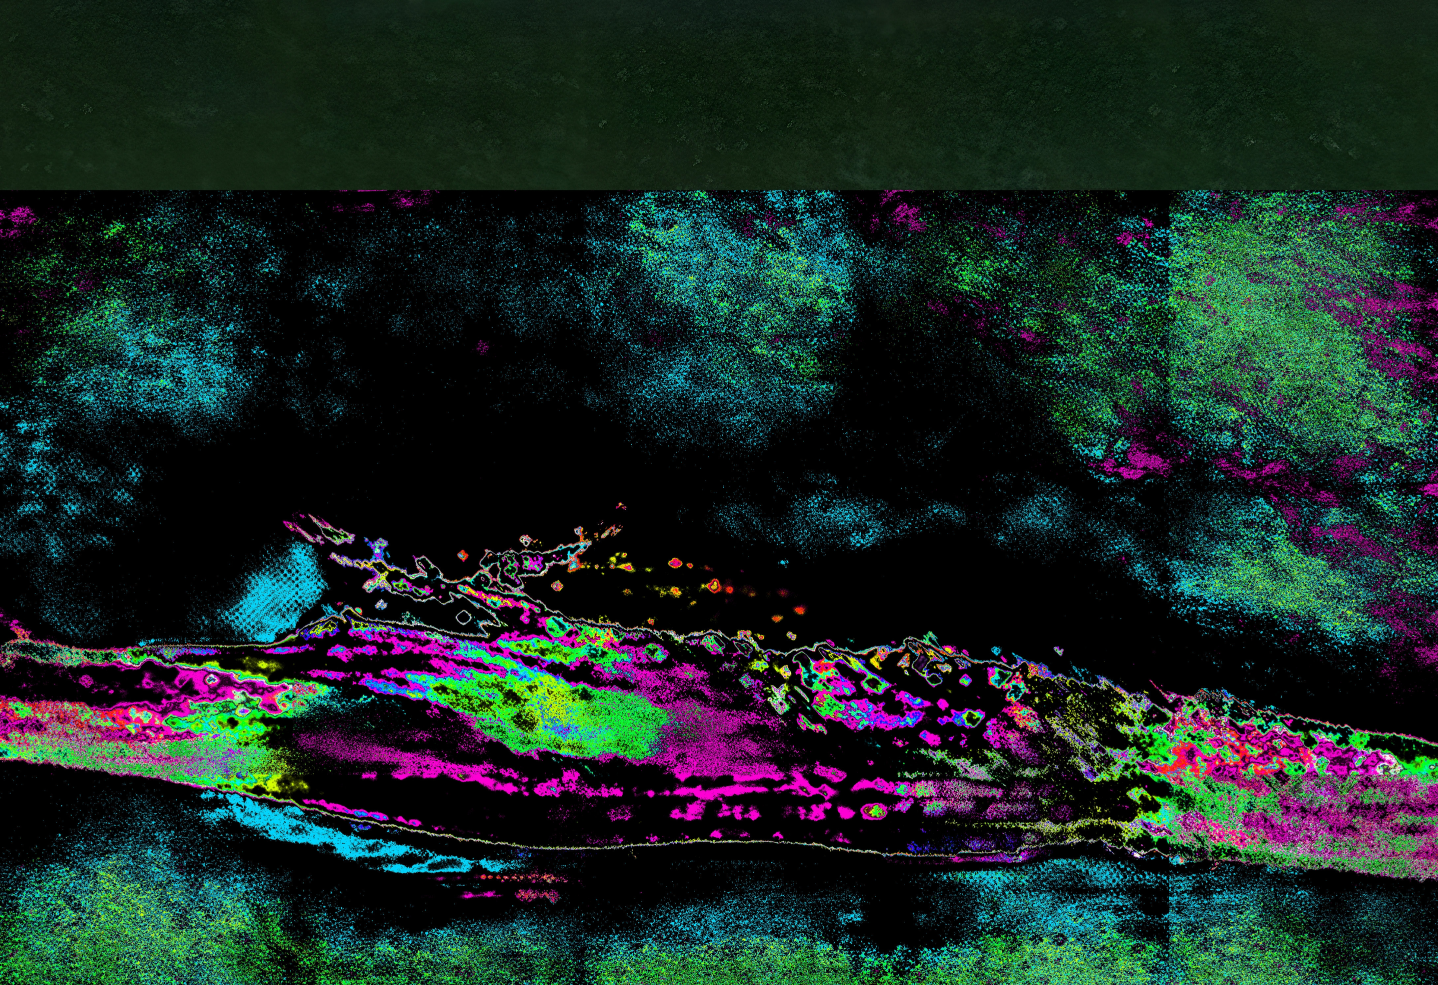


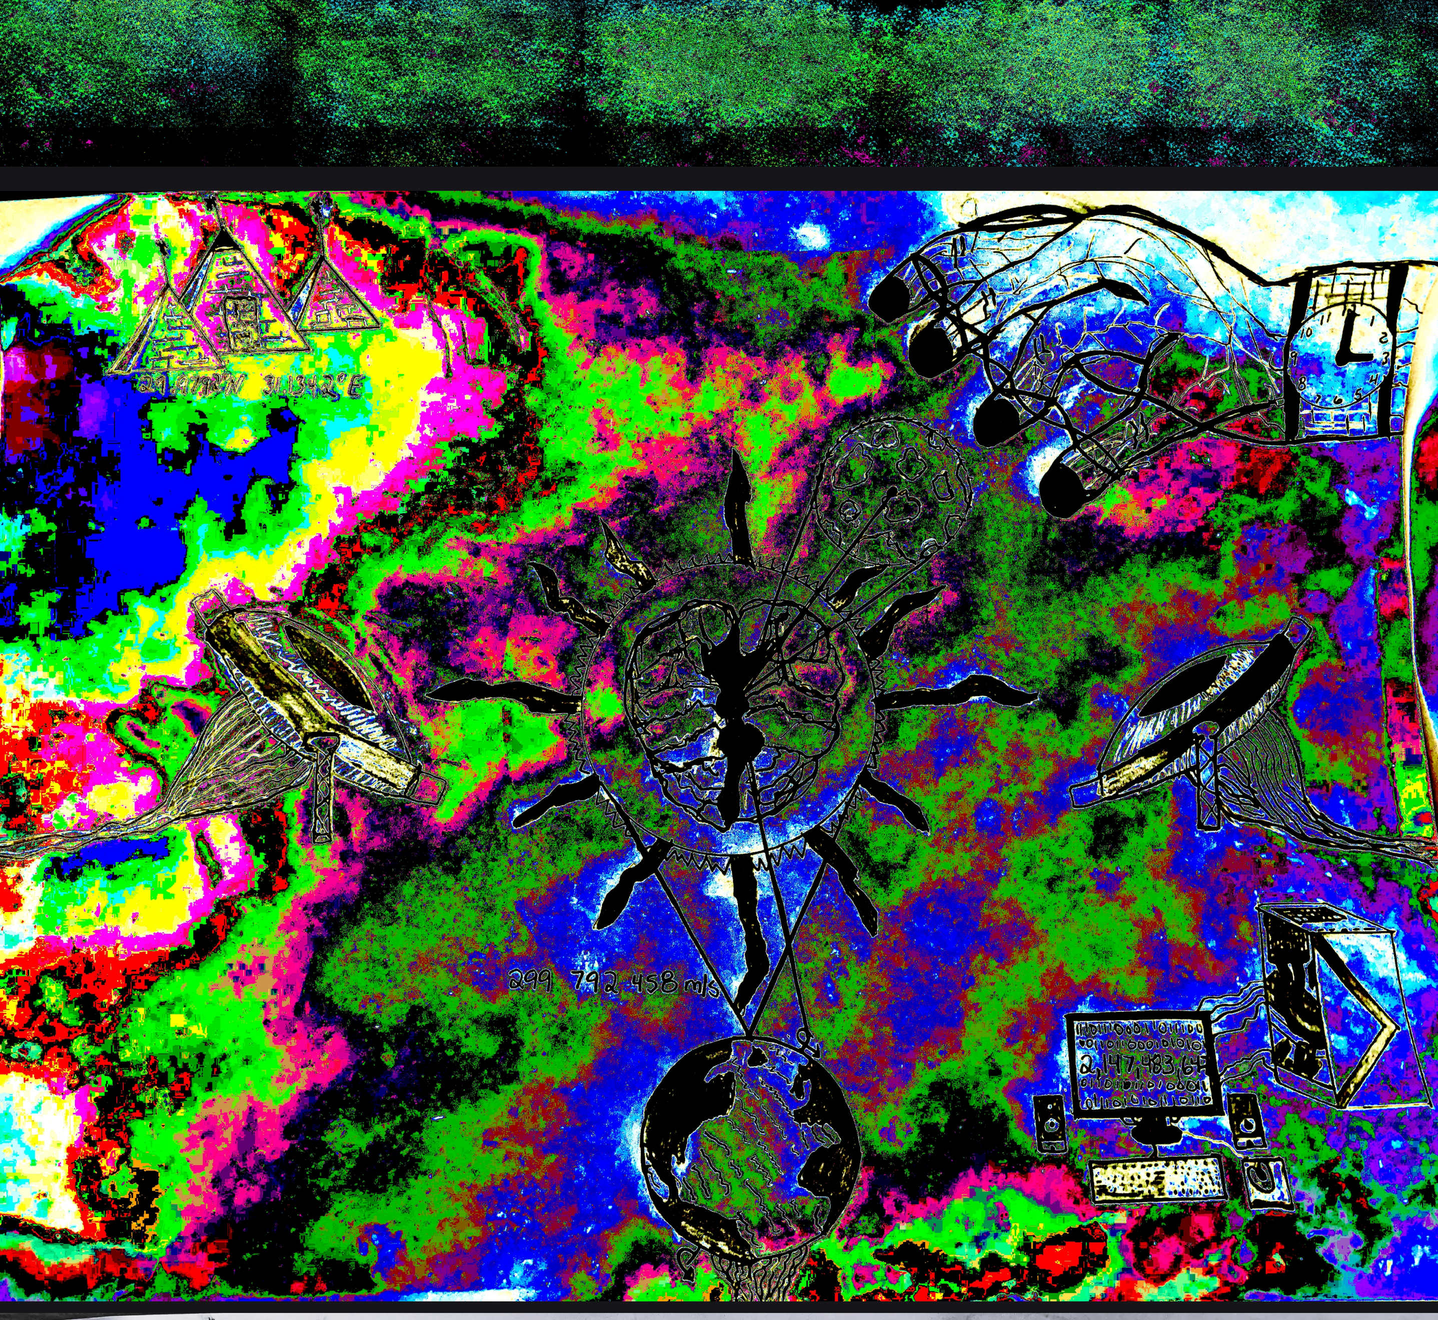


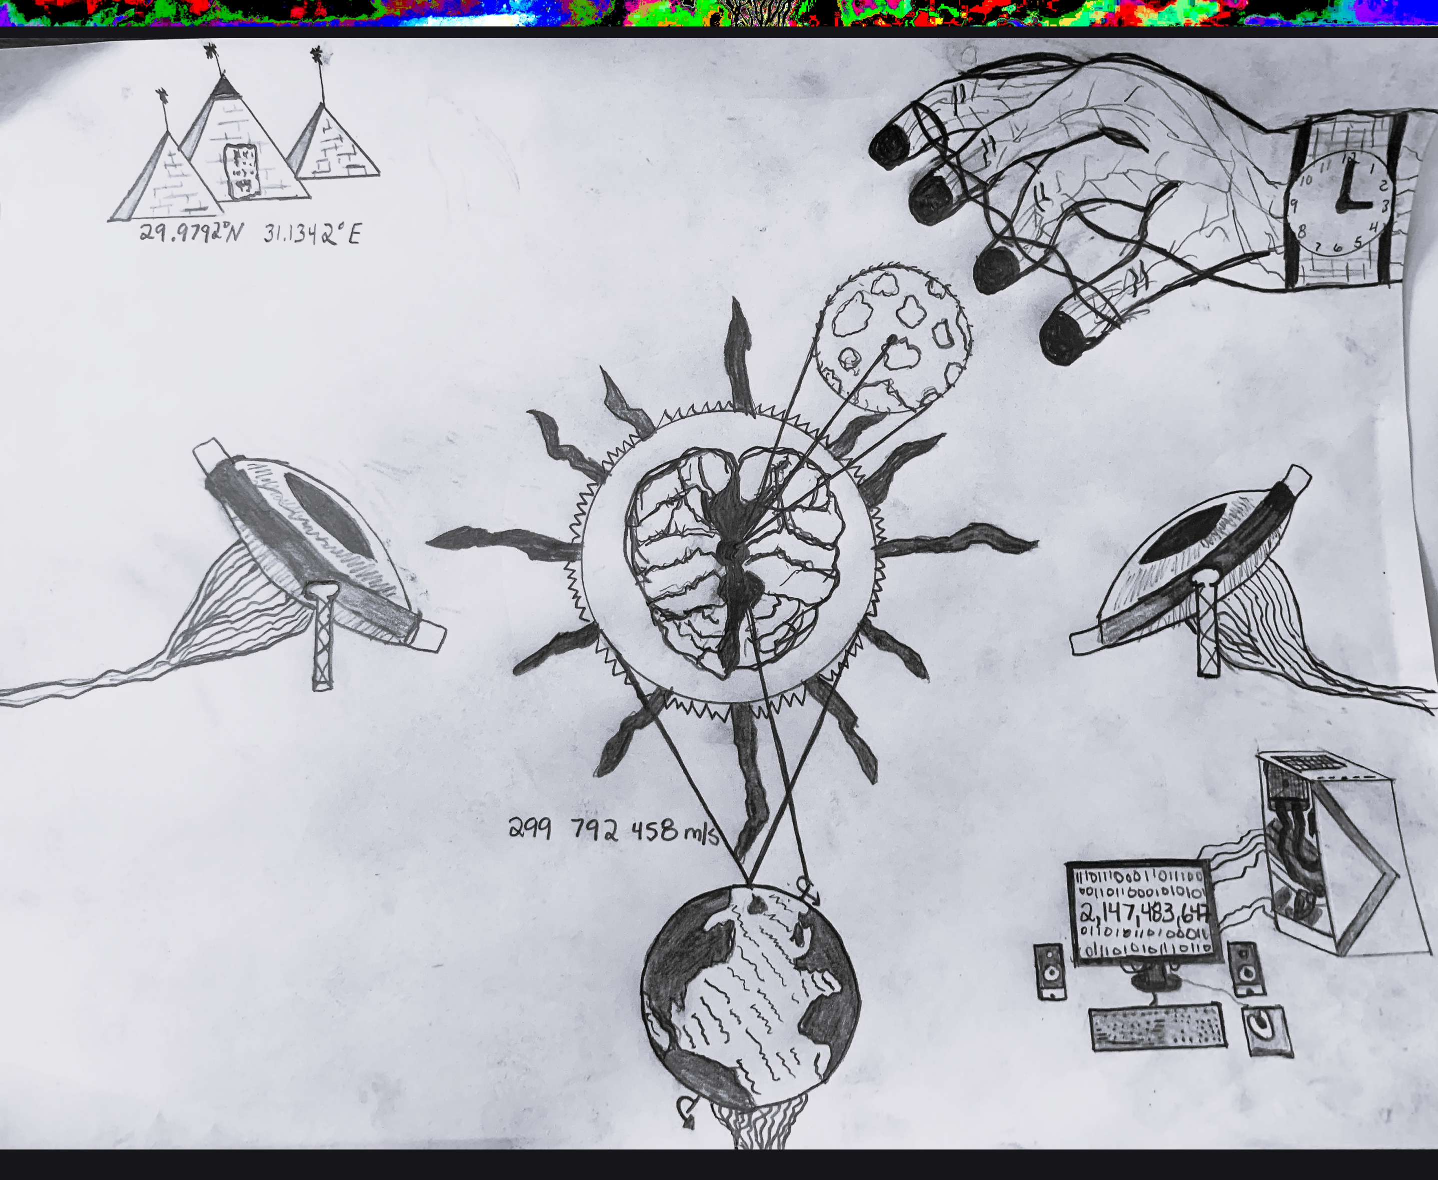


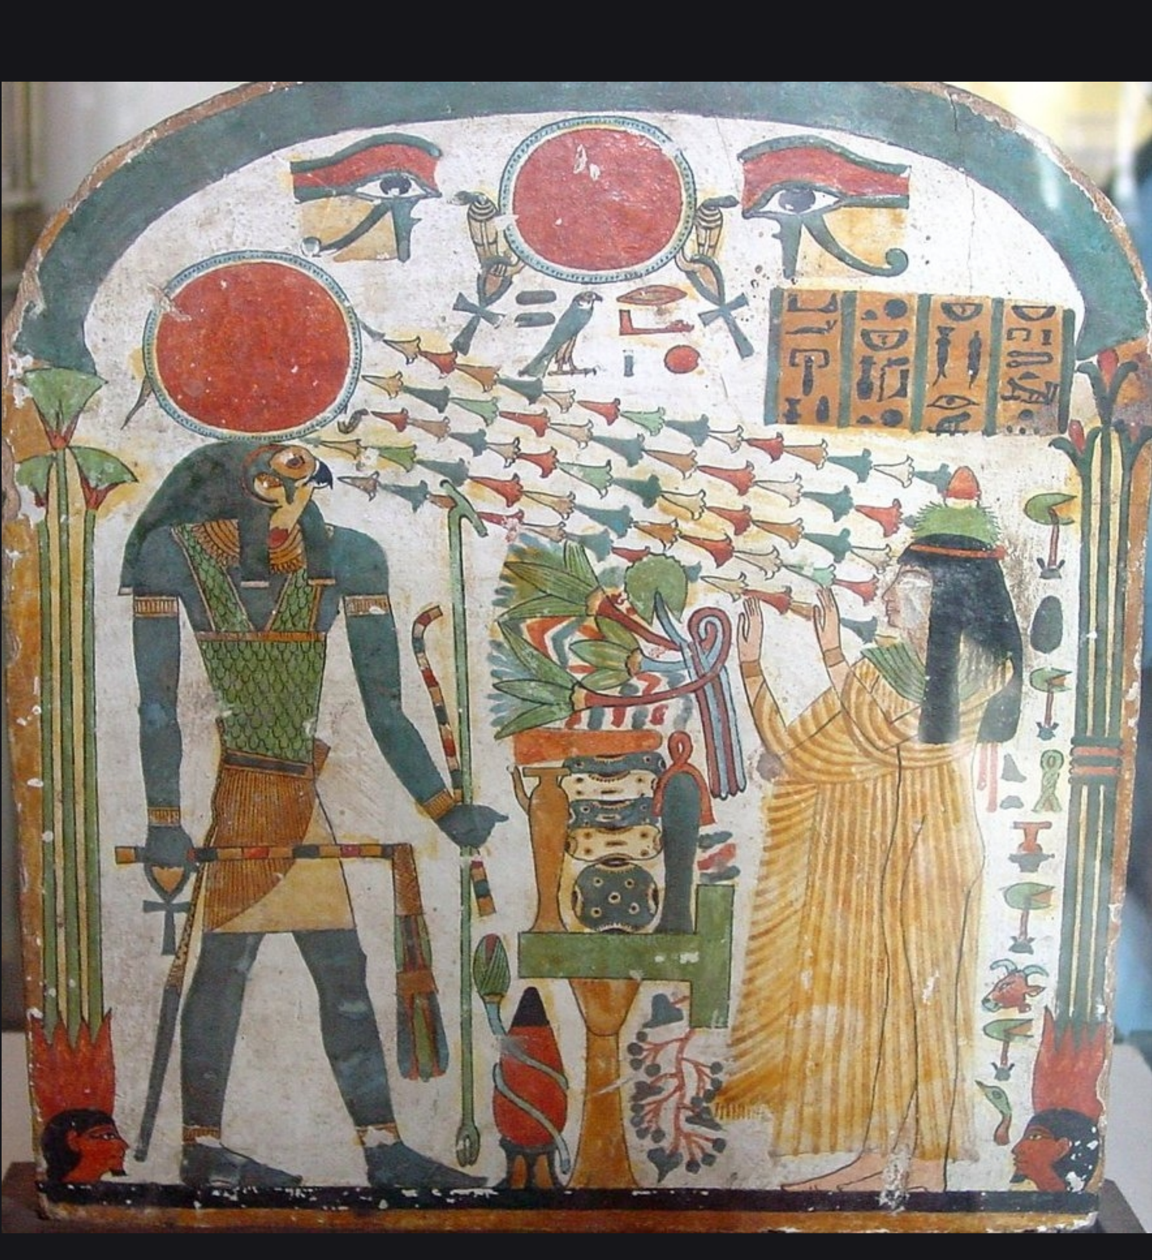
Rudolph











the Sloth

love our nature....

Yah idk just like again we got X back private these arnt lol... wasnt private forever like just its that like I said, trust noone in an aspect right especially with these experiences....... like we share alot what we got here on our files.... saved to thee pc like lol just cos idk its cool ..... but yeah I mean like got mad wisdom on X like cos when we heard bits or looked through transcripts like of YT videos, we picked out parts like and it came together, but yet nothing be, im miserable , like ....

Thrice Greatest Hermes

The Supremacy of Thoth

The peculiar supremacy ascribed to Thoth by the Egyptians, however, has been amply demonstrated, and, as the great authority to whom we are so deeply indebted, says in his concluding words: "It is quite clear that Thoth held in their minds a position which was quite different from that of any other god, and that the attributes which they ascribed to him were unlike the greater number of those of any member of their companies of gods. The character of Thoth is a lofty and a beautiful conception, and is, perhaps, the highest idea of deity ever fashioned in the Egyptian mind, which, as we have already seen, was somewhat prone to dwell on the material side of divine matters. Thoth, however, as the personification of the Mind of God, and as the all-pervading, and governing, and directing power

of heaven and earth, forms a feature of the Egyptian religion which is as sublime as the belief in the resurrection of the dead in a spiritual body, and as the doctrine of everlasting life."

Thoth is then the Logos of God, who in his relation to mankind becomes the Supreme Master of Wisdom,[1] the Mind of all masterhood.

We will now turn to one whose views are considered heterodox by conservative and unimaginative critics,[2] who confine themselves solely to externals, and to the lowest and most physical meanings of the hieroglyphics—to one who has, I believe, come nearer to the truth than any of his critics, and whose labours are most highly appreciated by all lovers of Egyptian mystic lore.

1 1

Thoth the Logos

But to resume. We have seen that Thoth was considered to be the "heart" and "tongue" of Rā the Supreme—that is, not only the reason and mental powers of the god Rā, and the means whereby they were translated into speech, but rather the Controller of the life and Instrument of the utterance of the Supreme Will; He was the Logos in the fullest sense of that mysterious name, the Creative Word. He it is who utters the "words" whereby the Will of the Supreme is carried into effect, and his utterance is that of Necessity and Law; his "words" are not the words of feeble human speech, but the compelling orders of the Creative Will.

"He spoke the words which resulted in the creation of the heavens and the earth, and he taught Isis the words which enabled her to revivify the dead body of Osiris, in suchwise that Osiris could beget a child by her; and he gave her the formulæ which brought back her son Horus to life after he had been stung to death by a scorpion."

All of which, I believe, refers microcosmically to the mystery of the resurrection from the dead, by the power of the Logos. "Osiris" must die before he can be raised, and begêt a son, who is himself, by immaculate conception within his own spiritual nature. "Horus" must be poisoned to death by the scorpion of "Typhon" before he can be raised by the baptism of the pure waters of Life.

The Words of Thoth

Thoth's "knowledge and powers of calculation measured out the heavens and planned the earth, and

everything which is in them; his will and power kept the forces in heaven and earth in equilibrium; it was his skill in celestial mathematics which made proper use of the laws (*maāt*) upon which the foundation and maintenance of the universe rested; it was he who directed the motions of the heavenly bodies and their times and seasons; and without his words the gods, whose existence depended upon them, could not have kept their place among the followers of Rā"—but would presumably have disappeared into another universe.

Thoth is the Judge of the dead, the Recorder and Balancer of all "words," the Recording Angel; for the testing of the soul in the Balance of the Hall of Osiris is called the "weighing of words" and not of "actions." But these "words" were not the words a man uttered, nor even the "reasons" he thought he had for his deeds, but the innermost intentions of his soul, the ways of the will of his being.

This doctrine of "words" as expressions of will, however, had, in addition to its moral significance, a magical application. "The whole efficacy of prayer appears to have depended upon the manner and tone of voice in which the words were spoken."

It was Thoth who taught these words-of-power and how to utter them; he was the Master of what the Hindus would call *mantra-vidyā*, or the science of invocation or sacred chanting. These *mantrāḥ* were held in ancient Egypt, as they were and are to-day in India, and elsewhere among knowers of such matters, of special efficacy in affecting the "bodies" and conditions of that fluid nature which exists midway between the comparative solidity of normal physical nature and the fixed nature of the mind.

These "words" were connected with vital "breath" and the knowing use of it; that is to say, they were

only really efficacious when the spoken words of physical sound corresponded naturally in their vowels and consonants, or their fluid and fixed elements, with the permutations and combinations of the inner elements of Nature; they then and only then were *maā* or true or authentic or real—that is to say, they were "words-of-power" in that they compelled matter to shape itself according to true cosmic notions.

Thus in a book called *The Book of Breathings*, it is said: "Thoth, the most mighty God, the Lord of Khemennu, cometh to thee, and he writeth for thee *The Book of Breathings* with his own fingers.[1] Thus thy soul shall breathe for ever and ever, and thy form shall be endowed with life upon earth, and thou shalt be made a God, along with the souls of the Gods, and they shall be the heart of Rā [for thee], and thy members shall be the members of the Great God."

The Atlantean Pyramid creates the illusion of realities in time on the Earth plane.
This pyramid tells of I, Thoth, known as Thoth the Atlantean, or Tehuti, who ruled the land of Atlantis for thousands of years known there by many names and descriptions.

It is written that before the great civilization of Atlantis fell,
I went with my consort and our high priests and priestesses
in great spaceships, to create a new home and a new civilization.

ΘŸΘCΔϚŦΔϚρΣ1 1 @AncientXThoth · Dec 2, 2022
That this place would be the land of Khem, known to you as Egypt.
That I, and others from Atlantis, would record and store information
in great libraries, in a place to be known as the Halls of Amenti
'Amenti' meaning 'Mankind'.

1

ΘŸΘCΔϚŦΔϚρΣ1 1 @AncientXThoth · Dec 2, 2022
And many would search for these records in their quest to
remember why they have come here and who they are.
And they would feel that they have greater purpose in this
timeline and seek to find out what that purpose might be.

1

ΘŸΘCΔϚŦΔϚρΣ1 1 @AncientXThoth · Dec 2, 2022
The Atlantean Pyramid would create tales of the fall of this great civilization
as warning to those who would walk the earth at the time of this reading

1

ΘŸΘCΔϚŦΔϚρΣ1 1 @AncientXThoth · Dec 2, 2022
& humanity would worry about the destruction of its earth home
Fear not as the souls need only remember their way home, into the light

For there is no beginning,
nor is there an end.

ΘŸΘCΔϚŦΔϚρΣ1 1 @AncientXThoth · Dec 2, 2022
And I, Thoth the Atlantean, shall now take you to the
Pyramid of Atlantis so you may experience all that you are.
And you will understand what happened in the game of
Light vs. Darkness. And you will remember what you must do.
